Shaping the Solutions of Tomorrow

A Shared Vision

With a legacy rooted in design excellence and technical precision, Roca is committed to creating custom bathroom spaces that enhance your everyday. Our experience spans decades and continents, enabling us to approach each project with a deep understanding of architectural requirements, construction processes, and client expectation. With our expertise, your project becomes a true reflection of your vision.

Sustainability, collaboration, and integrity are at the core of our practice. We partner closely with architects, developers, and project managers to ensure every specification, material, and finish is considered with care — balancing aesthetic ambition with environmental responsibility and functional performance.

Our team integrates cutting-edge technology with refined craftsmanship to create spaces that endure. From concept to completion, we are committed to delivering precision, efficiency, and value — helping shape environments that elevate both everyday living and long-term investment.

Professional Relationships

We take pride in our strong, trusted relationships with industry professionals. These partnerships drive our business forward, allowing us to analyse user needs and deliver innovative solutions. By working closely with a broad network of professionals – from architects and designers to engineers, planners, project managers, and hospitality professionals – we ensure they meet evolving standards of form and function. Our active engagement with the professional community extends to international events and a global network of Roca Galleries.

Roca Galleries Worldwide

More than just exhibition spaces, Roca Galleries are dynamic cultural hubs dedicated to fostering dialogue on a range of key topics, including architecture, design, innovation and sustainability. These versatile spaces play host to a variety of events, from thought-provoking exhibitions to engaging live talks and debates. They facilitate the exchange of innovative ideas while showcasing Roca's latest bathroom collections.

Strategically located in major cities around the world – including Barcelona, Madrid, Lisbon, London, Shanghai, Beijing, São Paulo, Zagreb, New Dheli and Sydney – each gallery is designed by a renowned architect. The galleries' unique architectural and interior designs reflect Roca's brand ethos while integrating the character of their location.

Roca Galleries in iconic cities across Europe.

Fostering dialogue between architecture, design, innovation and sustainability, Roca Galleries have become cultural benchmarks that connect professionals, emerging talents and design enthusiasts.

Roca Barcelona Gallery

This gallery, designed by Carles Ferrater of OAB Arquitectes, is characterised by its minimalist form and laminated glass façade. The design plays with light, appearing solid by day and liquid by night, creating an ever-changing interplay of transparency and reflection that invites curiosity and exploration.

Roca Madrid Gallery

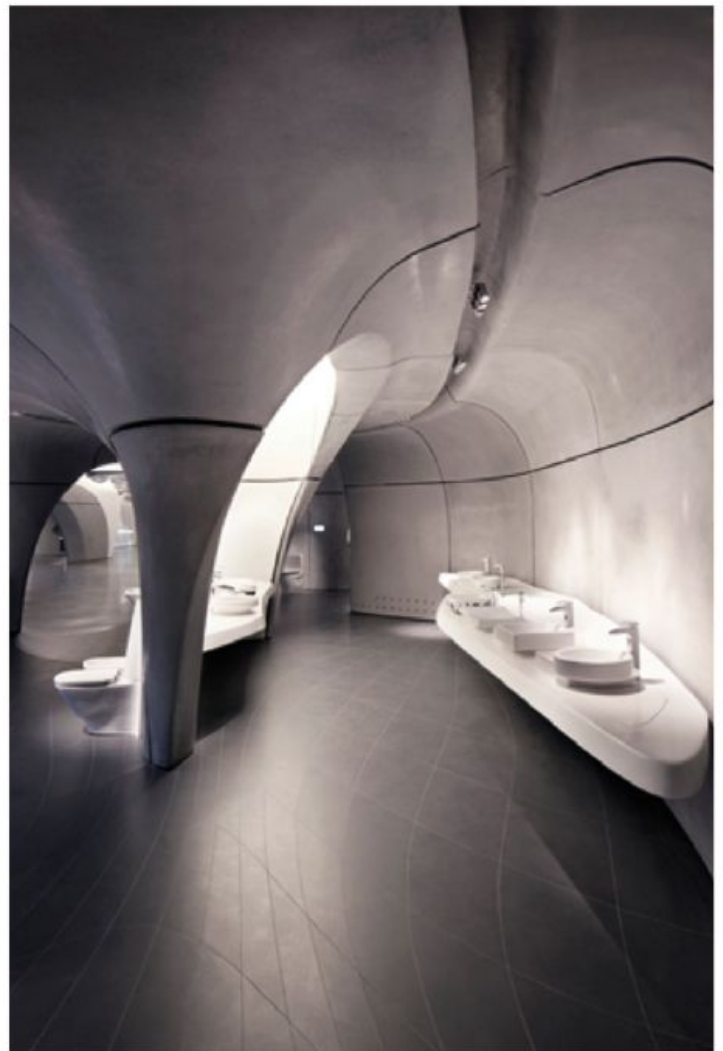

Designed by Estudio de Arquitectura Lamela, the gallery in Madrid creates a seamless connection between people and water. The gallery's innovative design provides an immersive environment that encourages exploration and discovery, highlighting the vital role of water in society.

