Innovating Every Day

With decades of experience and a deep commitment to innovation, Roca is at the forefront of creating state-of-the-art sanitary solutions that redefine comfort, hygiene, and sustainability.

Driven by a relentless pursuit of excellence, we continuously push the boundaries of design and engineering to deliver the highest levels of customer satisfaction. This commitment is evident in our smart toilets, which incorporate the latest technologies and avant-garde materials, offering an exceptional blend of functionality and sophistication that enhance daily living.

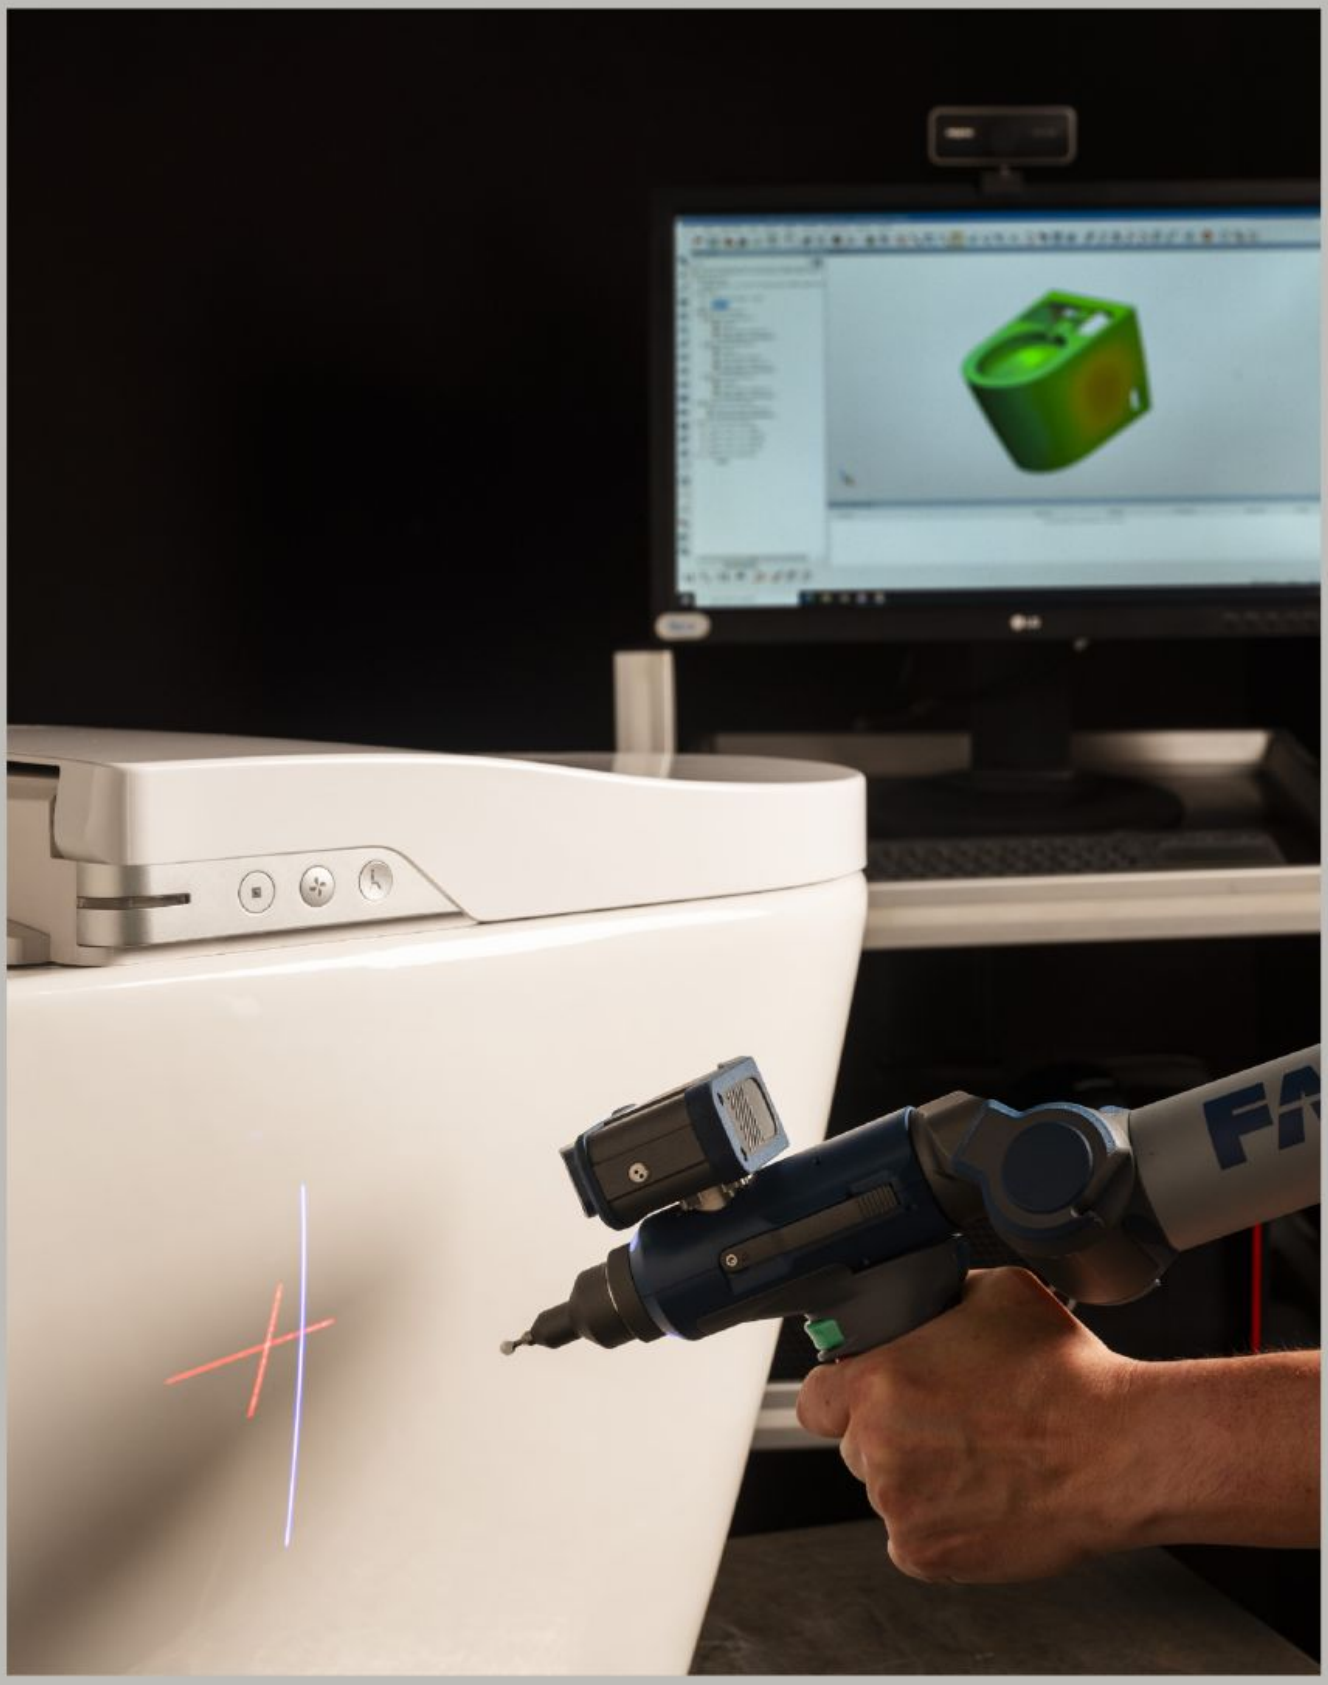

Global capacity

