Faucets

Roca

In today’s fast-paced world, the bathroom has become more than just a functional space - it is a tranquil retreat where you can relax, recharge and reconnect with yourself. Enhancing wellbeing starts with the small yet significant details, like the faucet you use every day. Thoughtfully designed faucets and shower solutions play a key role in transforming your bathroom into a sanctuary of comfort and relaxation.

At the forefront of bathroom innovation, advanced technology is seamlessly integrated into our timeless designs to prioritise both energy and water efficiency. From basin and kitchen faucets to smart showers and solutions for public spaces, each product delivers outstanding performance, allowing you to make sustainable choices without compromising on comfort or style. Experience the perfect balance of beauty, functionality, and sustainability in every drop, elevating your daily routine into a ritual of wellbeing.

A World of Innovation

At the heart of our commitment to excellence is the Faucets Competence Centre in Basel, Switzerland, a beacon of innovation where we shape the future of bathroom design. With a passion for creating solutions that fuse form and function, we focus on developing products that not only meet tomorrow's needs, but also inspire a new era of energy efficiency, sophisticated design and exceptional performance.

In a world of rapid change, we believe in the power of continuous transformation. Our relentless commitment to advancing manufacturing technologies ensures we stay ahead of market demands. We don't just react to change, we drive it, setting new standards of quality and operational excellence.

Our focus on innovation extends to every detail, from advanced finishing techniques to sustainable, high-performance materials. Every faucet we create is a testament to our vision: to deliver products that are not only durable and reliable, but also inspiring in their beauty, functionality and environmental responsibility.

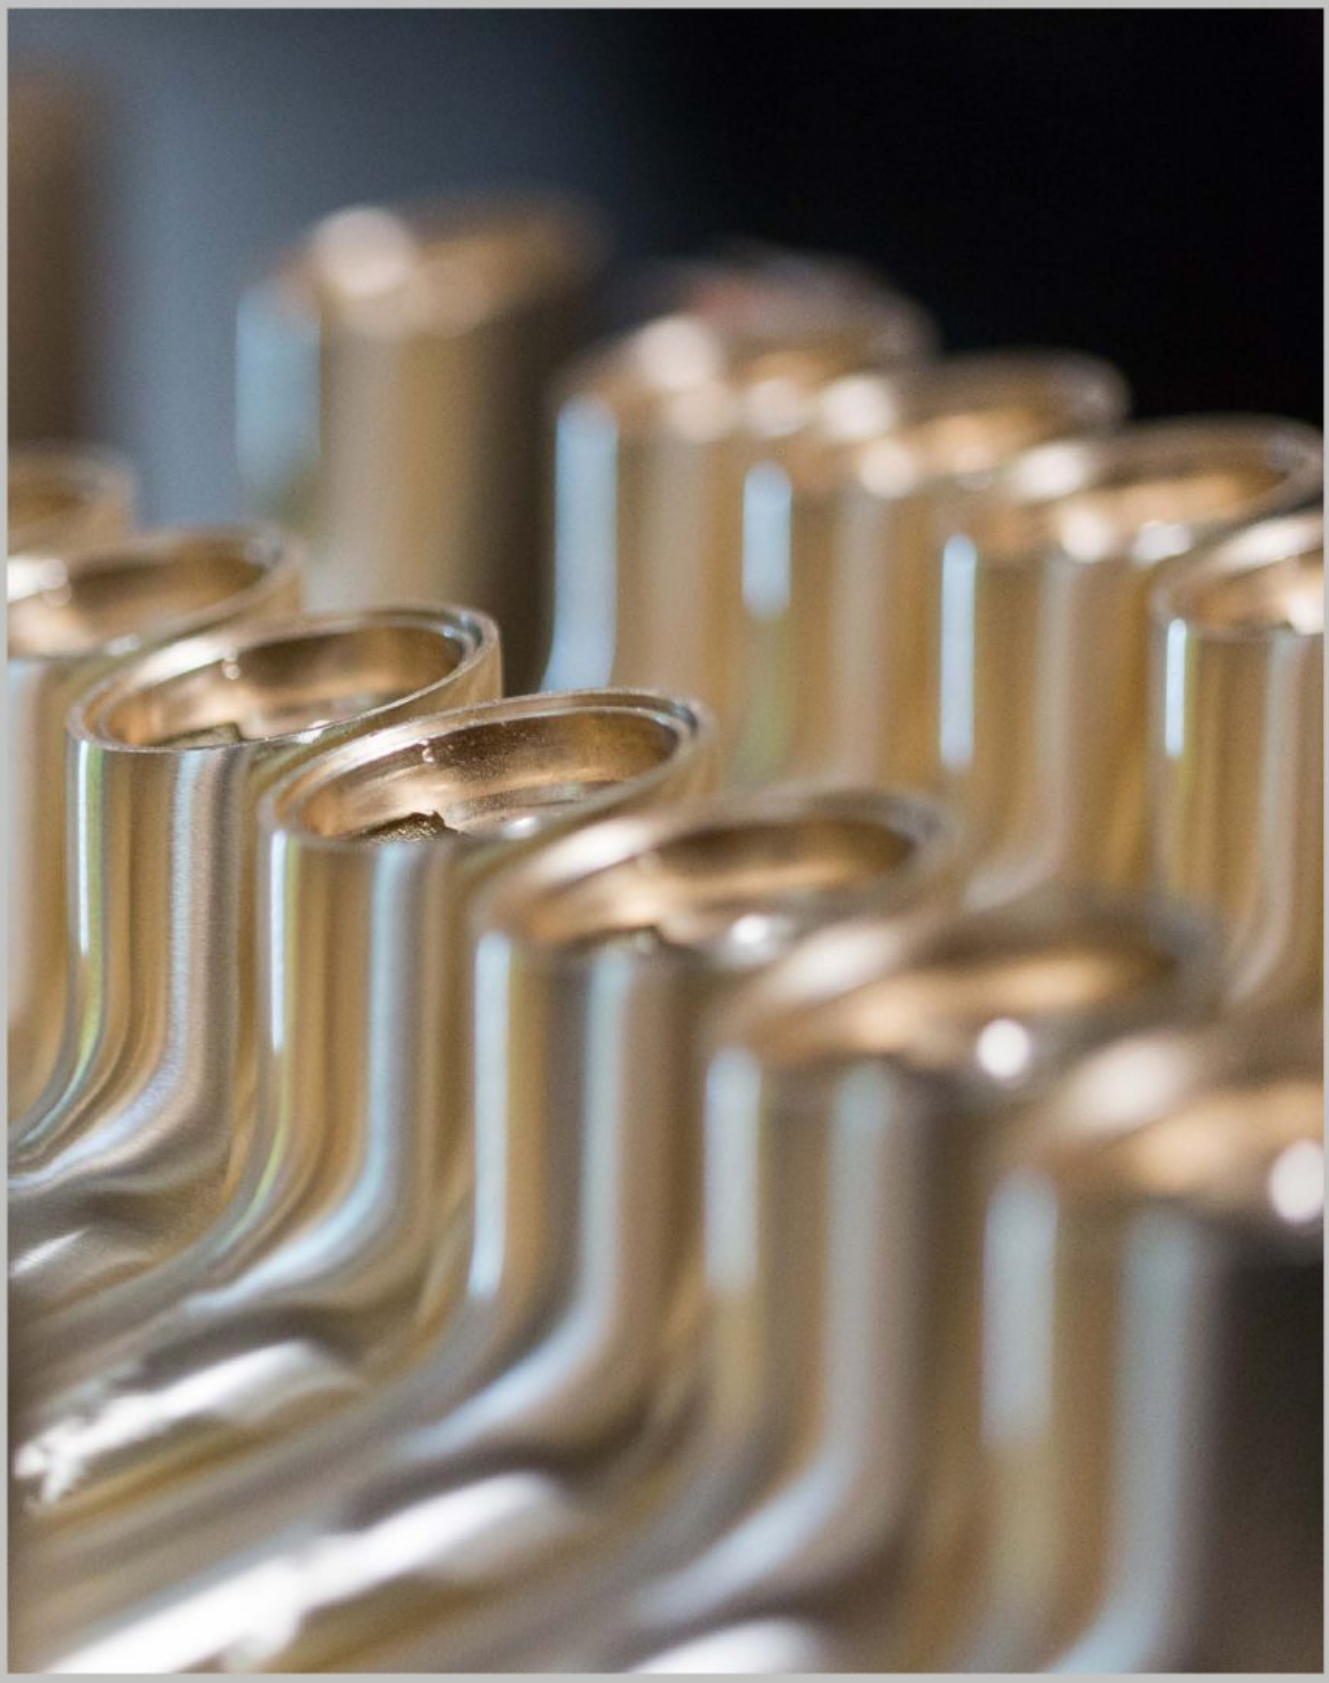

Global Capacity

We are dedicated to improving the quality of our faucets and driving excellence in every aspect of the bathroom environment. Our Faucets Competence Centre in Basel, Switzerland, is at the forefront of developing innovative solutions to meet future market demands for energy efficiency and design. By using the latest materials and advanced manufacturing technologies, we are constantly evolving our expertise and maintaining the highest standards of excellence.

Industrial Leadership and Legacy

In a rapidly changing and complex environment, continuous evaluation of processes and resources is essential. Our product range is constantly being adapted to increase agility and responsiveness to market demands. Significant investments are made each year to advance manufacturing technologies, including the automation of assembly processes and the expansion of production capacity, to ensure operational efficiency and the maintenance of high quality standards.