Roca London Gallery

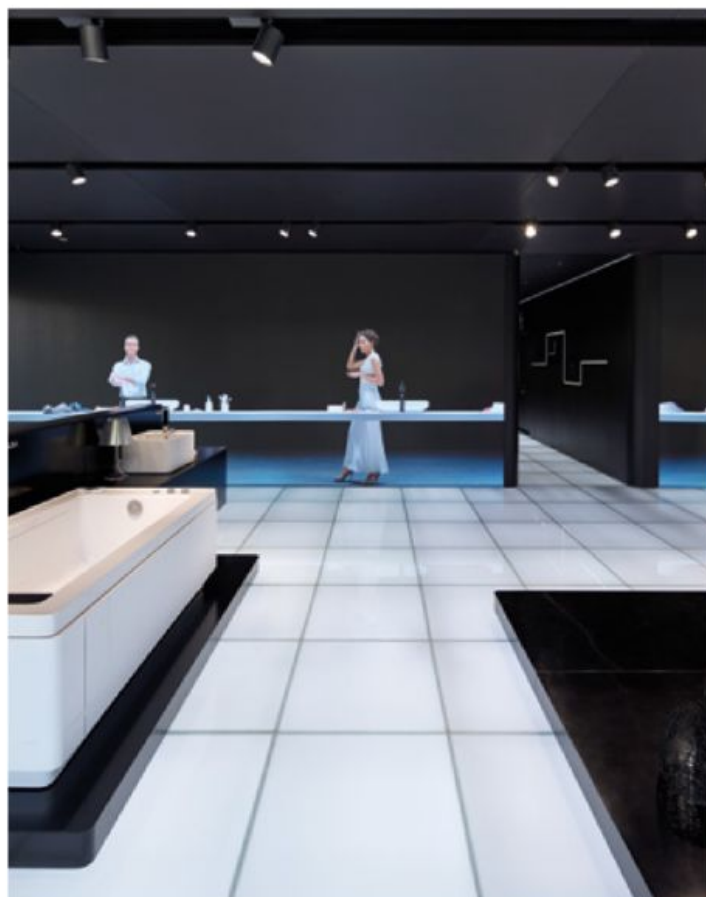

Zaha Hadid's design for Roca London Gallery features fluid, organic forms that create an evolving experience of Roca's identity. Designed as a flexible space that seamlessly integrates different functions visitors are immersed in an active design centre where creativity and innovation are central.

Roca Lisboa Gallery

Located in an early 20th century building, the four floors of the Roca Lisboa Gallery feature an audiovisual projection that conveys the different sensations of water. Renovated by Ferruz Decoradores, the original architectural style of the palace has been maintained, preserving its personality while adapting it to the future.

And around the world.

Roca Beijing Gallery

Designed by Ma Yansong of MAD Architects, Roca Beijing Gallery is a forward-thinking spatial space that enriches Beijing's architectural and cultural landscape. Located in the Dongzhimen district, the building features a striking glass façade with a double-height LED installation, creating an immersive visual experience.

Roca Shanghai Gallery

Roca's first gallery in China is located in an iconic glass building in Shanghai's exclusive Xuhui district. Designed by Francesc Rifé Studio, Roca Shanghai Gallery invites exploration during the day and transforms into a dynamic display at night, creating a continuous interaction between the building and the city.

Roca São Paulo Gallery

Roca São Paulo Gallery, with architectural design by Fernanda Marques and landscaping by Alex Hanazaki, has a uniquely fluid and contemporary atmosphere. Reflecting the Brazilian identity through its façade, landscaping and furnishings, the gallery is a breath of fresh air on the city's busy Avenida Brasil.

Roca Delhi Gallery

Roca Delhi Gallery represents a cultural and architectural landmark. Designed by the Ultraconfidentiel studio, this four-storey space provides a dynamic environment for dialogue around design, architecture and sustainability. Located in a mixed-use building, it plays a key role in fostering the district's creative synergy.