Our three Smart Toilet Competence Centres in Gavà (Spain), Suzhou (China) and Taiwan serve as specialised hubs for research, product development, design, assembly and production. With leading technical and R&D expertise, these centres adhere to rigorous industry-recognised testing and quality standards and are supported by a global network of manufacturing facilities.

Industrial leadership and legacy

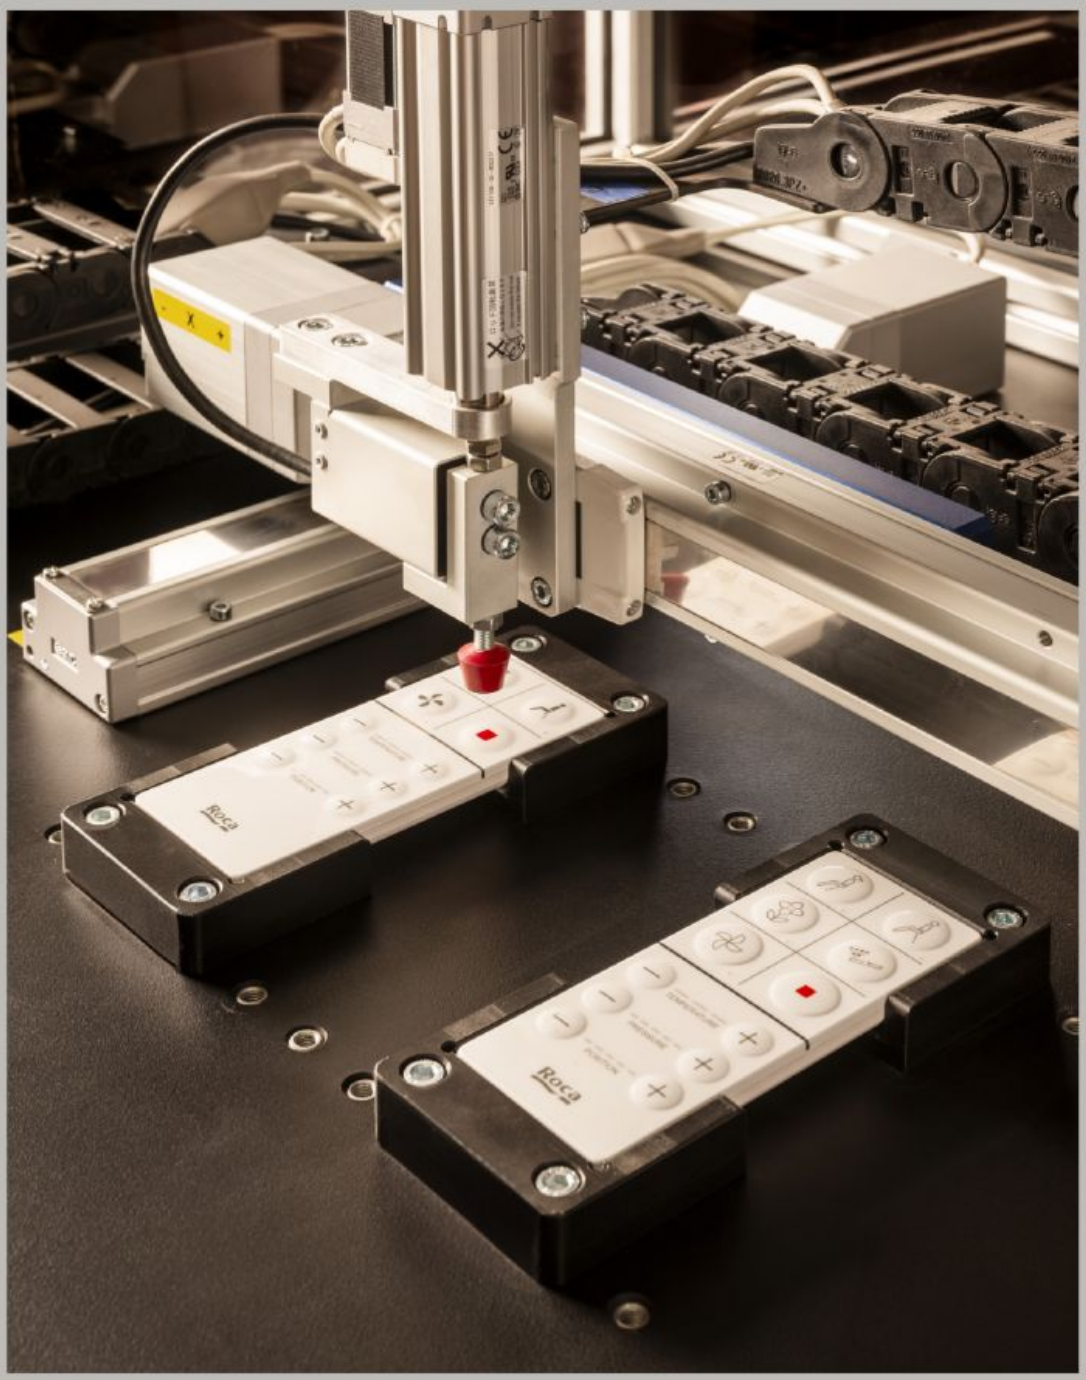

By embracing the latest technologies, we are revolutionising the way we design, manufacture and distribute our products. Fostering a culture of continuous improvement, we are streamlining production processes and increasing efficiency to meet the growing demand for our smart toilets, setting the course for the future of sanitary solutions.