Advanced Finishing Technologies

With advanced finishing technologies and stringent quality standards, we combine innovative processes with a focus on durability, aesthetics and environmental responsibility across our faucet collections. Using state-of-the-art techniques like PVD (Physical Vapour Deposition), powder coating, and trivalent chrome, we offer a wide range of colour and texture options to meet modern design trends while ensuring long-lasting performance. Each finish is tested to meet stringent regulatory and internal requirements for corrosion resistance, adhesion, hardness, and colour stability, ensuring that each product delivers high performance and reliability in a variety of environments.

PVD (Physical Vapour Deposition)
PVD is a high-tech metal coating process that produces exceptionally durable, vibrant finishes. Components are pre-treated and then placed in specialised reactors where a near absolute vacuum is created. A combination of gases creates a plasma atmosphere, allowing high-voltage discharges to fuse precious metal atoms to the surface of the product. This atomic level bonding creates finishes that are visually striking and highly durable. Our PVD finishes - titanium black, brushed titanium black, rose gold, stainless steel, brushed brass, brushed copper and brushed graphite - are renowned for their hardness and resistance to corrosion and wear, making them ideal for high-traffic areas where both durability and style are essential.

Powder coating
For a wider range of colours beyond metallic tones, we use electrostatic powder coating technology. This process applies a layer of polymer with nanoparticles to improve surface durability and meet our stringent quality standards. Our powder-coated finishes include matt black, matt white and the vibrant colours from the Nu faucet collection. They are rigorously tested for adhesion, colour consistency and chemical resistance, ensuring they stand up to daily use while adding distinctive style to any space.

Trivalent Chrome
In a commitment to both quality and environmental responsibility, we have replaced the hazardous hexavalent chrome with trivalent chrome (CRIII) in our European facilities. This advanced process maintains the durability and aesthetic qualities associated with chrome finishes, while significantly reducing health risks to workers and environmental impact. Our switch to trivalent chromium demonstrates a proactive approach to safer, sustainable manufacturing practices and sets a new standard for responsible manufacturing in the industry.

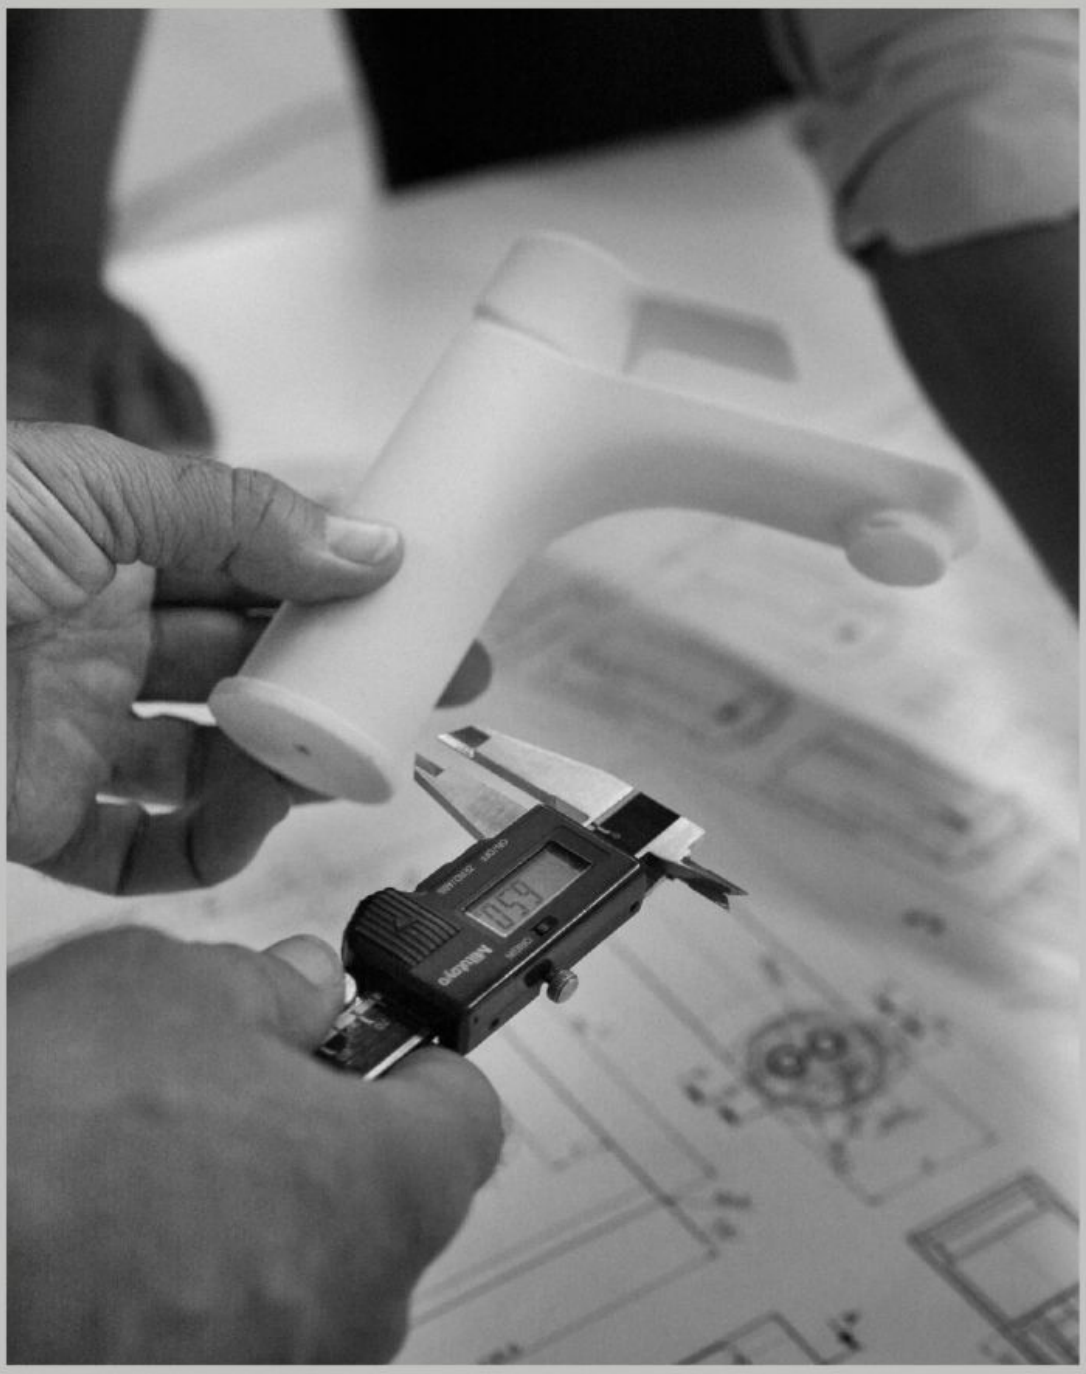

Enduring excellence

A strong commitment to our customers fuels the meticulous craftsmanship behind each of our faucets, where durability, quality and exceptional finishes set industry standards. Rigorous testing ensures that each product meets certified benchmarks, guaranteeing lasting performance and the highest quality products.

Best-in-class standards

High-quality raw materials are used to create alloys and surface coatings for our faucets and components that are widely recognised as superior to industry standards. To ensure certified quality, every faucet undergoes extensive factory testing, including contact surface studies, and sensitivity, reliability and fidelity checks, and endurance tests. With over 1,000,000 movements, our products are subjected to rigorous durability testing that exceeds EN standards, while single lever ceramic cartridges pass a 50-bar hammer test certified by NF-ECAU. The Roca Quality Standard NGC 5001 reflects global benchmarks as well as Roca's extensive market and product knowledge.

Design with purpose

Faucet performance and durability is defined by the finely tuned engineering of the internal components, with the cartridge playing a key role in managing water flow, temperature mixing and outlet selection. To meet a wide range of needs in terms of performance, ease of use and aesthetics, we've developed a number of specialised cartridges, from single-lever mixers and ceramic diverters to thermostatic and electronic cartridges. Each is designed to improve reliability, efficiency and user experience.

Our **ceramic disc cartridges**, made from alumina ceramics (Al_2O_3) using advanced manufacturing techniques, are exceptionally durable and resistant to chemicals. The diamond-hard ceramic surfaces provide smooth, quiet operation and precise water control, while tight tolerances and carefully matched surfaces ensure a consistently smooth experience every time.

For temperature accuracy, our **thermostatic wax mixer cartridges** incorporate the latest wax cup technology to provide fast, stable adjustments regardless of flow or pressure changes. These cartridges offer reliable temperature control, enhanced by safety features like anti-scald and anti-scale functions. Designed with stability, comfort, and energy efficiency in mind, our thermostatic cartridges ensure a reliable and enjoyable water experience every time.

Made to Last

Building on our commitment to improve everyday life, our faucet collections embody a fusion of innovation, design and sophistication that enhances the modern bathroom experience. With advanced technology and timeless aesthetics, these collections seamlessly integrate into any space, from residential bathrooms to public installations, meeting the diverse needs of today's consumers.

Meticulously crafted to enhance both aesthetic appeal and user interaction, basin faucets are available in a wide range of designs, heights and finishes, ensuring a perfect fit for any bathroom style. These products embody a commitment to sustainability, incorporating the Cold Start system and advanced flow limiters that significantly reduce water and energy consumption.