Roca Zagreb Gallery

Located in a historic building in the heart of the Croatian capital, Roca Zagreb Gallery was developed as a new hub for inspiration and exchange. Designed by Snøhetta, the space is immersed in the city's creative pulse—just steps from the Faculty of Architecture and surrounded by a dynamic design community. It offers an immersive setting that bridges heritage, innovation and architectural culture.

Roca Sydney Gallery

Designed by DKO Architects, Roca Sydney Gallery is located in Australia's most iconic city. Spanning 700 square metres across two levels, the space stands out for its carefully crafted interior design, offering visitors an elevated experience. While discreet on the outside, the gallery houses meticulously designed environments that reflect Roca's ongoing commitment to design, innovation and purposeful storytelling.

Rocagallery.com

Complementing the network of galleries, rocagallery.com is an online platform with curated articles by more than 350 industry experts from around the world, discussing trends and future challenges in architecture, design, innovation and sustainability.

Designers and Architects

At the heart of Roca's commitment to innovative bathroom solutions is our collaboration with leading international designers and architects. By partnering with leading professionals, we not only develop products that redefine the standards of bathroom design, but also create singular exhibits for international trade shows and design events. These collaborations combine diverse creative visions with technical expertise, resulting in cutting-edge, elegant design and practical functionality that pushes the boundaries of the industry.

Roca

Fuori Salone 2022, Cobalto. Milan, Italy.

← Casa Decor 2023, Isern Serra. Madrid, Spain.

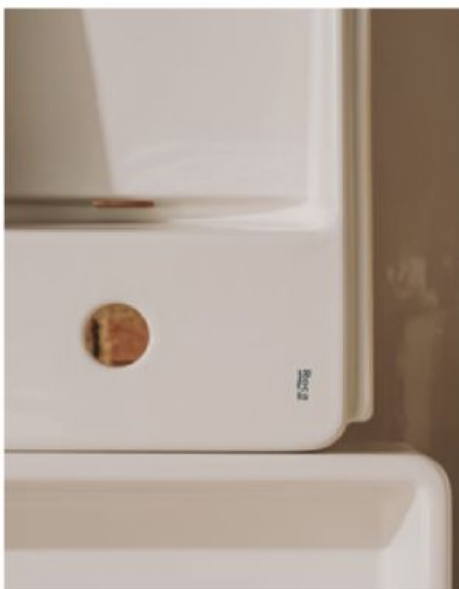

Fuori Salone 2023, Benedetta Tagliabue. Milan, Italy.
→ Salone del Mobile 2024, Mesura, Milan, Italy.

Roca has collaborated with many renowned architects and designers to create unique collections that demonstrate a shared commitment to innovation and design excellence.

Andreu Carulla

From his lakeside studio in Banyoles, Spain, Andreu Carulla applies a unique blend of craftsmanship, technology and innovation to his sustainable designs. His emphasis on simplicity in materials and shapes is evident in Tura, his bathroom collection for Roca, which is inspired by architectural principles.

Benedetta Tagliabue – EMBT Architects

Benedetta Tagliabue, principal architect at EMBT Architects, co-founded with Enric Miralles, is known for iconic works around the world. A visiting professor at leading universities and a member of international juries, her decade-long collaboration with Roca includes projects for exhibitions and events like the 'NUTURA' installation at Fuorisalone 2023.

Benedito Design

Founded in 1973 by Ramón Benedito and Maite Prat, Benedito Design has developed projects for major companies, including Roca with the iconic Targa and Ona collections. In 2004, Gae Benedito joined the studio to work on advanced projects.

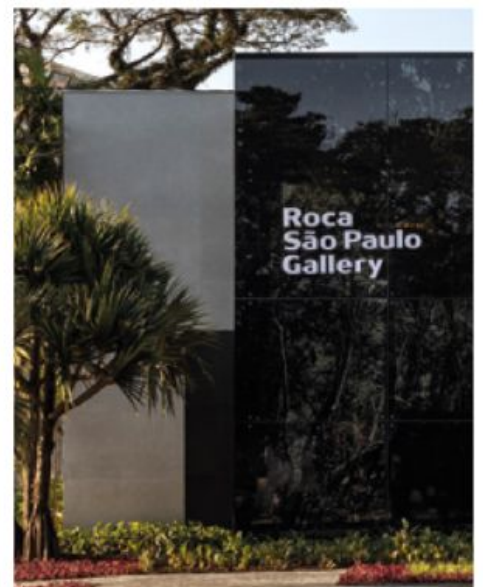

Carlos Lamela

With offices in Madrid, Warsaw, Mexico City and Rotterdam, Estudio Lamela has completed over 2,000 projects worldwide since 1954 in sectors ranging from transportation to housing and hospitality. For Roca Madrid Gallery, they created a pleasant and surprising brand experience.