Inspiring innovation

Our extensive manufacturing expertise, combined with the know-how of our competence centres, enables us to continually push the boundaries to deliver the best products and pioneer authentic solutions in our cutting-edge collections of smart toilets. Focusing on the most crucial elements of smart toilet functionality our commitment to innovation is exemplified by our patented washing and drying developments.

A hallmark of quality

As a global company with roots in Barcelona, we have been a leader in bathroom solutions for over 100 years. Our extensive experience has earned us the trust of professionals, contractors and consumers alike. To ensure the highest standards of quality, each product is meticulously crafted and rigorously tested at our Competence Centre in Gavà.
To ensure safety standards, all In-Wash® toilets comply with European regulations, including EN1717, one of the most important regulations to prevent water backflow.

Taking Comfort to New Heights

Smart Toilets

In this age of rapid technological advancement, smart devices have become an essential part of everyday life, extending their influence into our homes. In the bathroom, this evolution has reached unprecedented levels, introducing a myriad of innovative solutions to enhance comfort and hygiene. Among these developments, smart toilets have emerged as one of the revolutionary bathroom fixtures that have redefined the approach to personal hygiene practices and transformed the entire bathroom experience.

Smart toilets represent a significant leap forward in bathroom technology, offering a blend of comfort, hygiene, and convenience that surpasses standard toilets. These advanced devices use water for a gentle and natural cleaning experience, ensuring superior personal hygiene, and are equipped with advanced innovations to effortlessly maintain impeccable bathroom cleanliness.

The benefits of smart toilets in the modern bathroom are undeniable. Their versatility, combined with advanced hygiene features and personalised settings, make smart toilets a practical and luxurious addition to any household. These smart devices not only improve daily routines, but also contribute to a cleaner, more comfortable, and more convenient bathroom experience, making them an essential part of contemporary living.

Roca offers versatile solutions tailored to diverse needs and budgets, ranging from entry-level smart toilets to high-end, feature-rich options. Incorporating In-Wash® toilets and Multiclean® seats into a bathroom, represents a significant step into the future of bathroom technology, where innovation and everyday convenience come together.

The sleek design of In-Wash® smart toilets integrates seamlessly with all bathroom styles and perfectly complements Roca bathroom collections, while the Multiclean® shower seats are compatible with any Roca toilet, ensuring accessibility for all types of homes without the need for extensive renovations.

The sophisticated washing and drying systems of these smart toilets can be tailored to individual preferences through an easy-to-use control panel and an extended mobile app. In addition, the integration of smart technology through Roca Connect allows users to schedule maintenance, receive notifications, and gain valuable usage insights.

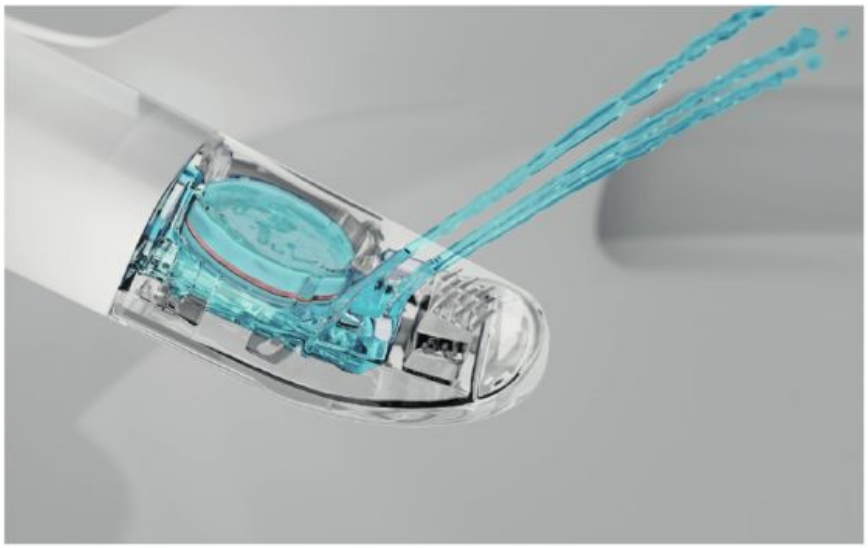

The perfect wash

The core functionality of a smart toilet is centred around washing and drying solutions, with Roca leading the way, offering maximum customisation through separate water sources for front and rear washing.

Several patented innovations allow each smart toilet to deliver optimal hygiene and comfort with superior results. These solutions use instant water heating systems to ensure a continuous supply of hot water for consecutive use by multiple users.

Soft Front Wash In-Wash® Insignia

Rear Wash Multi-Stream In-Wash® Insignia

Front wash with Airtech In-Wash® Vorea, In-Wash® Ona and Multiclean® M4

Rear wash with Multi-Stream
The rear wash with Multi-Stream gives users a choice of three different rear wash modes — soft, intense or mixed — delivered through a separate outlet from the front wash, allowing for tailored cleaning to suit different preferences.

