Pure Water, Pure Planet

Roca Aquafy offers pure, better tasting drinking water, conserving our planet's precious resources.

Its innovative 5-stage filtration system effectively removes impurities, limescale and chlorine to improve water quality and taste, contributing to a healthier planet and a more sustainable way of life.

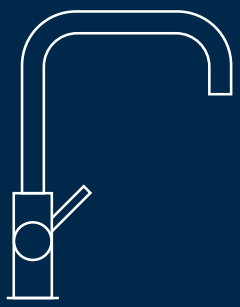

The Real Impact

Installing Roca Aquafy significantly reduces the need for disposable plastic bottles, helping to prevent plastic pollution in landfills and oceans, and reducing your personal impact on climate change.

1,200 L
Filter Capacity

One Roca Aquafy filter can filter up to 1,200 litres of water.

912 L
Drinking Water

A person consumes approximately 912 litres of drinking water per year.(1)

800
Plastic Bottles

This is equivalent to about 800 plastic water bottles per year.(2)

(1) Annual consumption figures are based on the Adequate Intake (AI) of 2.5 L/day for adult males established by the EFSA Panel on Dietetic Products, Nutrition and Allergies (2010) in the Scientific Opinion on Dietary Reference Values for water.
(2) Gleick, P. H., & Cooley, H. S. (2009), Energy implications of bottled water, Environmental Research Letters.

200
CO_2 Kilograms

Producing this amount of bottled water generates approximately 200 kg of CO_2, the equivalent of driving 1,250 km in a car.(3)

6.5 L
Water Wasted

It takes 6.5 litres of water to produce a 1.5 litre bottle, resulting in significant waste.(4)

1 Filter
Zero Waste

With 1 Roca Aquafy filter, a person can use the same amount of water per year without wasting it and still have 287.5 litres left over for the following year.

(3) CO2 emissions based on PET Life Cycle Assessments (Gleick, P. H., & Cooley, H. S. (2009) 'Energy implications of bottled water' (Environmental Research Letters)).
(4) Industrial water footprint for PET bottle manufacturing based on data from the Water Footprint Network and the Pacific Institute.

Reduce Plastic

Installing Roca Aquafy significantly reduces the need for single-use plastic bottles. This in turn helps to reduce the accumulation of plastic pollution in landfills and oceans, as well as reducing one's individual impact on climate change.

Save Energy

It takes a lot of energy to manufacture, transport and recycle plastic bottles, all of which contribute to greenhouse gas emissions and environmental damage. The installation of Roca Aquafy reduces energy consumption and contributes to environmental responsibility.

Conserve Water

Roca Aquafy's innovative 5-stage filter is a highly efficient technology that ensures all 1,200 litres of filtered water can be enjoyed, without wasting a single drop.

A Better Way of Drinking Water

With its sleek design and cutting-edge technology, Roca Aquafy enhances everyday life and integrates seamlessly into any modern kitchen. It provides easy access to fresh filtered water whenever needed.

Roca Aquafy offers a thoughtful blend of practicality and innovation, redefining the way water is enjoyed at home. With advanced filtration technology and seamless functionality, this collection brings convenience and sustainability to the heart of the kitchen.

Pure, Clean Water

Roca Aquafy has redefined water filtration. By removing chlorine, microplastics, bacteria, viruses and heavy metals, it ensures that every sip is clean, safe and delicious - just as nature intended.

Direct Convenience

Say goodbye to the hassle of carrying heavy water bottles or worrying about refills. Enjoy fresh, filtered water straight from the faucet with Roca Aquafy, effortlessly and instantly.

Save More Than Money

The innovative 5-stage filter not only eliminates the need to buy bottled water, it also protects kitchen appliances from mineral buildup, prolonging their life. An investment that pays off with every drop.

Made for Every Kitchen

Available in a variety of models and finishes, Roca Aquafy faucets cater to different lifestyles and kitchen layouts, ensuring the perfect match for any space and personal preference.

Roca's 5-Stage Filter

Raising the Bar for Water Filtration

Roca Aquafy redefines water filtration with the perfect blend of convenience, efficiency and cutting-edge technology in one elegant solution. The advanced filter integrates multiple filtration processes into a single compact unit, offering unparalleled performance while saving valuable space in the kitchen.

Exclusively developed by Roca

Filter Capacity: 1,200 litres

Durability: 6 - 12 months

5 Fine Filtration

The fine filter removes even the tiniest particles, including any remaining carbon granules.

4 Activated Carbon Block Filtration

The activated carbon block filtration effectively eliminates impurities such as colour, odour, residual chlorine, humus, and volatile organic compounds (VOCs), while also preventing bacterial growth.

3 Membrane Filtration

Eliminates particles, bacteria, viruses and heavy metals.

2 Sediment Filtration

Solid impurities, including suspended solids, sediment, rust and other particles, are completely removed. This ensures cleaner, clearer water.

1 High-Performance Ionic Exchanger

Effectively softens water, improving the taste of drinking water and beverages made with it. It also protects coffee machines and kettles from limescale build up, thus prolonging their life.

Purely Practical

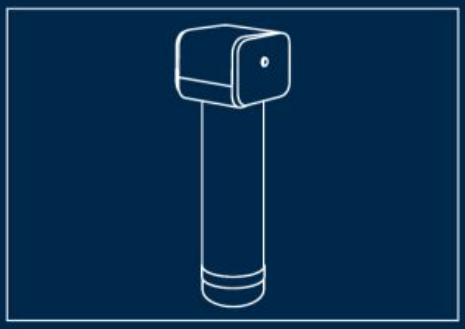

The Roca Starter Kit includes everything needed to easily install Roca Aquafy for the first time. With clear instructions and a focus on practicality, users are introduced to a new way of consuming healthier and cleaner water.