Comfort and safety are paramount, particularly in the shower, where personalisation options allow for precise control of flow and temperature, creating a luxurious experience. In public and semi-public environments, the focus shifts to hygiene, accessibility and efficient resource management, promoting welcoming and inclusive spaces that uphold sustainability. Made from premium materials, these faucets ensure long-lasting resistance to wear and tear, while retaining their elegance over time.

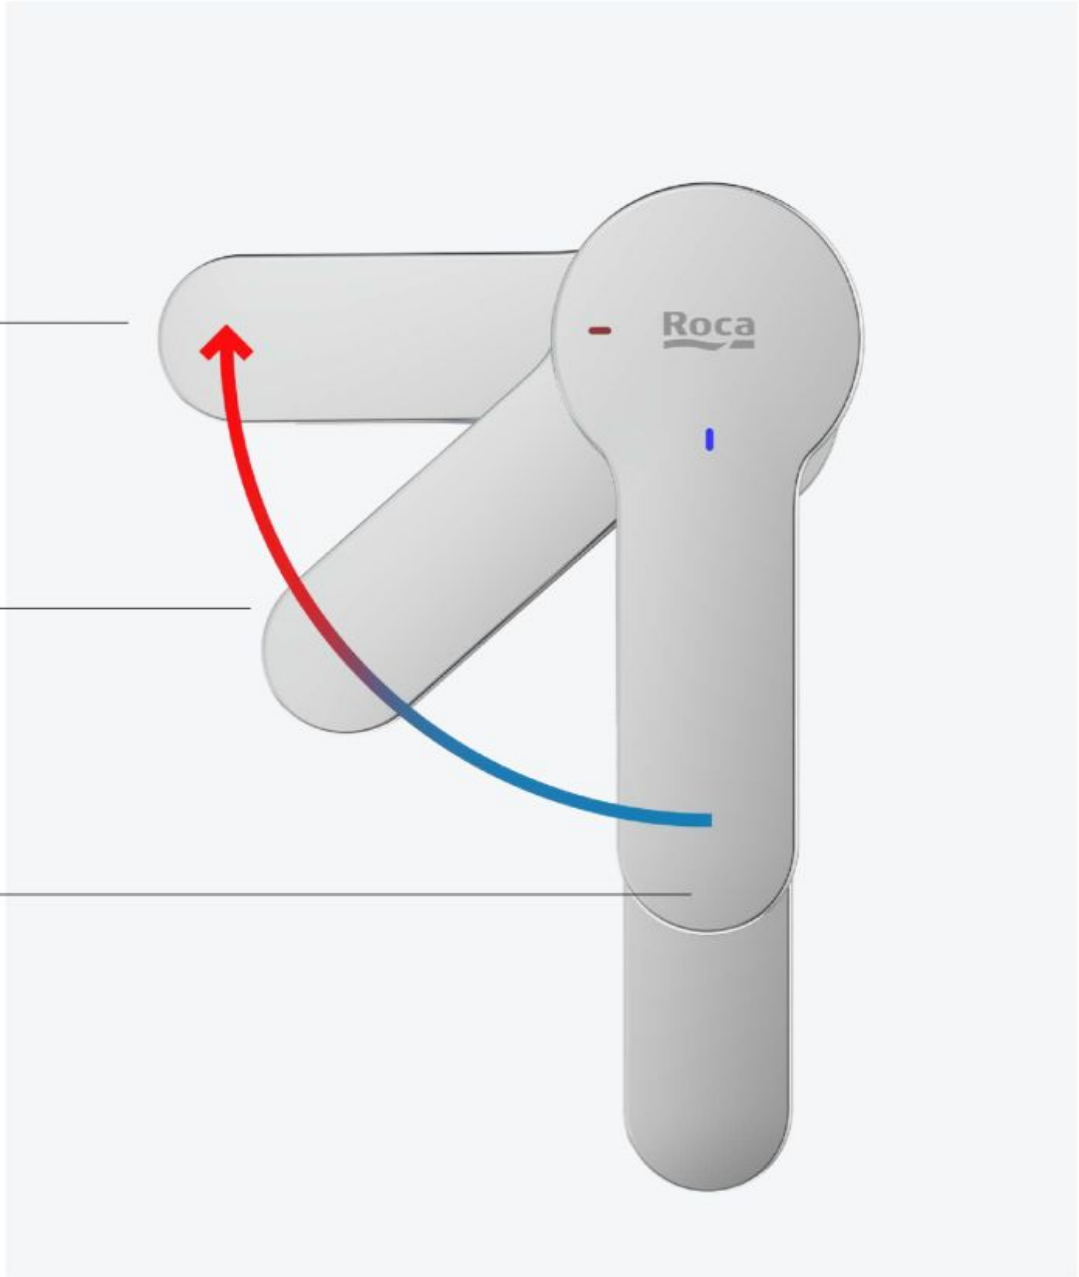

Efficient and Sustainable Living

Energy and water saving technologies are essential for improving household efficiency and reducing environmental impact. By incorporating smart features into everyday appliances, these technologies help to significantly reduce energy and water consumption, leading to lower utility bills and a more sustainable lifestyle.

Energy Saving
Cold Start technology is designed to optimise energy use by activating the boiler only when the handle is turned to the hot water position. With a centrally positioned handle that starts with cold water, hot water is gradually introduced as the handle is turned to the left.

Targa basin mixer in stainless steel finish

Water savings
The latest generation flow limiters offer significant water savings by limiting the flow to a maximum of 5 litres per minute, regardless of the pressure system.

Homogeneous flow
Aerators provide a consistent, high-quality aerated jet, even under varying pressure conditions. With anti-limescale protection, they facilitate cleaning and maintenance, ensuring optimum performance over time.

A Perfect Fit

Five sizes, endless options
When it comes to selecting the perfect faucet for your bathroom or kitchen, size matters. Faucets are available in a range of sizes, each designed to suit specific needs and spaces. From the compact and space-saving XS faucets to the grand and stylish XL faucets, there is a size to cater to every requirement and aesthetic preference.

XS-Size
Compact-sized faucets suitable for use in small spaces or for single-use purposes, such as in a cloakroom.

S-Size
Standard-sized faucets, comfortable and appropriate for most standard bathrooms.

M-Size
Medium-sized faucets, versatile and suitable for a wide range of basin sizes. Perfect balance between functionality and style, with a higher body and longer spout.

L-Size
L-Size faucets are larger than the average faucet, with side handle and high spout. Useful for washing or filling large glasses or bowls.

XL-Size
XL faucets are the largest and most stylish type of faucets available, for use with over-countertop basins.

Nu basin mixers

Nu basin mixer in chrome

Compatibility with different basins
(basin models and basin installation types)

XS-Size
Fit for over countertop basins.

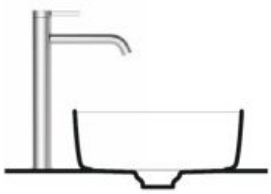

S-Size
Fit for medium / large wall-hung or countertop basins.

M-Size
Fit for standard / medium sized wall-hung or countertop basins.

L-Size
Fit for standard wall-hung, countertop or undercountertop basins.

XL-Size
Fit for compact, ultra-compact or small countertop or undercountertop basins.

Lasting Performance

Easy to clean

The durable chrome finish of Roca faucets is enhanced by the innovative EverShine electrolytic coating system. This technology ensures that the faucets retain their shine over time, making them easier to clean and maintain.

Ona Floorstanding bath-shower column in chrome

Ona basin mixer in matt black

Durability
Roca's exclusive ceramic cartridge allows for smooth and precise operation, backed by the guarantee of one million opening and closing cycles.

Comfort
Softurn technology offers exceptional control, accuracy and convenience when adjusting water flow and temperature. A noise reduction system integrated into the cartridges reduces water noise.

Premium Finishes

Premium raw materials and finishes ensure that faucets are both high quality and durable, and Roca offers a variety of aesthetic and functional solutions for bathrooms and kitchens. Advanced coatings provide exceptional durability and ease of maintenance, while a choice of matt or glossy finishes offers versatile design options that enhance the overall look and feel of any room.

Ona Basin Mixer in brushed brass

Targa basin mixers

Everlux
Sophisticated, exclusive, and fashionable coating adds distinction and uniqueness to the bathroom. This sustainable, purely physical technique does not require harmful chemicals or generate water pollution during its production process. An extra layer on top of the chrome, based on very hard metals, ensures the surface is extraordinarily resistant to scratches and cleaning products.

Evershine
A high-quality chrome outer layer ensures a lasting shine and facilitates easy cleaning. The Evershine electrolytic coating reduces limescale deposits and provides protection against corrosion and scratches.

Matt finishes
Polyester thermosetting powder coating made from polyester resins provides resistance to external agents, UV and corrosion. Matt black and white finishes offer a sleek and modern touch, creating a bold contrast or a clean, understated elegance.

Ona Basin Mixer in matt black

Nu Basin Mixer in mint green

Glossy finishes
With bold colours including regal cobalt blue, dynamic mint green, vibrant honey yellow, stylish titanium black and glossy white, as well as classic chrome, glossy finishes allow for creative expression and add a fun, contemporary flair to any bathroom.