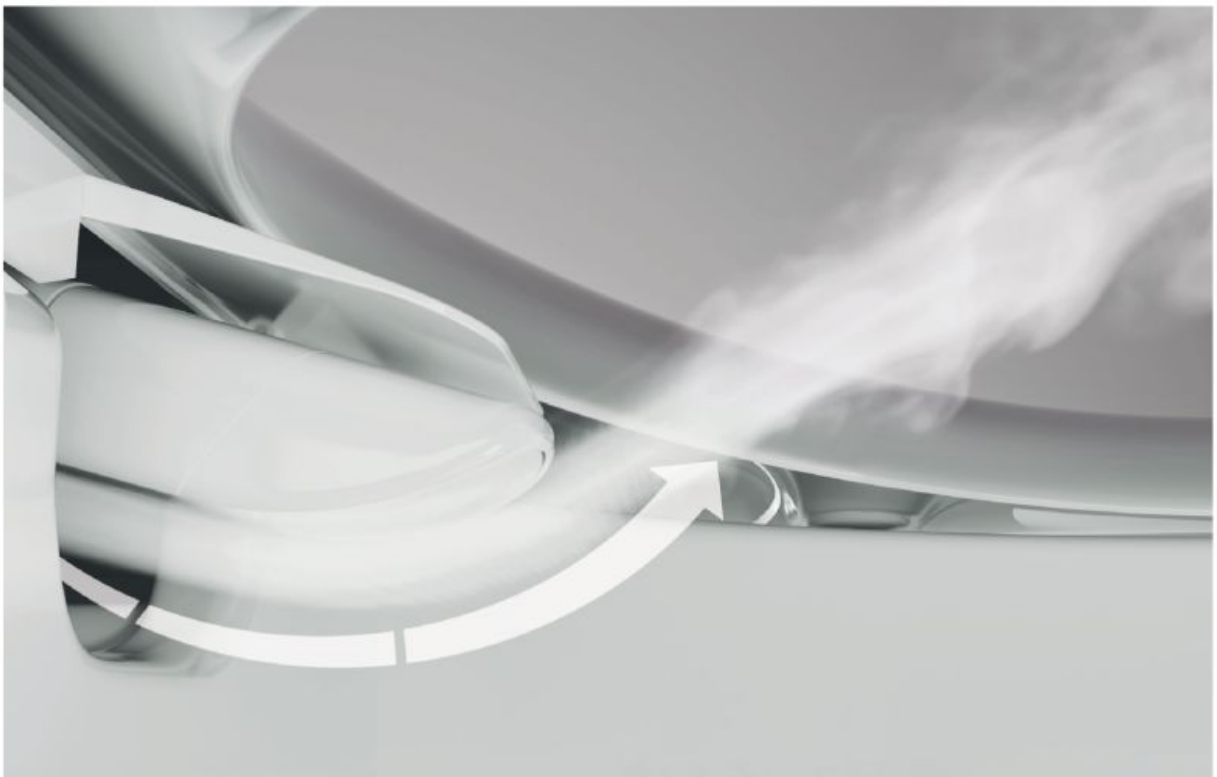

Soft front wash
This functionality uses nine different sources for perfect water distribution of water and a superior level of front cleaning.

Rear and front wash with Airtech technology
This technology ensures highly effective cleaning using advanced engineering that injects air into the water stream.

Maximum customisation
Adjustable nozzle positions, water pressure, temperature and oscillation ensure ideal water distribution for a better washing experience. These functions can be personalised and conveniently controlled. In addition, the mobile app allows for the creation of user profiles, automatic drying after washing, and the selection of washing and drying times.

State-of-the-art drying

After washing comes drying, an essential feature of smart toilets designed to enhance user comfort. Options range from drying with warm air with adjustable temperature levels for a more tailored experience, to high-end drying technology inspired by the Coanda effect for precise and efficient drying. Users can easily personalise and control these drying features via a mobile phone app.

Dryer Conda In-Wash® Insignia

Dryer Conda In-Wash® Ona and Multiclean® M4

Coanda Effect Dryer
High-performance dryer with the Coanda effect, in which fluids tend to follow the surfaces. This principle was a source of inspiration in the design of the nozzle, which directs air to the precise point where it is needed. With the Coanda effect air is directed to a specific area for peak drying performance at any power level.

A unique combination of comfort and style

Smart toilets are designed to make everyday life better, with a range of advanced features that put wellbeing first and ensure that every use is a pleasurable experience.

Heated Seat
A heat seat adds to the luxury experience by distributing heat evenly for extra comfort. Users can choose from four different temperature levels, either continuously or scheduled via the app.

Roca has also developed an exclusive quick release system for In-Wash® Insignia. This makes it easy to remove for cleaning, despite its heating system.

Quick release heated seat In-Wash® Insignia

In-Wash® Vorea In-Tank®

In-Tank®

A notable innovation is Roca's In-Tank® technology. This ingenious design, which integrates the cistern into the toilet bowl, significantly enhances the user experience by combining practicality with advanced technology for maximum convenience. The In-Tank® design is both space-saving and aesthetically pleasing. By eliminating the external ceramic cistern and flush plate, it frees up valuable bathroom space while maintaining clean, sleek lines that contribute to a modern and visually appealing look. Placing all the necessary elements in the toilet bowl and off the wall also ensures easier access, installation and maintenance.

In-Tank® offers a 4.5 litre full flush that combines powerful performance with quiet operation. Unlike traditional systems where water is stored behind the wall, In-Tank®'s integrated design ensures reduced noise levels, without disturbing adjacent rooms.

Seamless automation

A presence sensor enables the automation of various functions, all of which can be easily configured through the Roca Connect app. These functions are activated as the user approaches, ensuring a seamless and convenient experience:

Auto Open/Close
The automatic opening and closing of the seat and lid provides a more hygienic and comfortable experience, eliminating the need to touch the seat or lid.

Auto Flush
This feature automatically determines the appropriate flush volume, providing either a full or half flush, depending on user needs. For added hygiene and convenience, this functionality also allows the configuration of a pre-flush that activates as the user approaches, helping to maintain a clean bowl.

Auto open Close In-Wash® Insignia

Auto Flush In-Wash® Insignia

In-Wash® Insignia night light

Auto Deodorizer
Designed to effectively remove odours and maintain a fresh bathroom environment, the automatic deodorizer uses an advanced design to maximise odour removal efficiency. To ensure that all odours are effectively neutralised, three key factors are maximised:
1. The contact time between the contaminated air and the carbon filter
2. The size of the filter to increase the contact area
3. The choice of a high quality, easily replaceable carbon filter with exceptional absorption capacity

Night Light
For convenient nighttime visits, the night light provides subtle illumination, with options for manual, scheduled or automatic activation.