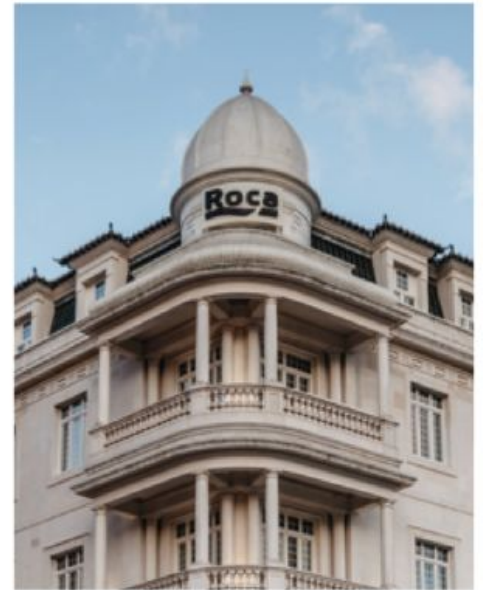

Fernanda Marques

Fernanda Marques is a Brazilian architect with an international reputation for her integrated approach to architecture, interiors, and product design. The Infinity collection of basins for Roca Brazil is a prime example of her signature clean and contemporary style. In 2023, she extended her creative influence to the first Roca Gallery on the American continent, the Roca São Paulo Gallery.

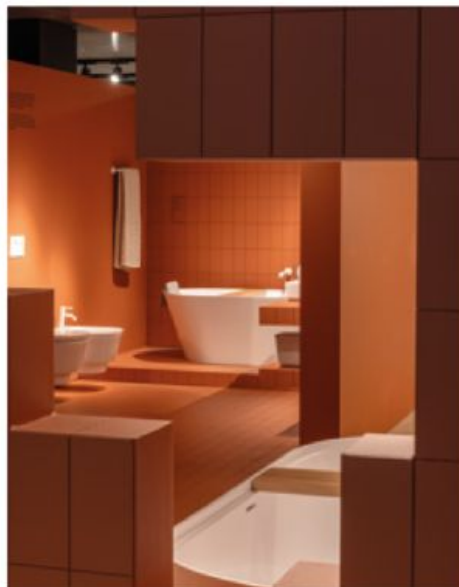

Ferruz Studio

Ferruz Studio is a leading Barcelona-based multidisciplinary design studio with over 40 years of experience spanning two generations. Led by Carles Ferruz and his sons Marc and Adrià, the team blends tradition and innovation to create refined, functional interiors for residential and commercial spaces worldwide, such as Roca the Roca Lisboa Gallery.

Francesc Rifé

Founded in 1994 by Francesc Rifé, this studio specializes in interior and industrial design, architecture and art direction. Rooted in craftsmanship, their work uses a visual language focused on simplicity, detail and material honesty to create refined, globally recognised spaces, including the design of the Roca Shanghai Gallery and the 2024 Roca's Novelties Exhibition.

João Armentano

One of Brazil's leading architects, João Armentano, is renowned for his bold approach to architecture and interior design. A graduate of Brás Cubas University, his global travels helped him master various architectural styles. Armentano believes homes should reflect personal identity and be enjoyed by family and friends. He is the creator of the Horizon basin for Roca.

Lievore + Altherr Désile Park

Specialising in product and colour design, creative direction and ephemeral architecture, this Barcelona-based studio works with an open and sensitive conceptualisation process that results in timeless, elegant and welcoming projects. Their integral design vision consistently combines interculturality, sustainability and a deep care for details, materials and colours. The new Meridian collection is the studio's first collaboration with Roca.

Ma Yansong

MAD's founder, Ma Yansong, is a leading voice in contemporary Chinese architecture. He envisions futuristic, organic designs that balance nature, humanity and the city, blending advanced technology with Eastern philosophy to create emotionally resonant, sustainable urban spaces.