Comfort and Protection

As comfort and safety in the bathroom are paramount, advanced technologies are designed to enhance the showering experience. Advanced thermostatic mixers offer precise water temperature control, quickly reaching and maintaining the ideal temperature, while special technology minimises the risk of scalding from hot water or surfaces. These innovations ensure a comfortable, safe and enjoyable shower.

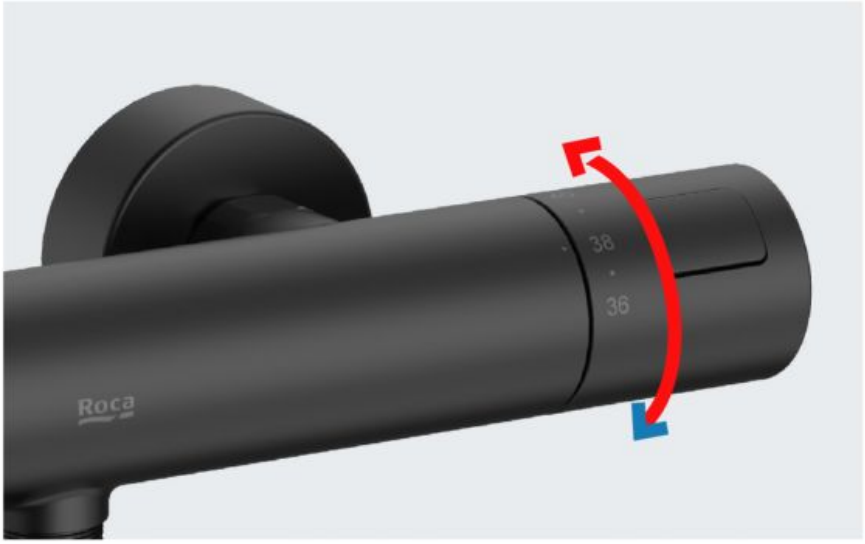

SafeTouch®
SafeTouch® technology ensures that the surface of thermostatic faucets remains cool to the touch, even when the water is hot. This clever design eliminates the risk of burns and adds an extra layer of safety, making every shower experience both comfortable and safe.

Thermostatic Shower Column Index-T Switch

Safety 38° Thermostatic T-2000 mixer

Quick Reaction Thermostatic T-500 mixer

Safe temperature
The Safety 38° system features a safety mechanism that prevents the water temperature from exceeding 38°C. This feature built into Roca's thermostatic mixers ensures a safe and comfortable experience, avoiding the possibility of scalding and providing peace of mind.

Instant Comfort
Quick Reaction technology ensures that thermostatic mixers reach the perfect water temperature in less than 3 seconds. Once the desired temperature is reached, it is maintained consistently, providing a stable and enjoyable shower experience with no fluctuations.

The Ultimate Shower Experience

To enhance the shower experience, Roca offers a wide range of handshower models, each with water jet options that can be customised to suit individual preferences. From a gentle mist to a powerful spray, these features ensure the perfect balance of water flow and pressure, complete with anti-limescale treatment for easy maintenance.

Effortless maintenance
Handshowers feature anti-limescale systems designed to easily prevent and remove limescale build-up. Incorporating soft materials into the jets, these systems ensure effective maintenance, increasing the durability and performance of the handshower over time.

Raindream shower head, rain function

Plenum Shower Kit, 3 functions

Sensory experience
Modern shower systems are designed to offer a range of comforting and revitalising sensations through different water jet options.

Rain
Fine jets of water gently cover the body, creating a soothing, relaxing sensation.

Tonic
Intermittent jets form a bubble-like effect, enveloping the body in luxurious comfort.

Pulse
Intense, pulsating jets provide a refreshing and invigorating massage.

Micro-Bubble
Soft micro-bubbles deep cleanse the skin deeply, ideal for face washing and gentle care.

Solutions for public spaces

Roca offers a range of innovative solutions for public spaces that focus on hygiene, water efficiency and accessibility. From self-closing faucets that conserve water to timed models that ensure precise flow control, these products are designed to withstand intensive use while reducing water waste. Additionally, ergonomic options ensure comfort and ease of use for individuals with reduced mobility.

Automatic shut-off
Self-closing faucets are designed for maximum convenience and efficiency. Intuitive and easy to use, these faucets are operated by pressing the control button to start the water flow, which stops automatically after a short time. This solution helps to save water and reduce costs.

Electronic basin faucet L20-E

Electronic basin faucet Loft-E

Accessible Design

Designed for people with reduced mobility, the Access collection combines ergonomic design with versatility and elegance. Crafted with a focus on quality, functionality and comfort, these faucets feature larger levers for easier use.

Basin Area

Roca faucets combine functionality with stylish design to complement any bathroom. Featuring cutting-edge technology for improved water and energy efficiency, convenience and comfort, they transform any bathroom experience. With an extensive range of models from modern to traditional styles, there’s a perfect fitting to suit every taste.

Sustainability and safety are integrated into every faucet

Key Benefits

Durability. Exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

Water savings. Latest generation of flow limiters to 5 L/min, regardless of the pressure.

Homogeneous flow. Aerators with excellent aerated jet quality, even under complex pressure conditions. They come with anti-limescale protection for easy cleaning and maintenance.

Range. Four heights for basin faucets (S, M, L, and XL in one piece) to provide greater user-friendliness.

Acoustic control. Sound reduction system integrated in the cartridges and faucets to limit the noise of the water.

Particle filter. Protective filters included in the aerators that stop any particles coming through from the mains.

Energy savings. Cold water frontal opening that avoids unnecessary energy use, providing up to 45% more energy savings than conventional faucets.

Finishes

Everlux

Sophisticated, exclusive, and fashionable coating affords distinction and uniqueness to the bathroom. This sustainable, purely physical technique does not require harmful chemicals or generate water pollution during its production process. An extra layer on top of the chrome, based on very hard metals, ensures the surface is extraordinarily resistant to scratches and cleaning products.

Evershine

A high-quality chrome outer layer guarantees a permanent shine and makes cleaning easier.

Matt finishes

Polyester thermosetting powder coating based on polyester resins, resistant to external agents, UV radiation and corrosion.

Insignia

Featuring an ergonomic design with organic lines and a slim side handle, Insignia's elegant finishes add a touch of sophistication to the bathroom.

Kay

The Kay collection is an exploration of presence. Striking a balance between strength and precision, it redefines the squarish faucet with clarity. Designed to be both sculptural and functional, Kay embodies a reduced yet confident aesthetic, seamlessly integrating into contemporary spaces.

Kay's flat front surface and semi-circular body create a distinct geometric contrast, bringing sharpness and softness into balance. The straight, carefully measured spout ensures an evenly, controlled water flow, while the sculpted body creates fluid transitions that feel natural to the touch. Crafted from cast brass, it achieves both durability and a sculptural presence, reinforcing its refined yet robust character. Available in six curated finishes and cold-water start, Kay adapts effortlessly to any contemporary architectural context.