A new standard of bathroom cleanliness

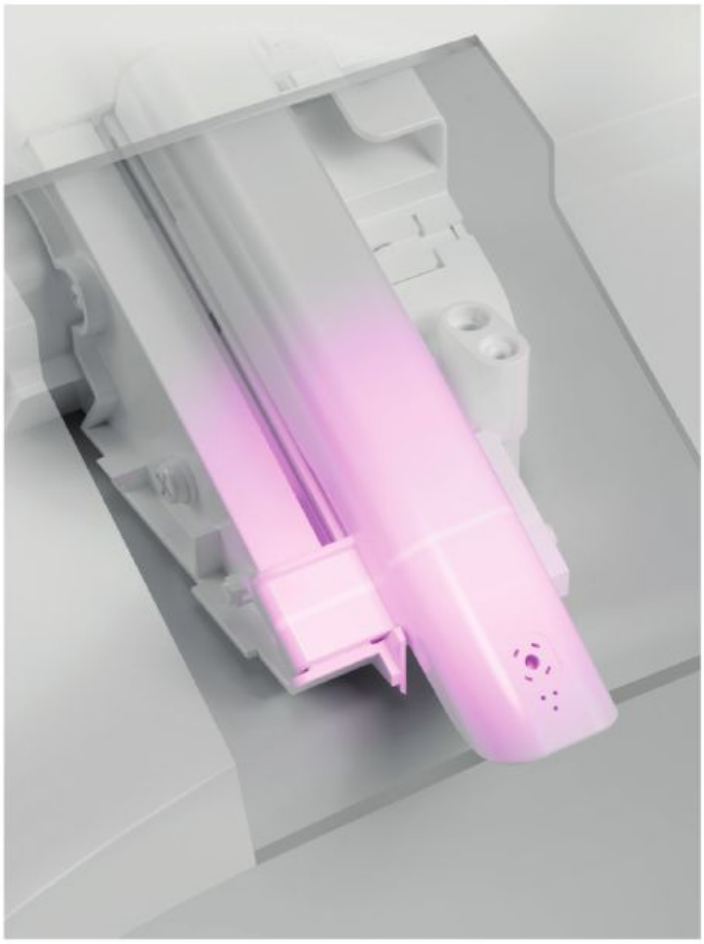

Beyond personal care, smart toilets offer cutting-edge features that ensure unparalleled bathroom hygiene and freshness to ensure a pristine bathroom with minimal effort.

Hygiene Flush
Roca's signature Hygiene Flush provides comprehensive cleaning and a subtle infusion of freshness through a dose of aromas released with each flush.

Roca Rimless® Vortex
This innovative design, which replaces the traditional rim of the toilet bowl with a smooth edge, allows water to flow around the edge of the bowl during flushing, rather than from the inside of the rim. This makes it easier to clean and more hygienic, eliminating the nooks and crannies where dirt and bacteria typically accumulate.

Hygiene Flush In-Wash® Insignia

UV Light Desinfection In-Wash® Vorea, In-Wash® Ona and Multiclean® M4

Lift & Clean In-Wash® Ona and Multiclean® M4

Self-cleaning nozzle with UV
The application of water before and after each use, supplemented by UV light, effectively removes 99.99% of bacteria. While water cleaning alone is sufficient, integrated UV light treatment ensures optimum nozzle disinfection.

Supraglaze®
An exclusive smooth Roca glazing for the bowl allows easy removal of any dirt particles and bacteria for greater hygiene.

Lift&Clean
Combined with Roca Rimless® technology, Lift&Clean makes it easy to remove all dirt particles, improving toilet hygiene and streamlining the cleaning process. The e-bidet can be partially detached, allowing the user to reach anywhere easily for cleaning.

Descaling
Designed for easy maintenance and extended performance, the descaling solution is easy to use and requires minimal effort. Conveniently accessible via Roca Connect within the alerts and application support framework.

The connected experience

Roca Connect

Roca Connect brings smart technology to the bathroom and enhances daily life. Designed as an easy-to-use extension of the remote control, the Roca Connect app allows users to effortlessly manage a myriad of functions, providing unparalleled convenience.

Users can set cleaning routines and schedule specific convenience settings, as well as customise washing and drying preferences and adjust automatic functions. In addition, users can check product status and conveniently purchase In-Wash® consumables via the app, including the Hygiene Flush liquid, which makes cleaning easier and adds hygiene to the flush, descaling agents and a deodorizing active carbon filter.

The capabilities of the IoT go far beyond managing toilet functions. Roca Connect serves as a comprehensive solution for better water management, providing real-time data and insights to optimise consumption. Through its intuitive dashboard or mobile app, users can monitor water usage, receive alerts, and predict behaviour, to ensure a sustainable approach to water use.

Whether it's setting periodic self-cleaning functions or accessing usage insights, Roca Connect empowers users to make informed decisions and actively contribute to a more sustainable future. In essence, Roca Connect embodies the convergence of technology and sustainability, transforming the bathroom experience into one that is not only convenient but also environmentally conscious.

In-Wash®

Roca's new generation of In-Wash® smart toilets provide the utmost cleanliness, hygiene, and intimate care. They offer a range of options to suit different preferences and budgets, combining cutting-edge technology, hygiene and comfort to offer users a modern and connected bathroom experience. With intuitive elements, and exclusive Roca systems, they consistently maintain high levels of cleanliness.

The Ultimate Smart Toilet

Roca's In-Wash® Insignia is designed to provide the ultimate bathroom experience. Crafted for those who seek the pinnacle of innovation, In-Wash® Insignia sets a new standard in the digitalization of bathroom routines, combining cutting-edge technology with Roca's commitment to quality.

This high-end smart toilet boasts state-of-the-art washing and drying technology, Roca's signature In-Tank® innovation and a connected toilet experience through Roca Connect. It represents a bold leap forward in the category of smart toilets, with every aspect meticulously selected, from top-notch features to materials and coatings. In-Wash® Insignia sets the benchmark for the future of bathroom digitalisation.

Intuitively Smart

In-Wash® Vorea combines timeless elegance and cutting-edge functionality in a smart toilet that blends in beautifully in any setting. With its refined silhouette and discreet technology, it offers all the advanced features of a smart toilet – personalised washing, drying and remote control – without compromising the familiar aesthetics of a classic design.

Smart, sleek and elegant, In-Wash® Vorea is thoughtfully designed for comfort and convenience. It includes a new intuitive remote control, space-saving In-Tank® system and precision features, including rear washing with Airtech technology and Coanda effect drying.

In-Wash® Vorea

DESIGN AWARD 2026

In-Wash® Vorea at a glance

Rear and Front Wash
A fully personalised rear and front wash with an instant water heater. Airtech technology combines air and water for greater hygiene.

Coanda Effect Dryer
The nozzle design follows this principle, ensuring that airflow is directed to the required area for optimum drying results at any power level.

In-Tank®
The built-in tank maximises space, while maintaining a balance of aesthetics and functionality.*

Intuitive Remote Control and Emergency Button
The new remote control provides easy access to key functions, allowing users to adjust every parameter. A side button provides quick control of essential actions.

Roca Connect
Extending the capabilities of the remote control, Roca Connect allows users to personalise functions, schedule maintenance and manage cleaning, among other things.

Self-Cleaning Nozzle with UV Light
The nozzle is cleaned with water before and after each use, complemented with UV light to ensure that 99.99% of bacteria are removed.

Roca Rimless® Vortex
A specially designed bowl optimises water flow for quiet flushing and improved cleaning performance.*

Heated Seat
Carefully balanced heat ensures a comfortable experience, adjustable via the remote control or Roca Connect app.