Mario Cucinella Architects

Milan-based Mario Cucinella Architects is a leading sustainable architecture practice, integrating environmental and energy strategies into a diverse portfolio of global projects. Their 'Sparking Change' installation for Roca at Fuorisalone 2024, an example of circularity and decarbonisation, was inspired by Roca Group's launch of the world's first electric tunnel kiln.

OAB - Office of Architecture Barcelona

The award-winning OAB (Office of Architecture in Barcelona), led by Carlos Ferrater with Borja and Lucía Ferrater and his son-in-law Xavier Martí-Galí, developed the concept for the Roca Barcelona Gallery – a 2,400 m², three-storey landmark that combines technological innovation and interactive visitor experiences.

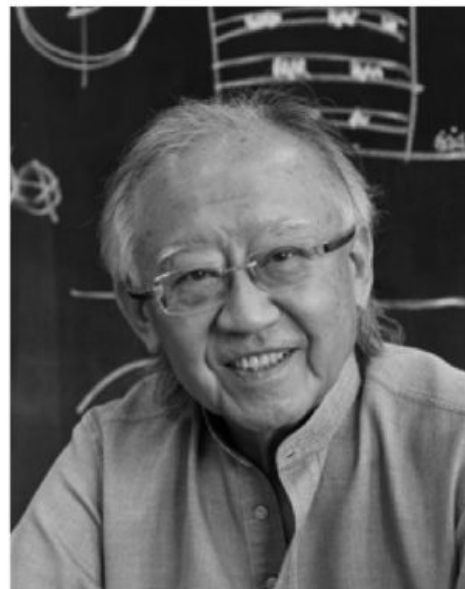

Rodrigo Ohtake

Architect and designer Rodrigo Ohtake pays tribute to his late father, Ruy Ohtake, by continuing Roca's iconic Ohtake collection. The expanded collection includes two new basin models and a bathtub that combine technology and nature, geometry and organic shapes, poetry and beauty.

Ruy Ohtake

The renowned late Brazilian architect Ruy Ohtake is celebrated for his sculptural designs and vibrant use of colour. His designs are recognised for their organic and light qualities, as well as their aesthetic appeal and innovative approach. His portfolio includes an award-winning basin collection for Roca.

Stefan Diez

Founder of Diez Office, Stefan Diez' Munich-based studio promotes durability, reparability and adaptability – minimising environmental impact while ensuring long-term relevance. For Roca, Stefan Diez designed the Kay faucet collection.

Studio Inma Bermúdez

Studio Inma Bermúdez, based in Valencia, Spain, combines German precision with Mediterranean flair, wit and simplicity in its diverse product range. The studio has won numerous international awards for Roca's Nu faucet collection, and Inma Bermúdez was honoured with the Spanish National Design Award in 2022.

Zaha Hadid

Founded by the late Dame Zaha Hadid, Zaha Hadid Architects creates transformative spaces that combine innovation, context and a global outlook. Their design for Roca London Gallery embodies the studio's bold, fluid design language, fusing innovation and context and going beyond visual impact to showcase the brand's offering.

ona

Inspired by the organic forms of the Mediterranean, Ona's slim cylindrical body and the flat, horizontal surface of the faucet create a natural aesthetic.

Inspired by the organic forms of the Mediterranean, Ona's slim cylindrical body and the flat, horizontal surface of the faucet create a natural aesthetic.

Our Projects Service Proposition

Backed by a global network of over 120 experienced project managers and consultants, we are committed to excellence. Our team of experts will support you at every stage, from space planning and product selection to installation and after-sales service, making sure your requirements are met with the highest level of expertise and care.

Global Manufacturing

As a global leader in bathroom solutions, we combine innovation, sustainability and efficiency to meet the diverse needs of our customers. Our extensive manufacturing network enables us to develop cutting-edge solutions that meet the highest standards of quality and reliability. With in-depth industry knowledge and constantly evolving manufacturing processes, we create products that align with modern bathroom design, while prioritising environmental responsibility.

Demonstrating our commitment to sustainability and innovation, Roca Group pioneered the world's first electric tunnel kiln for sanitaryware – setting a new standard in energy efficiency. This groundbreaking technology significantly reduces carbon emissions during production, using advanced manufacturing techniques that improve operational efficiency while minimising environmental impact.