Nu

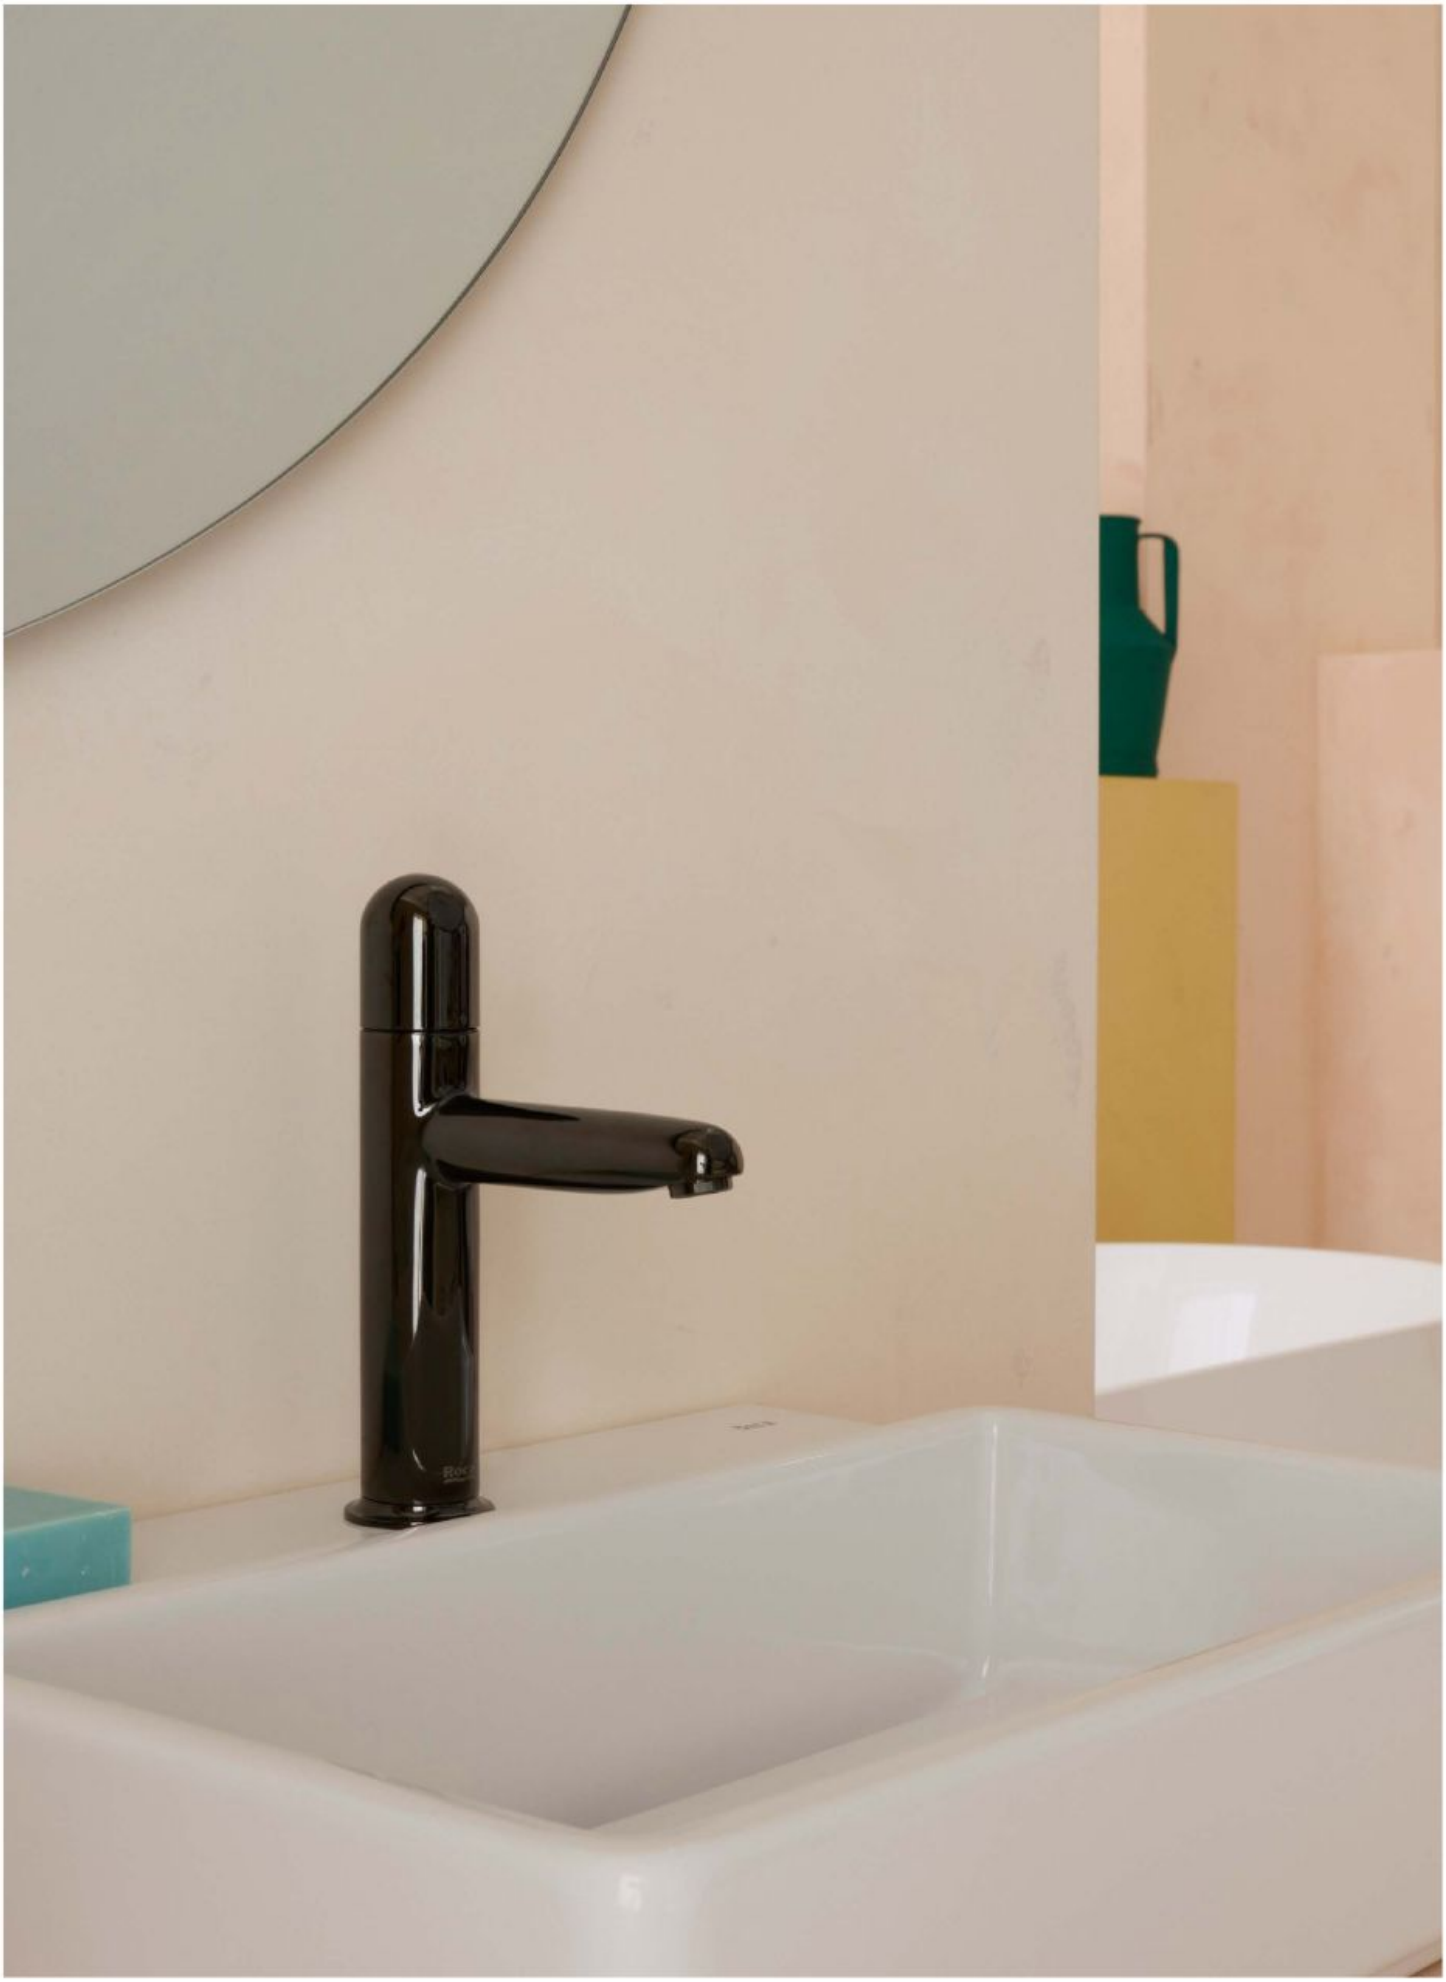

The Nu collection represents a pure visual expression and a synthesis of essential design: form, shape and colour. Derived from the French word ‘Nu’ meaning naked, this collection distils design to its most fundamental essense, presenting a timeless simplicity.