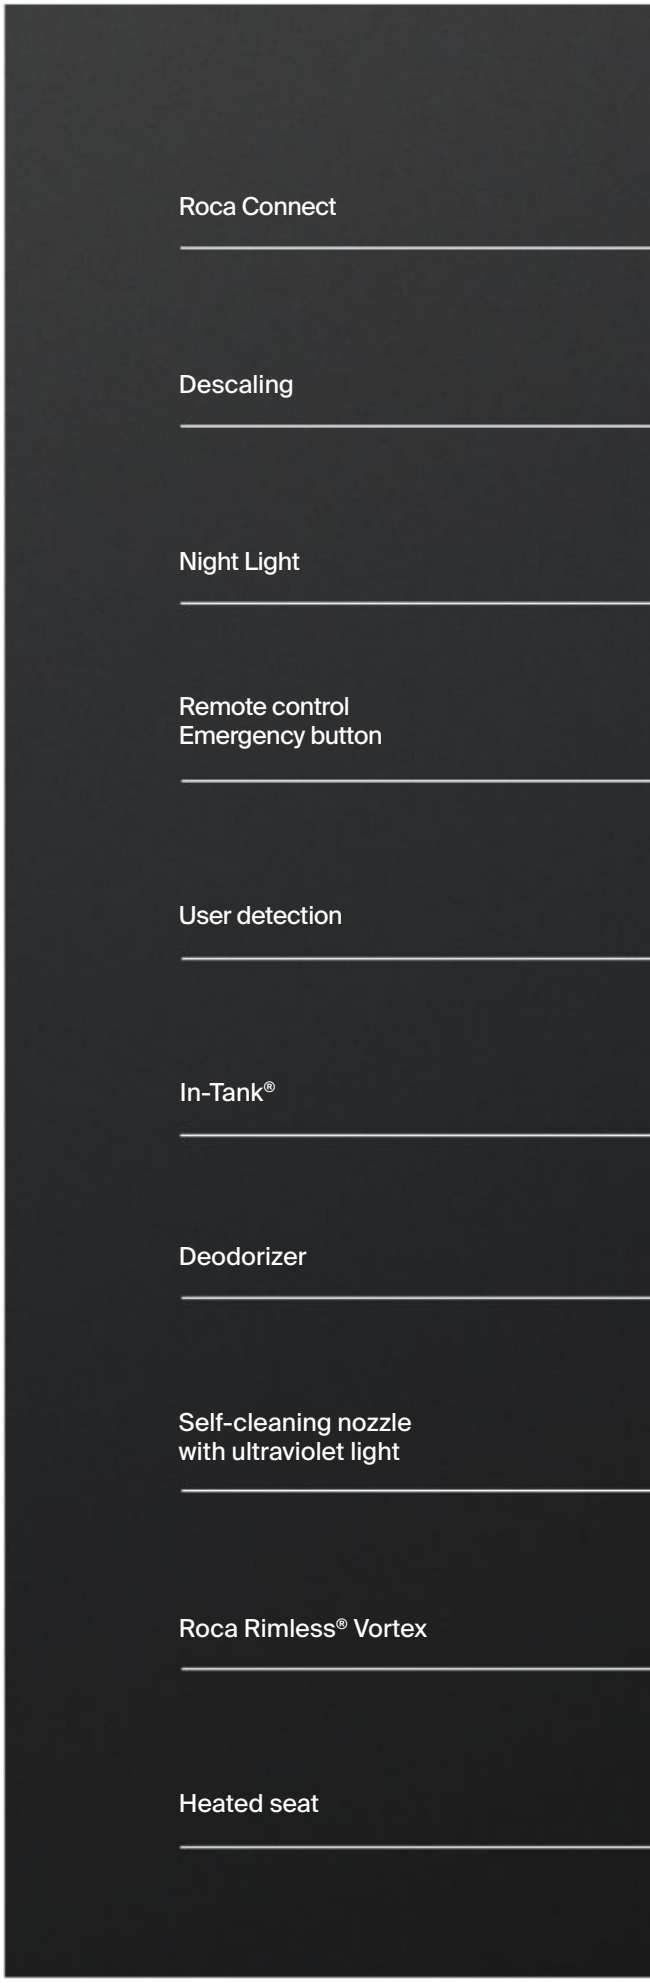

User Detection
Built-in sensor activate only when a user is detected, enabling automatic flushing, deodorisation and night lighting.