Your Project Partner

Through our dedicated team of managers and regional specialists who provide support to all stakeholders, from hospitality groups to architects, interior designers, owners, investor and developers, Roca ensures personalised and detailed attention to every project. Our value proposition is based in building trust, collaboration and better relationships. Our team is prepared to guide you through every step – from initial concept to final delivery, helping to create inviting, custom bathroom spaces that will delight the users of today and future generations to come.

Bespoke solutions

From concept to completion, our team ensures that each project is a true reflection of the client's vision. We are guided by designing and producing functional, welcoming bathrooms and kitchens that will bring long-term value to the user and the property. Through technology, innovation, sustainable products and practices and top-level customer relationships, we create intuitive and genuine spaces that are shaping the future of architecture and design, one project at a time.

Innovation

Innovation is an integral part of Roca's DNA and the driving force behind every design and each product. From advanced ceramics to smart technologies, Roca is committed to creating a better bathroom experience for everyone. Innovation is also central to our services and customer relationships. Creating new ways to understand and connect to our clients helps us create better products and bathroom spaces.

Advanced toilet solutions are changing the game in the bathroom space. All-in-one In-Tank® cisterns, as with the Avant collection, is an adaptable, space-saving device that allows for a more open and modern look while also featuring a low-consumption dual flush system that saves energy and water. At the top of the innovation game is Roca's In-Wash® technology that brings smart technologies and advanced hygienic features, including the Coanda Effect and Roca Rimless® Vortex, transforming our everyday bathroom experience for the better.

Materials

Our bathroom products seamlessly combine innovative design with advanced technology. Incorporating cutting-edge materials and manufacturing techniques, they provide solutions for both standard and custom projects.

Ongoing research and development drives the creation of materials that enhance durability and hygiene. These innovations result in highly resistant, long-lasting solutions that meet the demands of residential and commercial projects, ensuring optimum performance and a superior user experience.

Surflex®

A pioneering material, Surflex® combines minerals and resins to create custom basins, baths and shower trays. Its seamless design capabilities allow the creation of unique, elegant shapes that are otherwise difficult to achieve, making it ideal for personalised bathroom spaces.

Stonex®

Developed through continuous research, Stonex® is a durable composite of resin and mineral filler that offers exceptional durability and a non-slip textured finish. Perfect for shower trays, Stonex® can be cut to fit any space, ensuring both adaptability and long-lasting performance.

Everlux

This special finish brings a rich variety of colours and textures to our faucets. Through an innovative manufacturing process, Everlux ensures that surfaces remain vibrant and resilient over time, offering endless aesthetic possibilities to complement any bathroom design.

Senceramic®

Senceramic® brings a new level of hygiene and safety to shower trays. Its slim, flat design blends seamlessly with bathroom floors, while its low porosity ensures easy cleaning. The anti-slip properties add an extra layer of safety, combining style with practicality.

Fineceramic®

With edges as thin as 5 mm, this material enables elegant, lightweight designs that are 40% lighter and 30% more resistant than conventional ceramics. Despite its delicate appearance, Fineceramic® offers a smooth, sophisticated surface that is both durable and easy to maintain.