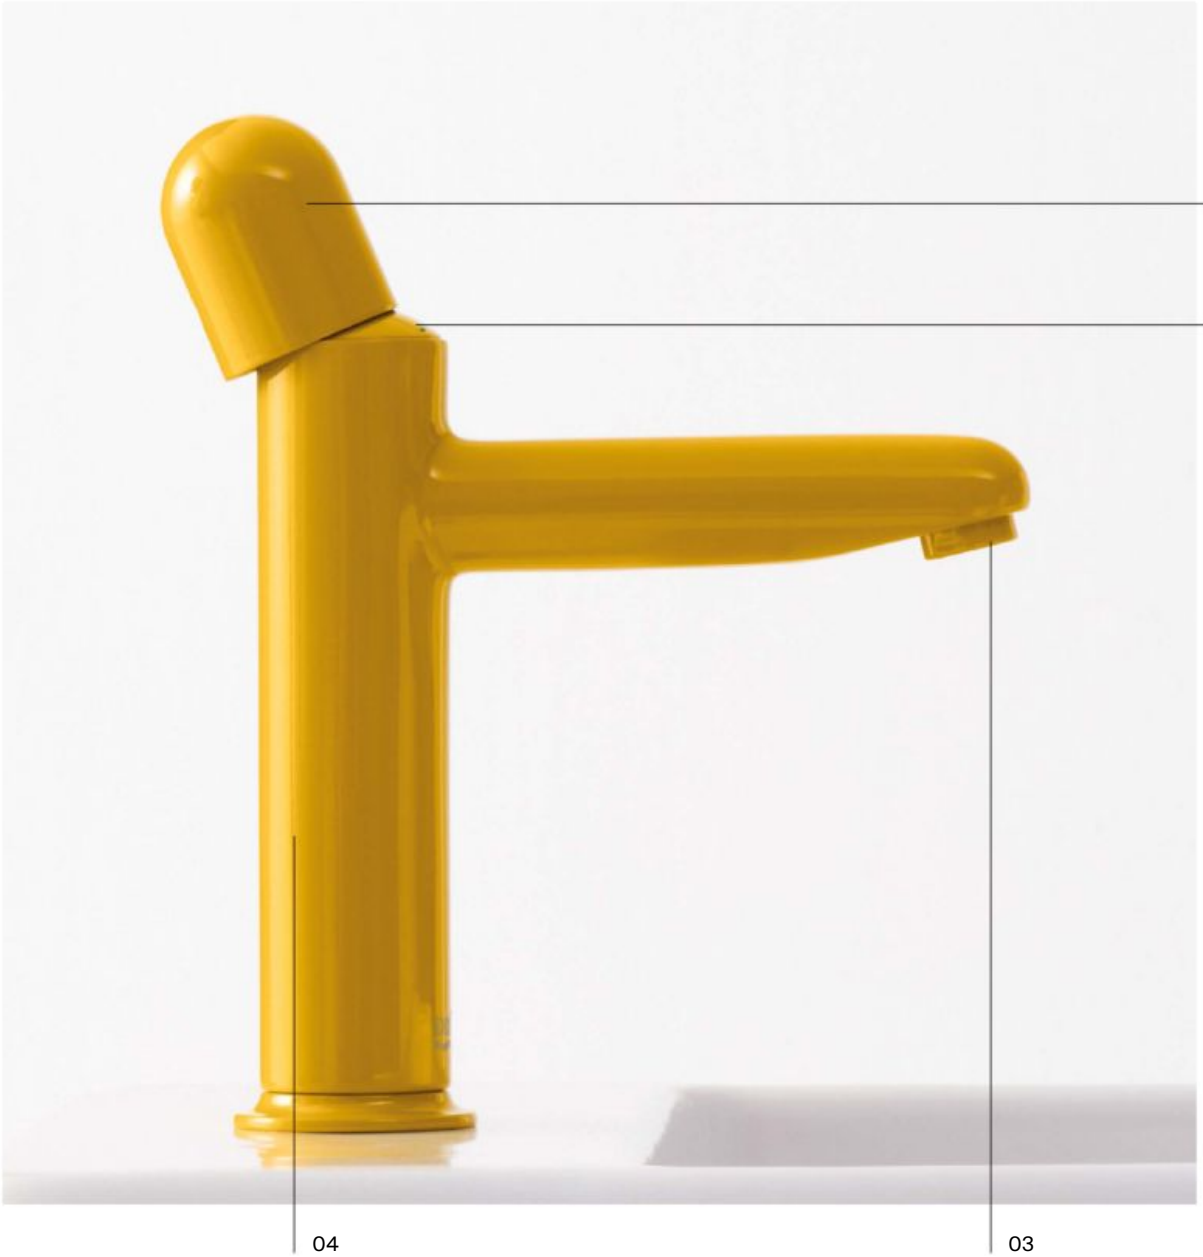

Featuring three different handle designs - Pin, Dome, and Stripes - the Nu collection is available in six glossy colours that reflect Roca’s Mediterranean influence: green, blue, yellow, black, white and chrome. This range of options allows for extensive creativity and personalisation in the bathroom space.

With its streamlined, sculpted design and a body diameter of 35 millimetres, the thinnest Roca has ever produced, the Nu collection integrates ingenuity, sustainability and quality, offering an exciting new perspective in faucet design.

01 3 different handles: Pin, Dome and Stripes.
02 Hidden details: blue / red indicators shape a smiley face.
03 Smooth and precise operation, with a long-term guarantee.
04 A variety of styles and finishes let you create a highly personalised bathroom interior.

Personalisation is at the heart of this new collection. There are no limits or preconceived ideas. Everyone can mix and match colours and shapes to suit their style, adapting it to small domestic spaces or larger commercial settings. The full range of six colours is available on faucets designed for washbasins, bathtubs, and bidets, as well as wall-mounted faucets for showers and washbasins, offering endless combinations.

Ona

A versatile, balanced and slender collection, Ona combines functionality, design and modern finishes, making it easy to combine with a variety of contemporary products and interiors.

01	Cold start and 5L/min flow restriction.
02	High tech ceramic cartridge.
03	38mm diameter body, integrated aerator.
04	Four different basin mixer sizes.
05	Up to 9 coatings available.

Ona bathroom faucets are available in a wide range of finishes, offering extensive possibilities to customise the bathroom space. The chromed finish features Evershine electrolytic coating, ensuring market-leading anticorrosion performance, long-lasting brightness and excellent surface uniformity with enhanced scratch resistance. Titanium Black, Rose Gold, Brushed Titanium Black, Brushed Graphite, Brushed Brass, Brushed Copper and Stainless Steel finishes are treated with Everlux PVD technology, creating a refined yet extraordinarily durable and scratch-resistant surface. A more classic matt black option completes the series.

L20 Square

Flowing with character and geometric precision, L20 Square is a bold approach to refined minimalism. Through practical design, style, and quality, it transforms daily routines into clear, intuitive experiences that set the tone for the day.

01 Cold Start technology reduces energy use by starting with cold water.
02 Reliable for long-term use and tested for up to one million opening and closing movements.
03 Basin solutions in S and XL sizes.
04 Stylish spout for creating contrast and evoking the natural movement of water.
05 Water-saving aerators limit flow to 5 l/min.

Approaching design through a geometric lens, L20 Square stands out for its sharpness and carefully balanced proportions. From its body to its spout, its refined appearance is matched by powerful performance and functional versatility. Placing operational quality on the same level as design, every component of L20 Square has been carefully developed to deliver precise control, lasting durability and everyday comfort.

L20 Round

Comfort and design merge into one with the L20 Round collection. Its soft silhouette is balanced with smooth handling and consistent performance, adding personality to modern and sophisticated bathrooms while evolving both aesthetically and functionally over time.

01 Cold Start technology for reducing energy consumption.
02 Tested for up to one million opening and closing movements.
03 Basin solutions in S, M, L and XL sizes, including a side handle model.
04 Water-saving aerators limiting water flow to 5 l/min.
05 Built-in two-hole model for a floating effect.

Every detail in the L20 Round collection keeps minimalism and design at the forefront. With three finishes to choose from, including classic chrome using durable Evershine technology, or matt black and matt white, each faucet can be styled in countless ways. Designed for flexibility, you can either shape your bathroom around it or let it complement its surroundings naturally.

Shower and Bath Shower Area

Designed to suit every preference and bathroom style, Roca's world of versatile shower solutions combines functionality with elegance. From the personalised comfort of hand showers with adjustable spray settings to the indulgence of overhead rain showers, these solutions are made to deliver an exceptional experience. Thermostatic mixers ensure precise temperature control, while smart showers offer programmable features for improved water and energy efficiency. Sleek floor-standing mixers and shower columns bring modern sophistication, with finishes including chrome and matt black adding a sophisticated touch to any space.

Smart Shower

Roca’s Smart Shower and Smart Shower Compact deliver an exceptional experience with adjustable temperature, water flow and personalised profiles tailored to each family member. They offer the convenience of starting, stopping and resuming your shower with consistent water conditions through intuitive controls. Both systems can also be seamlessly configured and controlled via the Roca Connect mobile app, allowing for greater comfort and customisation with each use.

Upon waking up, the Smart Shower awaits at the perfect temperature.

Key Benefits

Slim design. Smart Shower Compact features a minimalist control panel with a reduced footprint of 213 x 113 mm and 12 mm profile, designed to integrate discreetly into the wall with minimal visual impact.

Advanced design. Smart Shower features a 4.3” full-colour display, while both systems offer precise temperature control, high-precision flow rate regulation, and touch buttons with integrated lighting for clear, intuitive interaction.

User-friendly design. With capacitive technology and ergonomically designed rotating controls, it is exceptionally easy to use. Its illuminated buttons light up when touched, making it intuitive to use for everyone, including children and the elderly.

Self-cleaning. A cleaning programme activates all water outlets and rinses them with an intermittent high-pressure stream of water to effectively remove limescale and impurities that can accumulate in pipes and jets.