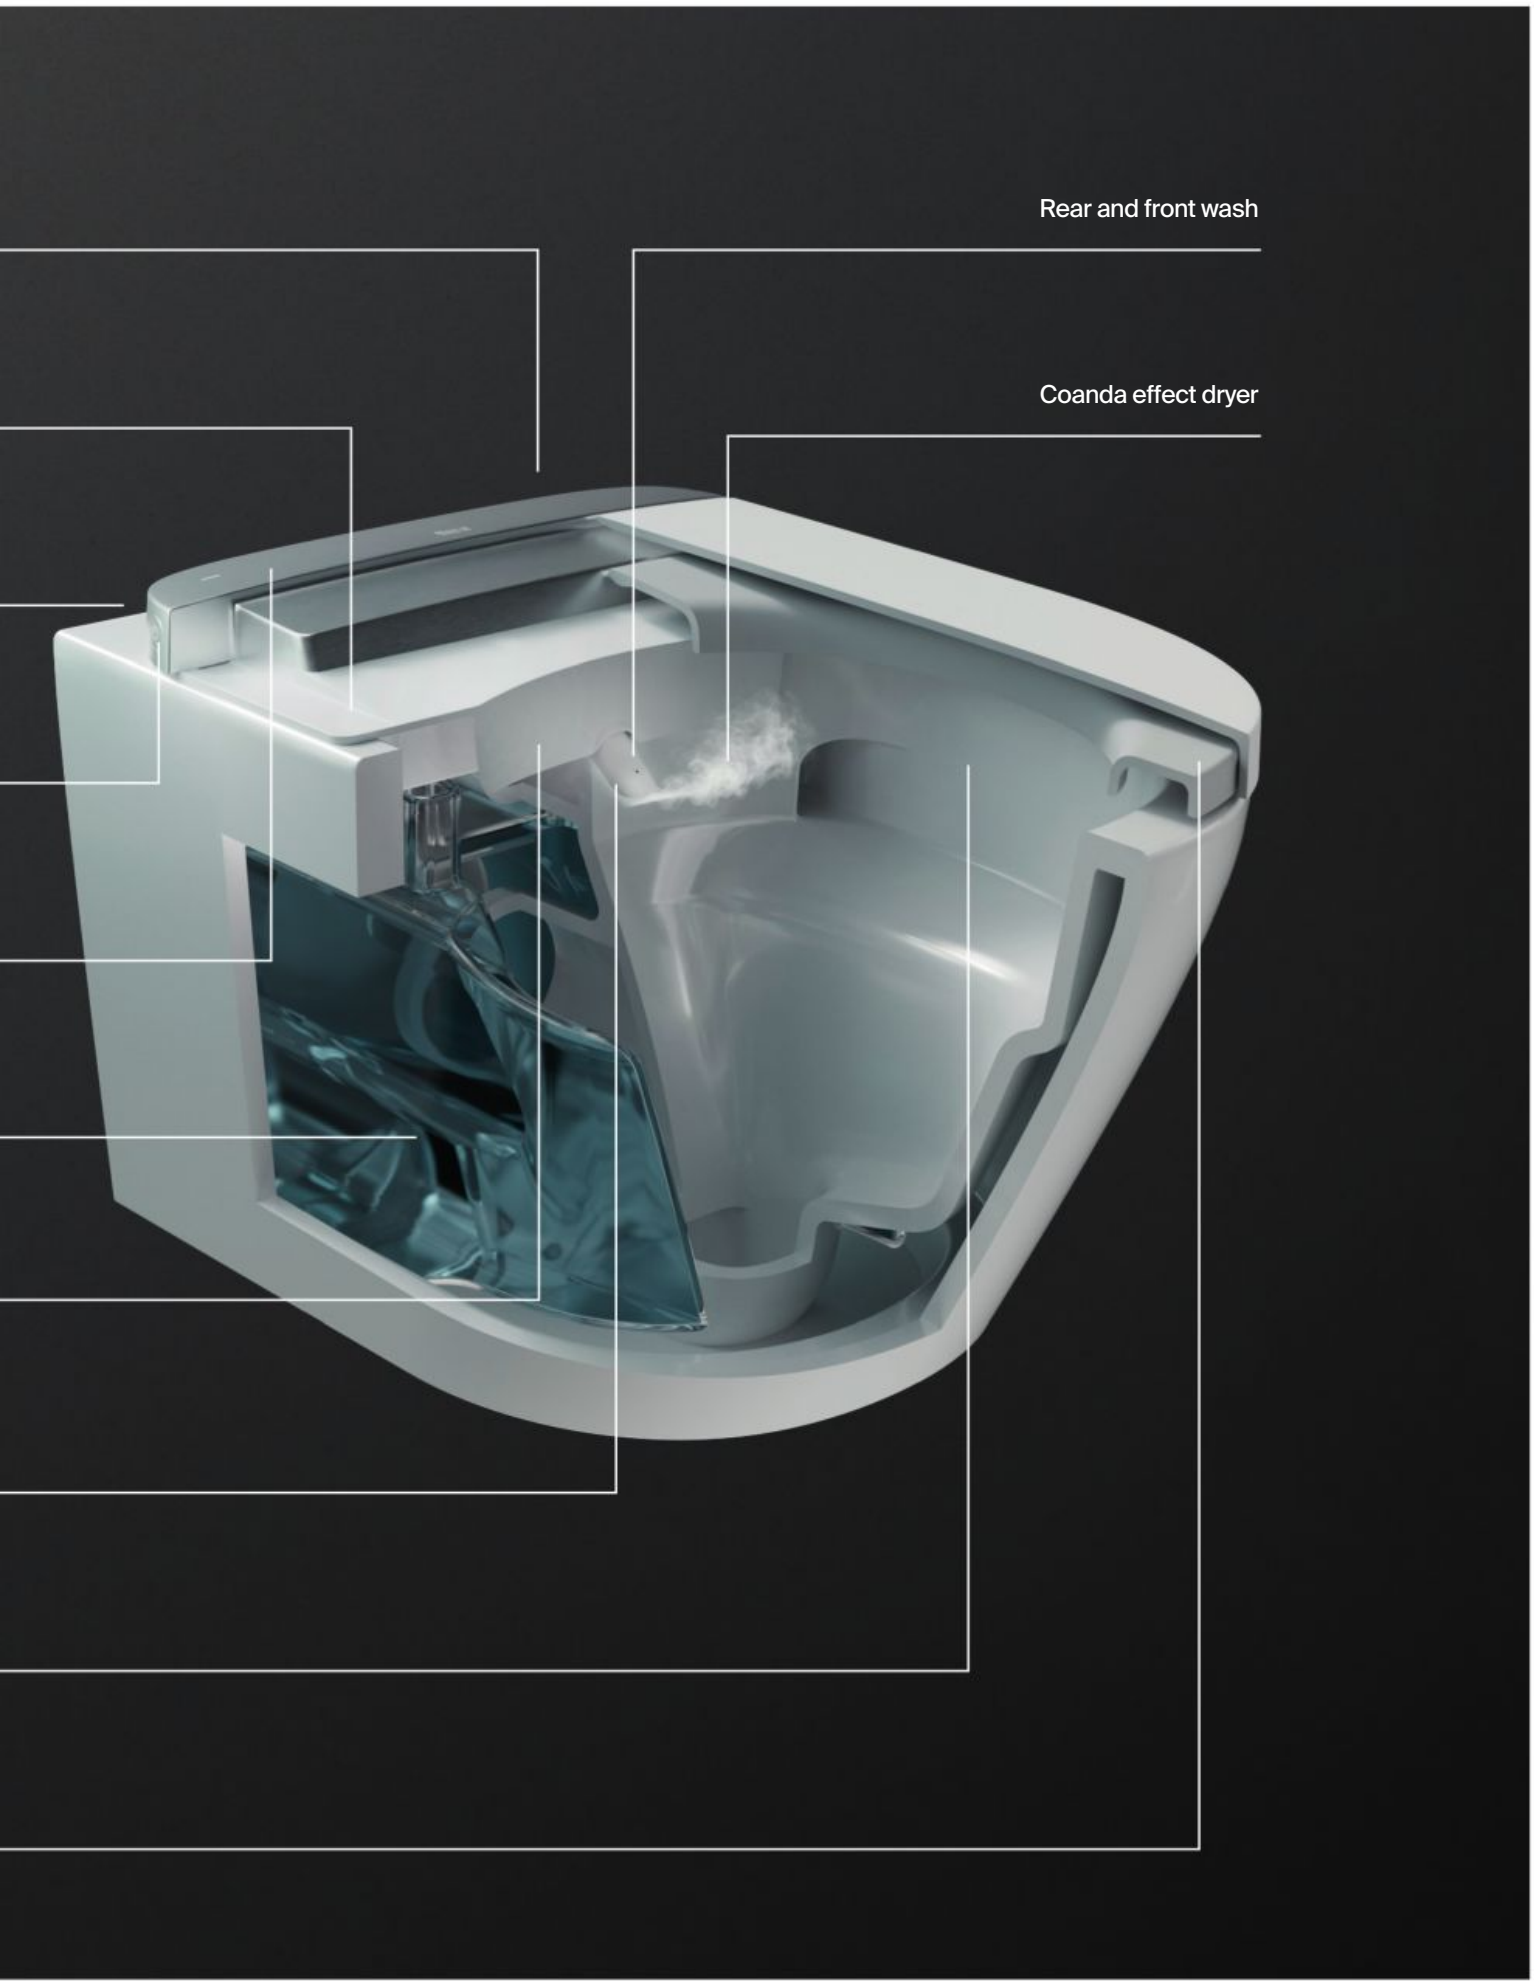

Deodorizer
A high-performance active carbon filter efficiently eliminates unwanted odours.