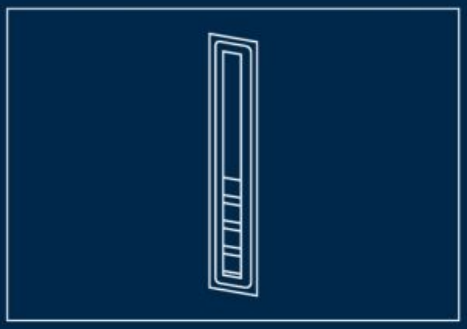

What Does the Starter Kit Contain?

1. Roca Aquafy's chosen faucet.

2. Roca's innovative 5-stage filter, head, flow meter and power supply.

3. Water hardness paper test that recommends the interval of days/litres needed to change the filter.

How to Install the 5-Stage Filter?

The convenience of having a single system that includes filtered water is a real game changer for any kitchen. Although easy to install, Roca recommends that you have the Roca Aquafy installed by one of their certified professionals to ensure perfect operation.

Its user-friendly design includes a small built-in device that allows you to programme how you want the system to remind you to chane the filter (by days or litres).

Easy Step-by-Step Filter Change Guide

1. Rotate 90 degrees the old filter to disassemble.

2. Remove the lid from new filter and assemble it to the head (rotating 90 degrees).

3. The faucet is now ready for a new water filtration cycle.

5 year warranty. Please refer to the technical document for further and more detailed information on replacements.

Faucet Collection

Roca Aquafy faucet collection combines modern design, functionality and innovation to enhance the kitchen experience. Each faucet is crafted with precision and offers a balance of style and smart features.

The Roca Aquafy faucet collection redefines the interaction with the kitchen space.

One Faucet, Two Functions

For greater efficiency and convenience in the kitchen, this faucet has two handles, delivering both filtered and tap water with a simple twist.

Dual Outlet

The dual outlet faucet provides easy access to both filtered and tap water from one source. With one handle, users can access filtered water - ideal for drinking and cooking - and with the other handle, they can use tap water for other everyday needs. This design keeps the water supplies separate, ensuring there is no mixing.

Convenient Height

Designed for maximum functionality, the kitchen faucet's spouts reduce splashing and provide ample space for washing up or filling bottles and pots.

Cold Start Technology

Roca Aquafy's faucets feature Cold Start, an energy-saving technology that defaults to cold water, preventing unnecessary boiler operation and reducing CO_2 emissions. This technology offers 35-45% energy savings compared to traditional faucets. The lever only turns to the left, giving the spout a sleek, perfectly aligned look when not in use.

One Faucet for Every Need

Roca dual outlet filtration faucets come in a variety of finishes and shapes to ensure there's something to suit every kitchen and every user. Functionality and style are paramount for all, while the pull-down model offers extra flexibility and convenience.

A Practical Solution

Designed as a complementary faucet, this model brings the benefits of clean, pure filtered water to any kitchen. Without the hassle of replacing an existing faucet, the single outlet filtration faucet can be installed alongside the existing setup.

Single Outlet

With its sleek chrome finish, this single outlet filtration faucet is a convenient solution. Its compact design ensures it fits seamlessly into any kitchen.

Collection Features

Visual Alert

Roca Aquafy has a light ring that glows blue when activated and conveniently changes to red when the filter needs to be replaced. This indicator ensures optimal water quality and filtration performance.

Direct Convenience

The dual outlet filtration faucet eliminates the need for multiple faucets, saving space and streamlining kitchen design. This model offers the convenience of switching between filtered and tap water without ever mixing the two.

Explore the distinctive features of Roca Aquafy — from the choice of materials to the latest Roca technology — all designed to provide a comfortable and seamless experience. These features make each piece in the collection the best upgrade for any kitchen environment.

Durability

Made from high-quality stainless steel, renowned for its exceptional resistance to corrosion, tarnishing and scratching This ensures a long-lasting, immaculate appearance.
Its non-porous surface also promotes hygiene by inhibiting bacterial growth.

Easy Installation

Roca's filtration system is thoughtfully designed to provide a hassle-free experience. Roca Aquafy fits effortless under any standard cabinet, eliminating the need for major kitchen alterations. Cartridge replacement is quick and easy, and requires no external assistance.

Our Planet
Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That's why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home - whether our own or the planet we all share - should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

Our EcoVadis Platinum Medal for outstanding sustainability performance places Roca Group among the top 1% of over 150,000 companies assessed globally.

We are committed to taking action for the Sustainable Development Goals as proud members of the United Nations Global Compact.

Many of our products are registered with the Unified Water Label scheme. This scheme identifies water-saving products that, when installed and used correctly, will use less water, saving energy and money.

The Water Label is used across Europe for most bathroom products.

Throughout our brochure, we have highlighted the faucets with the best water-saving performance, marking those that are 'best in class' in terms of water efficiency. The flow rate classification is measured at 3 bar pressure. For more information and complete details on water flow rates and classification, please visit www.uwla.eu.

*Between 2018 and 2024 | **FY2024

Roca is a family-owned company dedicated to the design, manufacturing, and sale of bathroom solutions for architecture, construction, and interior design. Founded in Barcelona in 1917, it combines tradition and knowledge with a passion for innovation and respect for the environment.

With sustainability as a key element in all its processes and a commitment to ensure a better planet for future generations, Roca is present in 170 countries, operating 79 factories across the five continents with more than 20,000 employees.