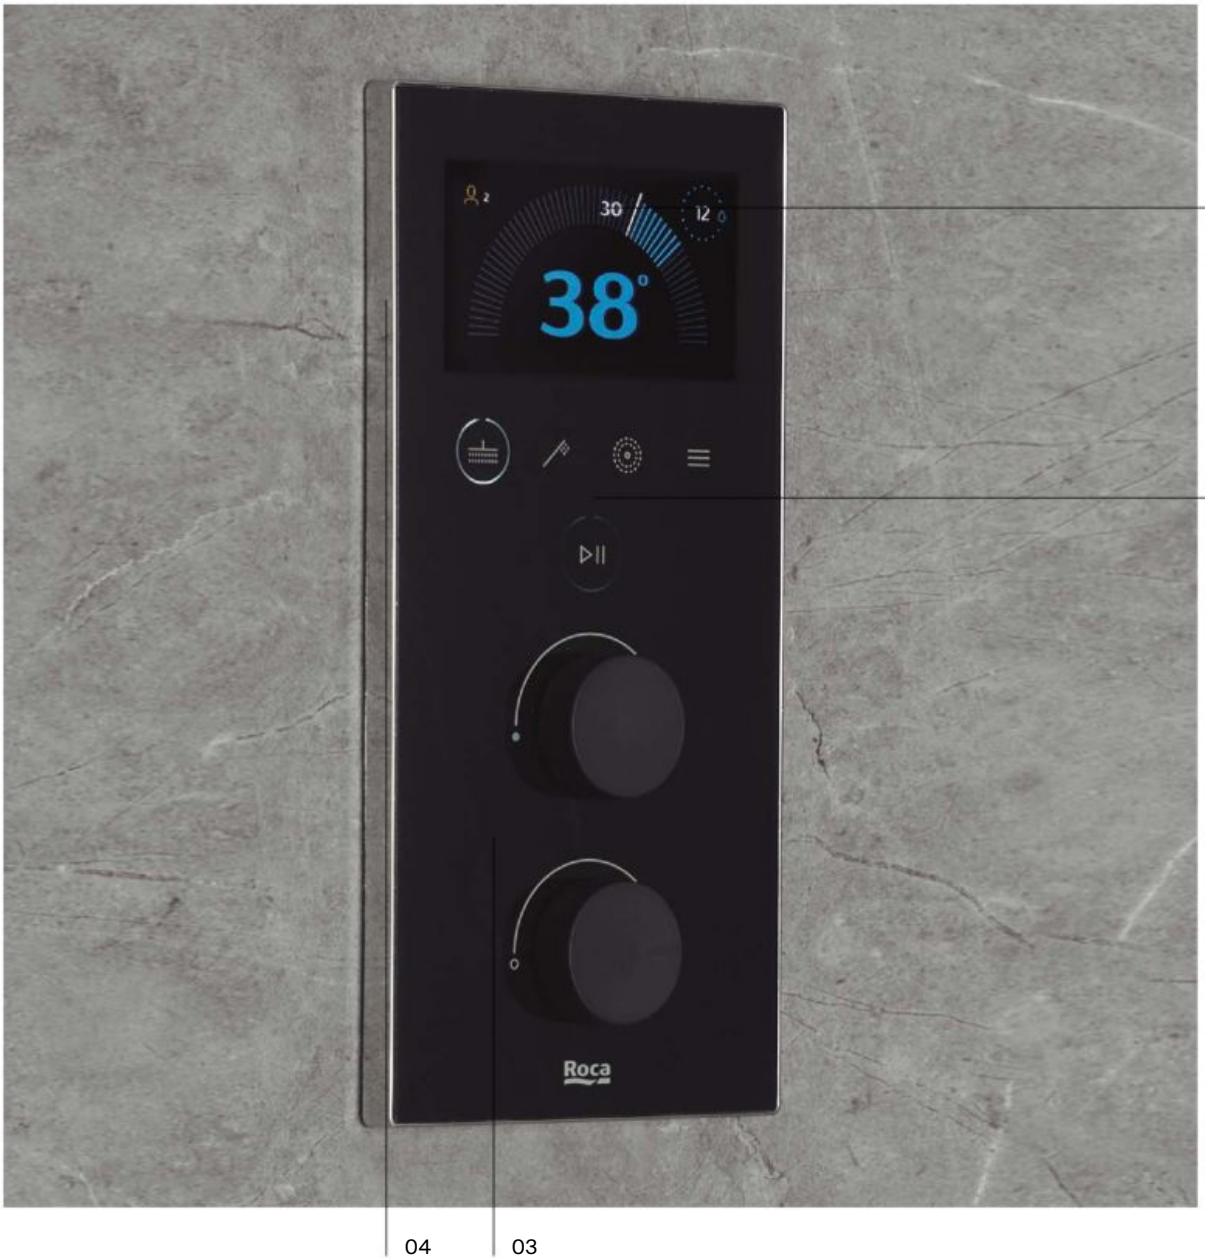

Fully customisable. Users can save their preferences for temperature, flow rate and water outlets in personalised profiles to enhance their daily showering experience.

Safety. Child Mode locks the display to prevent children from changing settings.

Convenience. The Smart Shower can be activated remotely through a mobile app, effortlessly programming the shower and filling the bath with water at the desired temperature. Users can also easily monitor water and energy consumption.

Efficiency. The shower also manages the bath water, keeping it at the perfect temperature and turning off the tap when finished.

Water and Energy Savings. Pause mode saves water while lathering, and usage statistics help monitor and reduce consumption, ensuring consistent water conditions when showering resumes.

01 Advanced design colour display, temperature controls and high-precision flow rate, and touch buttons with integrated lighting.
02 Fully customisable.
03 Easy installation.
04 Ultrafine design.

Smart Shower and Smart Shower Compact provide consumption statistics, and their displays feature a Pause Mode that temporarily shuts off the water flow, allowing you to lather up without wasting water. When the shower is resumed, the same temperature and flow conditions are maintained for a consistently comfortable experience.

Thermostatic Mixers

Roca’s thermostatic mixers are designed to ensure maximum safety and comfort for everyday use. They provide a consistent water temperature and flow rate, adapting seamlessly to changes in water pressure. With advanced safety features, including temperature control to prevent scalding and cool-to-touch surfaces, these solutions ensure a safe and comfortable showering experience every time.

Universal shower solutions designed for any bathroom space and user needs

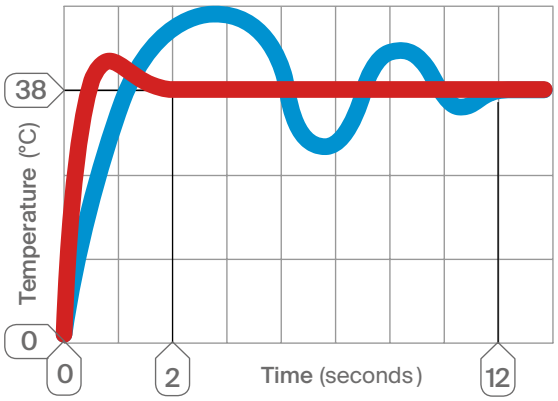

Key Benefits

Instant Comfort. Quick Reaction technology ensures the desired temperature is reached in less than three seconds and keeps it constant to save water and energy.

Precision. Ergonomic controls that enable quick and precise temperature selection with one simple movement.

Safety. Safe Touch technology prevents overheating of the faucet body, avoiding burns when touching the metal parts.

Safe Temperature. The Safety 38° system features an anti-scalding mechanism, preventing water from exceeding 38°C.

RocaBox

RocaBox is a versatile universal shower valve housing unit, compatible with a wide range of built-in manual and thermostatic mixers. Compact and easy to install, it fits seamlessly into both stud and solid walls, making it the ideal solution for bathrooms with limited space.

Key Benefits

Universal. Compatible with both manual and thermostatic built-in mixers, supporting single or dual outlets.

Compact. The most space-efficient universal body available, it requires a minimum installation depth of just 70 mm (including stud wall measurement).

Versatile Outlets. Can be configured with 1 or 2 outlets, allowing for multiple combinations.

Easy Access & Maintenance. Once installed, the RocaBox can be easily accessed and maintained. Shower mixers can also be changed easily during future bathroom upgrades and renovations, saving time and reducing costs in commercial environments.

Protective Cover Plate. A protective cover plate that shields the unit from dust and dirt during construction.

Design. A double sealed design offers superior watertightness.

Compatibility. Compatible with various Roca built-in mixers, including both manual and thermostatic models.

Noise Reduction. A sound-absorbing back plate that reduces noise levels during operation.

Flexible Installation. Can be installed in both solid and stud walls.

WRAS Approved. Certified as a WRAS approved product, ensuring quality and safety.

5-Year Guarantee. Comes with a 5-year warranty for peace of mind.

Note: The RocaBox is a housing unit only. It must be installed with compatible built-in mixers and cover plates, which are sold separately.

01 On/off switching technology for intuitive and simple outlet selection with flow regulation.
02 Thermostatic mixers that ensure the desired temperature with a quick response, saving water and energy.
03 Compatible with RocaBox.
04 Anti-scald protection at 38°C.

Thermostatic Shower Columns

Thermostatic hydromassage shower columns combine sleek design with advanced technology for a luxurious and safe showering experience. Intuitive button controls allow for easy adjustment, while thermostatic technology maintains a constant water temperature even when pressure changes. SafeTouch technology features prevent surfaces from overheating, making it ideal for all ages.

Design and Technology

Intuitive on/off button technology including water flow adjustment. Multiple functions can be activated at the same time. 300 mm head shower with 2 functions (invigorating and concentrated rain).

Comfort

Thermostatic solutions maintain a constant water temperature and respond instantly to changes in water pressure, ensuring the required temperature is maintained. Includes shelf.

Safety

Internal components prevent possible scalding from contact with the body. Ideal for young children or the elderly.

Benefits

Height-adjustable	Rotating shower	Retractable Spout	SafeTouch

Kitchen Area

Roca's kitchen faucets offer various styles, shapes, and colours that enhance kitchen design and performance with energy-saving features. Ergonomic designs, versatile functions, and electrolytic coatings reflect Roca's high standards. Innovative features include Cold Start and ceramic cartridges, with soft movement, steady flow aerators, and low noise applications for everyday satisfaction.

Subtle yet essential features provide pleasant everyday experiences and long-term satisfaction

Key Benefits

Wide range. Variety of styles and configurations for all kitchen needs and styles.

Pull-out spout. Pull-out sprayer with two functions: laminar splash-free function and spray function.

Shower function. Models with shower function for a more effective and efficient rinse.

Cold start. Cold opening that guarantees energy savings up to 35%*.

Durability. All models feature Roca's exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

Evershine. Electrolytic coating guarantees permanent shine over time and makes cleaning easier.

Everlux. Physical vapor deposition (PVD) process, ensuring a perfectly even finish.

Matt finishes. Polyester thermosetting powder coating based on polyester resins.

*Based on annual savings for a family of 4, considering 2 minutes per day of tooth brushing and handwashing 5 times a day.

Roca Aquafy

Filtered Water Faucets

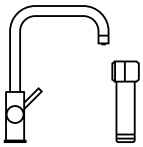

Aquafy, Roca’s kitchen filtration system, offers a safe, convenient, and sustainable solution for cooking and drinking. With easy installation under the sink, the collection includes a variety of faucets with three designs and two finishes, each equipped with a five-stage filter integrated into the faucet. An LED light provides a timely alert when the filter requires replacement, ensuring continuous access to clean and filtered water.