Night Light
Soft lighting guides the user in the dark.

Descaling
An easy descaling process ensures long-term performance.

Multiclean®
M- Series

Integrating seamlessly with most of Roca's existing toilets, the Multiclean® M-Series offers a new level of comfort and cleanliness with advanced cleaning capabilities and smart technology. Designed with aesthetics and user needs in mind, the Multiclean® seats allow households of all types to enjoy the benefits of shower toilets or smart toilets with upgrades that transform the traditional toilet experience into something much more sophisticated.

Today's Technology, for Everyone

The Multiclean® M4 harnesses the power of technology to transform a standard toilet into a smart one. With its sleek design and IoT, this fully configurable smart toilet offers state-of-the-art washing and drying technology, as well as various features that enhance comfort and simplify cleaning and maintenance.

Multiclean® M4

Cleaning in total comfort

The Multiclean® M3 enhances bathroom comfort and hygiene with its easy installation and elegant design. Featuring rear and front washing with warm water at 37°C, it transforms a regular toilet into a hot water shower toilet; a simple and seamless addition that puts comfort within reach of many.

Multiclean® M3

The simple and hassle-free solution

The Multiclean® M1 is the simplest solution with the easiest installation. With both rear and front washing options, it offers a simple way to convert a conventional toilet into a shower toilet without the need for a power source. A durable and affordable upgrade for any household.

Barcelona
Since 1917
78 Production facilities
5 Continents
20,000 People
170 Markets

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings in Barcelona in 1917, we have grown into a global benchmark in sanitaryware. Roca is now one of the largest producers of bathroom products on the planet, operating 76 production facilities across five continents, employing over 21,000 people and serving over 170 markets.

Our proposals are characterised by Mediterranean-inspired aesthetics, a diverse range that can be adapted to any space, and the inclusion of water and energy-saving solutions. This is complemented by the latest technological advances in connectivity, safety and comfort, as well as new materials and finishes.

Our commitment to the planet extends into the social field. We are serious about our responsibility towards our employees and the communities we serve, aiming to improve people's lives both within and outside the company. To achieve this, we carry out a wide range of activities around the world to stay in close contact with our valued customers and users. Two of the most popular and widely recognised international initiatives are the Roca One Day Design Challenge competition, which encourages and showcases the skills of up-and-coming creatives, and our network of Roca Galleries. These galleries host events and exhibitions that allow us to maintain an ongoing conversation with the community. We recently opened a new location in São Paulo, the first Roca Gallery in the Americas. The rocagallery.com platform further encourages reflection and discussion by presenting monographic themes with contributions from esteemed writers.

As a global company, we are present at events of international importance, sharing the values of innovation, sustainability, teamwork, and looking to the future. In 2024, we look forward to our participation in the Salone del Mobile in Milan a global event for exploring new trends in architecture and design. We will also be present at the sector's leading trade fairs, including Expo Revestir in São Paulo, KBC in Shanghai, and BDNY in New York. In the world of sport, we will once again be an official sponsor at the Shanghai Tennis Masters and will be involved with Alinghi Red Bull Racing in the 37th edition of the America's Cup in Barcelona.

We make people live the best bathroom experience

Our Planet
Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That's why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home — whether our own or the planet we all share — should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

EcoDesign

Eco-designing for efficiency and circularity: fostering products that are built to last, repairable, and recyclable.

We create long-lasting products with easy-to-replace parts, ensuring extended usability and reducing waste.

Our Life Cycle Assessments (LCA) and Environmental Product Declarations (EPD) provide transparency on our products' environmental footprint.

We design products for easy disassembly and recyclability, such as 100% recyclable shower enclosures, fostering responsible waste management.

Our innovative technologies reduce water and energy consumption, supporting sustainable building certifications such as LEED and BREEAM.

Responsible Production

Preserving natural resources goes beyond using water efficiently. It begins with sustainable production.

We are moving towards emission-free factories with pioneering technologies, including the world's first electric tunnel kiln for sanitary ceramics, aiming for net-zero emissions by 2045.

We rely on renewable energy sources, including Power Purchase Agreements (PPAs) and on-site photovoltaic panels, to minimize our carbon footprint.

Our water neutrality roadmap focuses on reducing, reusing, and recycling water to minimize freshwater consumption.

We reintegrate manufacturing byproducts like chamotte and brass swarf into our production and promote waste reuse across industries to minimize landfill waste.

Commitment to society

Enhancing people's lives and building a healthier, more inclusive, and sustainable future.

We develop solutions for people with functional diversity, reduced mobility, and special needs to ensure comfort, independence and dignity.

Our products and services are designed to promote wellbeing, self-care, and a healthier lifestyle.

Through the We Are Water Foundation, we strive to improve access to clean water and sanitation for those in need.

Through Roca Galleries, we promote global dialog that inspires sustainable design, architecture, and urban planning.

Protecting our home means safeguarding our people and our planet

Our EcoVadis Platinum Medal for outstanding sustainability performance places Roca Group among the top 1% of over 150,000 companies assessed globally.

We are committed to taking action for the Sustainable Development Goals as proud members of the United Nations Global Compact.

Many of our products are registered with the Unified Water Label scheme. This scheme identifies water-saving products that, when installed and used correctly, will use less water, saving energy and money. The Water Label is used across Europe for most bathroom products.

For WCs, the Unified Water Label assesses water efficiency based on the average flush volume. For dual flush systems, the average is calculated from one full flush and three reduced flushes. The rating system ranges from an average flush volume of 3.50 litres or less (Band 1), to a flush volume of more than 6 litres (Band 5).

For more information and complete details on water flow rates and classification, please visit www.uwla.eu.