Roca Connect

Smart Bathroom Solution

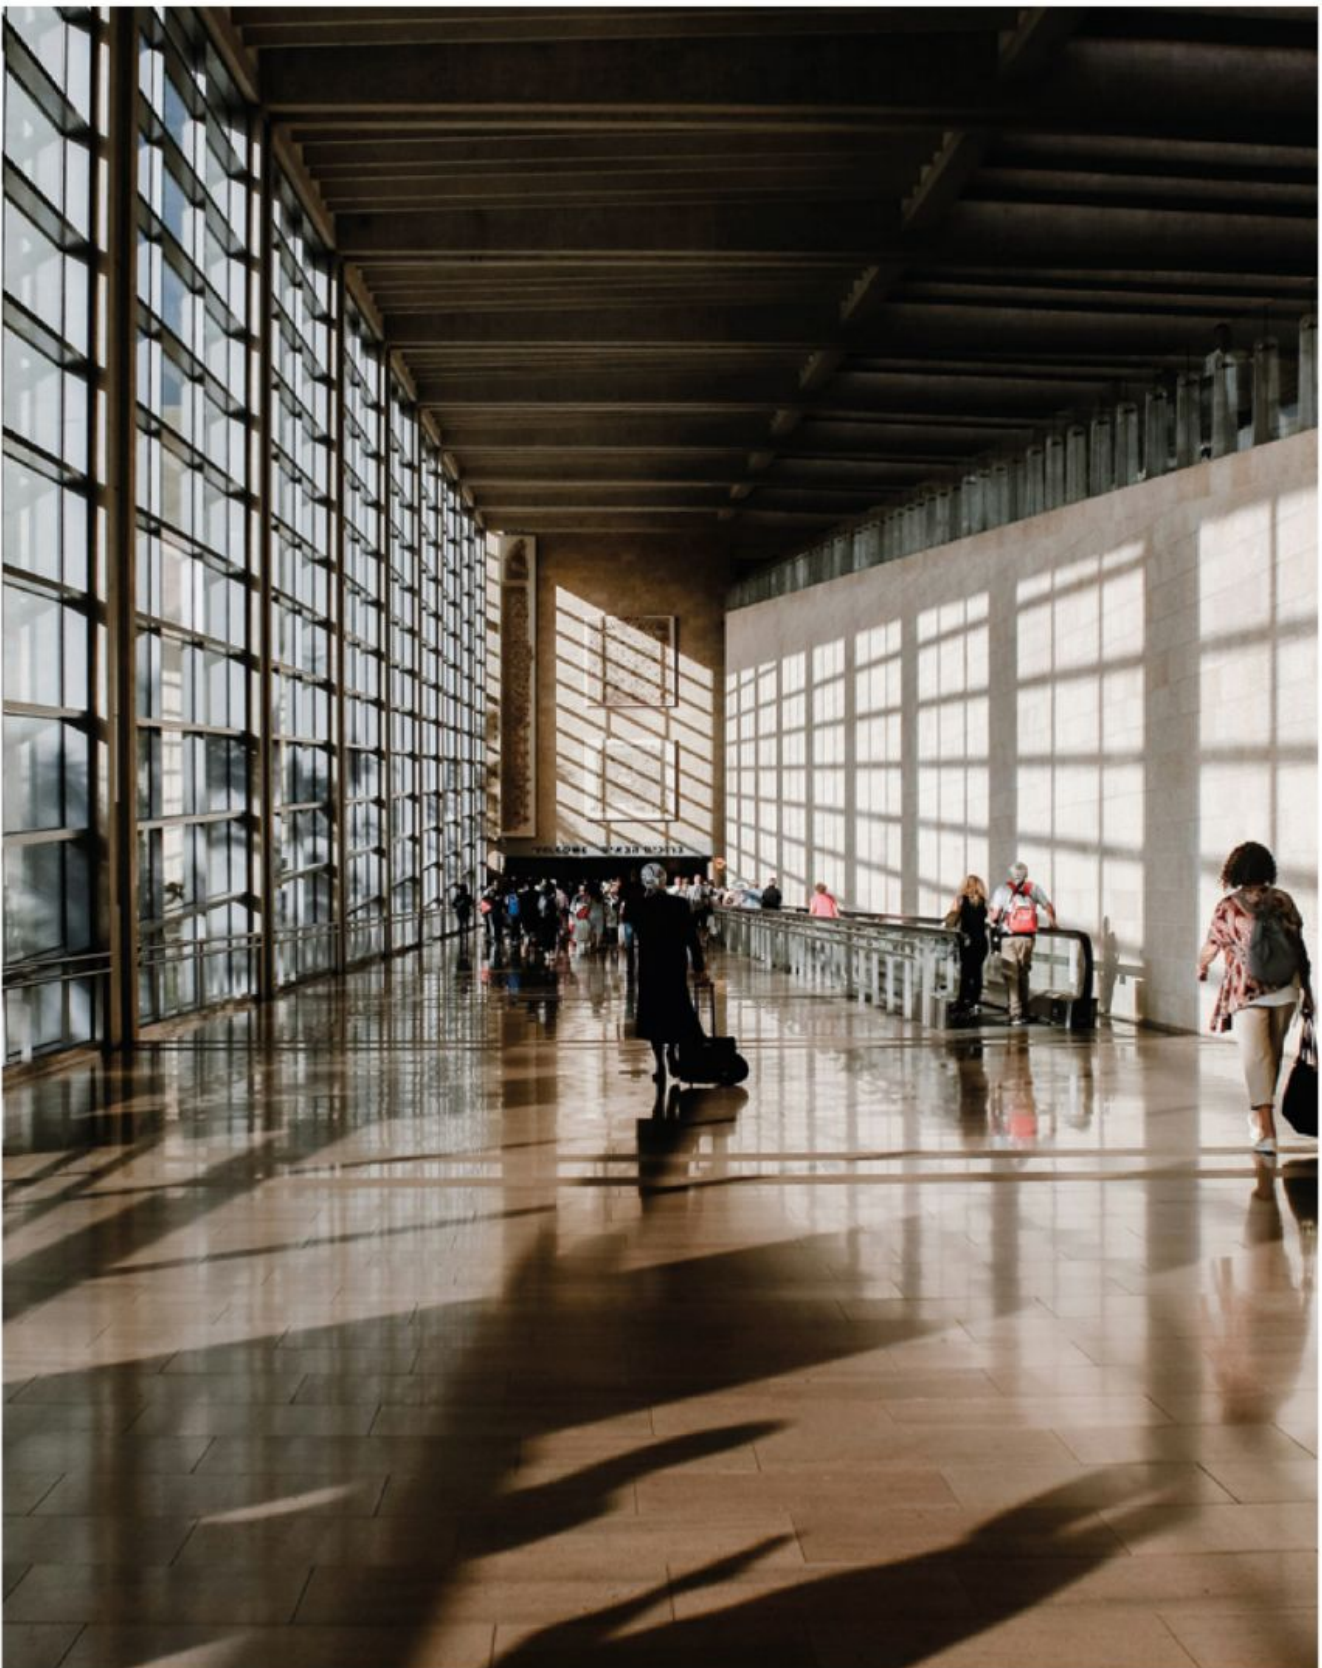

Roca Connect is an advanced smart bathroom solution designed to optimise water management in public and semi-public spaces. With a strong focus on sustainability, efficiency and user satisfaction, it delivers significant benefits in a variety of environments – from busy airports to quieter hotels.

Developed to adapt to the needs of modern infrastructure, Roca Connect is compatible with a wide range of smart products. Its innovative approach improves water efficiency, streamlines maintenance and delivers tangible value to all stakeholders.

In **high-traffic public areas** (airports, shopping centers, stadiums), the benefit of installing smart products (electronic faucets, flush plates and urinals) include:

- Reduced maintenance costs
- Shortened service times
- Real-time data and alerts for facility managers
- Swift issue response
- Minimised congestion
- Optimised water usage during peak times
- Improved standards of cleanliness
- Enhanced user satisfaction
- Guaranteed operational efficiency

In **semi-public environments**, such as hotels, the benefits of smart showers and toilets are:

- Significant water and energy savings
- Leak alerts for real-time problems
- Maintaining high levels of customer service

Benefits for all professionals

Owners

Lower costs, greater satisfaction