Eliminate plastic bottles and reduce carbon footprint

1.
High-Performance
Ion Exchange Unit

Healthy. Good quality drinking water with no chlorine taste or smell.

Ecological. Sustainable solution to plastic bottles.

Instantly. Healthy water straight from the tap by simply turning the left handle.

Economical. Filtration capacity of 1,200 litres of water per cartridge.

Easy to maintain. Replaceable filter cartridge in less than 10 seconds.

Ideal for cooking. Cleaner water without substances such as chlorine that alter the taste of food.

1. High-Performance Ionic Exchanger
Removes limescale and other substances to soften water.

2. Sediment Filtration
Captures solid impurities like small solid particles, sediment and rust.

3. Membrane Filtration
Eliminates particles, bacteria, viruses, and heavy metals.

4. Activated Carbon Block Filtration
Removes all impurities, including colour, odour, and residual chlorine.

5. Fine Filtration
Eliminates even the tiniest particles, including any ramaining carbon granules.

Public Spaces

Roca’s electronic faucets feature a next generation ‘Intelligent System’ with touchless operation. A motion sensor activates the faucet instantly, ensuring that water is only used when it is needed, preventing waste. This technology ensures reliability, durability and significant water and energy savings. Ideal for public and semi-public spaces, these faucets maximise efficiency and conservation.

Electronic Basin Mixers

A focus on hygiene and prevention is driving innovative technological solutions in public bathrooms. Advanced presence sensors and electronic mechanisms define a new generation of basin mixers and WC and urinal flush plates, These touch-free systems help reduce the spread of viruses, making them ideal for high-traffic areas where cleanliness is essential.

Precise control of water, at your fingertips

Key Benefits

The robust design has been developed for high-traffic public areas and ensures exceptional durability. With concealed aerators, both products are protected against vandalism, ensuring long-lasting performance in demanding environments.

Easy installation. The installation is the same as that of the usual single lever faucet.

Reliability. Design and manufacturing process certified to ISO 9001:2008 and ISO 14001:2004 standards. The electronic faucet meets the requirements of the European standard EN-15091:2006.

Electronic faucets

Hygiene. Designed with pure, modern lines and contact-free operation, guaranteeing maximum hygiene.

Water and energy saving. Infrared presence activation, providing waste-free water, and automatic shut-off after 60 seconds of continuous use.

Mains or battery powered. The electronic series are suitable for public spaces with mains or battery powered options. Battery models include a low power indicator light.

Timed faucets

Water saving. Instant and Avant faucets with limited flow to preserve the environment. In Avant, the water output time is predefined for efficient use.

Versatility of use. Versatile series suitable for various spaces such as hotels, offices, hospitals, schools, gyms, campsites, nursing homes, shopping centres, bars and restaurants.

01 Resistant materials. Evershine
02 Slender design with electro-valve included in the body
03 Comfort for the user. Temperature control.
04 Security. Infra-red sensor with automatic shut-off valeve
05 Sustainable. 5l/min flow limiter.

A5A5309C00

Electronic basin faucet (pre-mixed water). S-Size. Mains operated at 230V. Includes power source.

A5A5509C00

Loft-E

Electronic basin faucet (one water) with sensor integrated in the spout (DC). L-Size. Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A4243C00

Electronic basin faucet (one water) with sensor integrated in the spout (AC). L-Size. Mains operated at 230V. Includes power source.

A5A4343C00

Loft-E

Electronic basin faucet (one water) with sensor integrated in the spout (DC). XL-Size. Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A3143C00

Electronic basin faucet (one water) with sensor integrated in the spout (AC). XL-Size. Mains operated at 230V. Includes power source.

A5A3943C00

Electronic Faucets

Loft-E

Electronic basin faucet (pre-mixed water) with sensor integrated in the spout (DC). L-Size. Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A3243C00

Electronic basin faucet (pre-mixed water) with sensor integrated in the spout (AC). L-Size. Mains operated at 230V. Includes power source.

A5A3343C00

Loft-E

Electronic basin faucet (pre-mixed water) with sensor integrated in the spout (DC). XL-Size. Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A3743C00

Electronic basin faucet (pre-mixed water) with sensor integrated in the spout (AC). XL-Size. Mains operated at 230V. Includes power source.

A5A3843C00

Loft-E Slim

Loft-E Slim - Electronic basin faucet (one water) with integrated sensor into the spout and flexible supply hoses. L-Size. Powered by four 1.5V LR6 (AA) alkaline batteries.

A5A4E43..0

Loft-E Slim - Electronic one-water basin mixer with integrated sensor into the spout and flexible supply hoses. L-Size. Mains operated (230V). Includes power source.

A5A4F43..0

Loft-E Slim

Loft-E Slim - Electronic basin faucet (one water) with integrated sensor into the spout and flexible supply hoses. XL-Size. Powered by four 1.5V LR6 (AA) alkaline batteries.

A5A4G43..0

Loft-E Slim - Electronic one-water basin mixer with integrated sensor into the spout and flexible supply hoses. XL-Size. Mains operated (230V). Includes power source.

A5A4H43..0

Loft-E

Built-in electronic basin faucet (one water) with sensor integrated in the spout (DC) Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A5643..0

Built-in electronic basin faucet (one water) with sensor integrated in the spout (AC) Mains operated at 230V. Includes power source.

A5A5743..0

Loft-E

Built-in electronic basin faucet (pre-mixed water) with sensor integrated in the spout (DC). Powered by 4 alkaline batteries 1.5V LR6 (AA).

A5A3543..0

Built-in electronic basin faucet (pre-mixed water) with sensor integrated in the spout (AC). Mains operated at 230V. Includes power source.

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings, we have grown into one of the largest producers of bathroom products in the world.

Our designs are intuitive and intentional, driven by a philosophy of continuous improvement. Our team of experts works with leading international designers to create products that push the boundaries of innovation, refining your bathroom while bringing comfort and simplicity to your daily routine.

Despite our presence in over 170 markets, we have remained close to our Barcelona roots, contributing to and drawing inspiration from its vibrant design culture. Our products are designed for efficiency and durability, and sustainability is ingrained in everything we do - from sourcing materials to production, logistics, packaging and shipping.

Beyond our products, we address critical challenges through We Are Water foundation, promoting sustainable water management and improving access to clean water in disadvantaged communities. We are also committed to fostering talent and creativity. Our design competitions provide opportunities for emerging designers, while our Roca Galleries and digital platform rocagallergy.com host events, discussions, and feature articles on key global issues. As a leading multinational, we participate in key international events including Salone del Mobile, ISH, Expo Revestir, KBC and BDNY, sharing our values of innovation, sustainability, and teamwork.

We celebrate the small, everyday moments of domestic happiness. At the heart of our business is the desire to develop attractive and functional solutions that make people live the best bathroom experience.

We make people live the best bathroom experience

Our Planet
Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That's why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home — whether our own or the planet we all share — should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

EcoDesign

Eco-designing for efficiency and circularity: fostering products that are built to last, repairable, and recyclable.

We create long-lasting products with easy-to-replace parts, ensuring extended usability and reducing waste.

Our Life Cycle Assessments (LCA) and Environmental Product Declarations (EPD) provide transparency on our products' environmental footprint.

We design products for easy disassembly and recyclability, such as 100% recyclable shower enclosures, fostering responsible waste management.

Our innovative technologies reduce water and energy consumption, supporting sustainable building certifications such as LEED and BREEAM.

Responsible Production

Preserving natural resources goes beyond using water efficiently. It begins with sustainable production.

We are moving towards emission-free factories with pioneering technologies, including the world's first electric tunnel kiln for sanitary ceramics, aiming for net-zero emissions by 2045.

We rely on renewable energy sources, including Power Purchase Agreements (PPAs) and on-site photovoltaic panels, to minimize our carbon footprint.

Our water neutrality roadmap focuses on reducing, reusing, and recycling water to minimize freshwater consumption.

We reintegrate manufacturing byproducts like chamotte and brass swarf into our production and promote waste reuse across industries to minimize landfill waste.

Commitment to society

Enhancing people's lives and building a healthier, more inclusive, and sustainable future.

We develop solutions for people with functional diversity, reduced mobility, and special needs to ensure comfort, independence and dignity.

Our products and services are designed to promote wellbeing, self-care, and a healthier lifestyle.

Through the We Are Water Foundation, we strive to improve access to clean water and sanitation for those in need.

Through Roca Galleries, we promote global dialog that inspires sustainable design, architecture, and urban planning.

Protecting our home means safeguarding our people and our planet

Our EcoVadis Platinum Medal for outstanding sustainability performance places Roca Group among the top 1% of over 150,000 companies assessed globally.

We are committed to taking action for the Sustainable Development Goals as proud members of the United Nations Global Compact.

Many of our products are registered with the Unified Water Label scheme. This scheme identifies water-saving products that, when installed and used correctly, will use less water, saving energy and money.

The Water Label is used across Europe for most bathroom products.

Throughout our brochure, we have highlighted the faucets with the best water-saving performance, markingt hose that are' best in class' in termso fw ater efficiency. The flow rate classification is measured at 3 bar pressure. For more information and complete details on water flow rates and classification, please visit www.uwla.eu.