Savings and peace of mind with remote alerts and real-time management statistics.

Operational efficiency

Manage and configure installations wirelessly via the dashboard and app.

Improved sustainability

Reduce environmental impact and achieve green building certifications.

Architects

Data-driven design

Access high-quality analytics to optimise layouts, determine traffic flow and allocate space efficiently.

Sustainable solutions

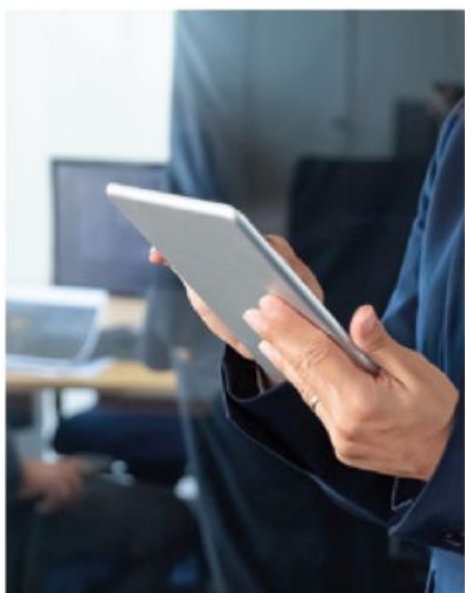

Support green building practices by optimising energy use, water consumption and waste management.

Smart building ready

Prepared for integration into advanced smart building systems.

Our solutions provide valuable benefits to all professionals involved in the design and management of the bathroom. By increasing efficiency, supporting sustainability and simplifying installation, we help owners, architects, facility managers and installers achieve their goals while improving the overall experience.

Facility managers

Cost efficiency

Streamline remote operations to save time and optimise decision making for bathroom facilities.

Simplified maintenance

Quickly detect malfunctions with personalised push notifications and alerts, reducing maintenance and contractor costs.

Improved user experience

Monitor water usage statistics via a cloud-based dashboard.

Installers

Easy and quick setup

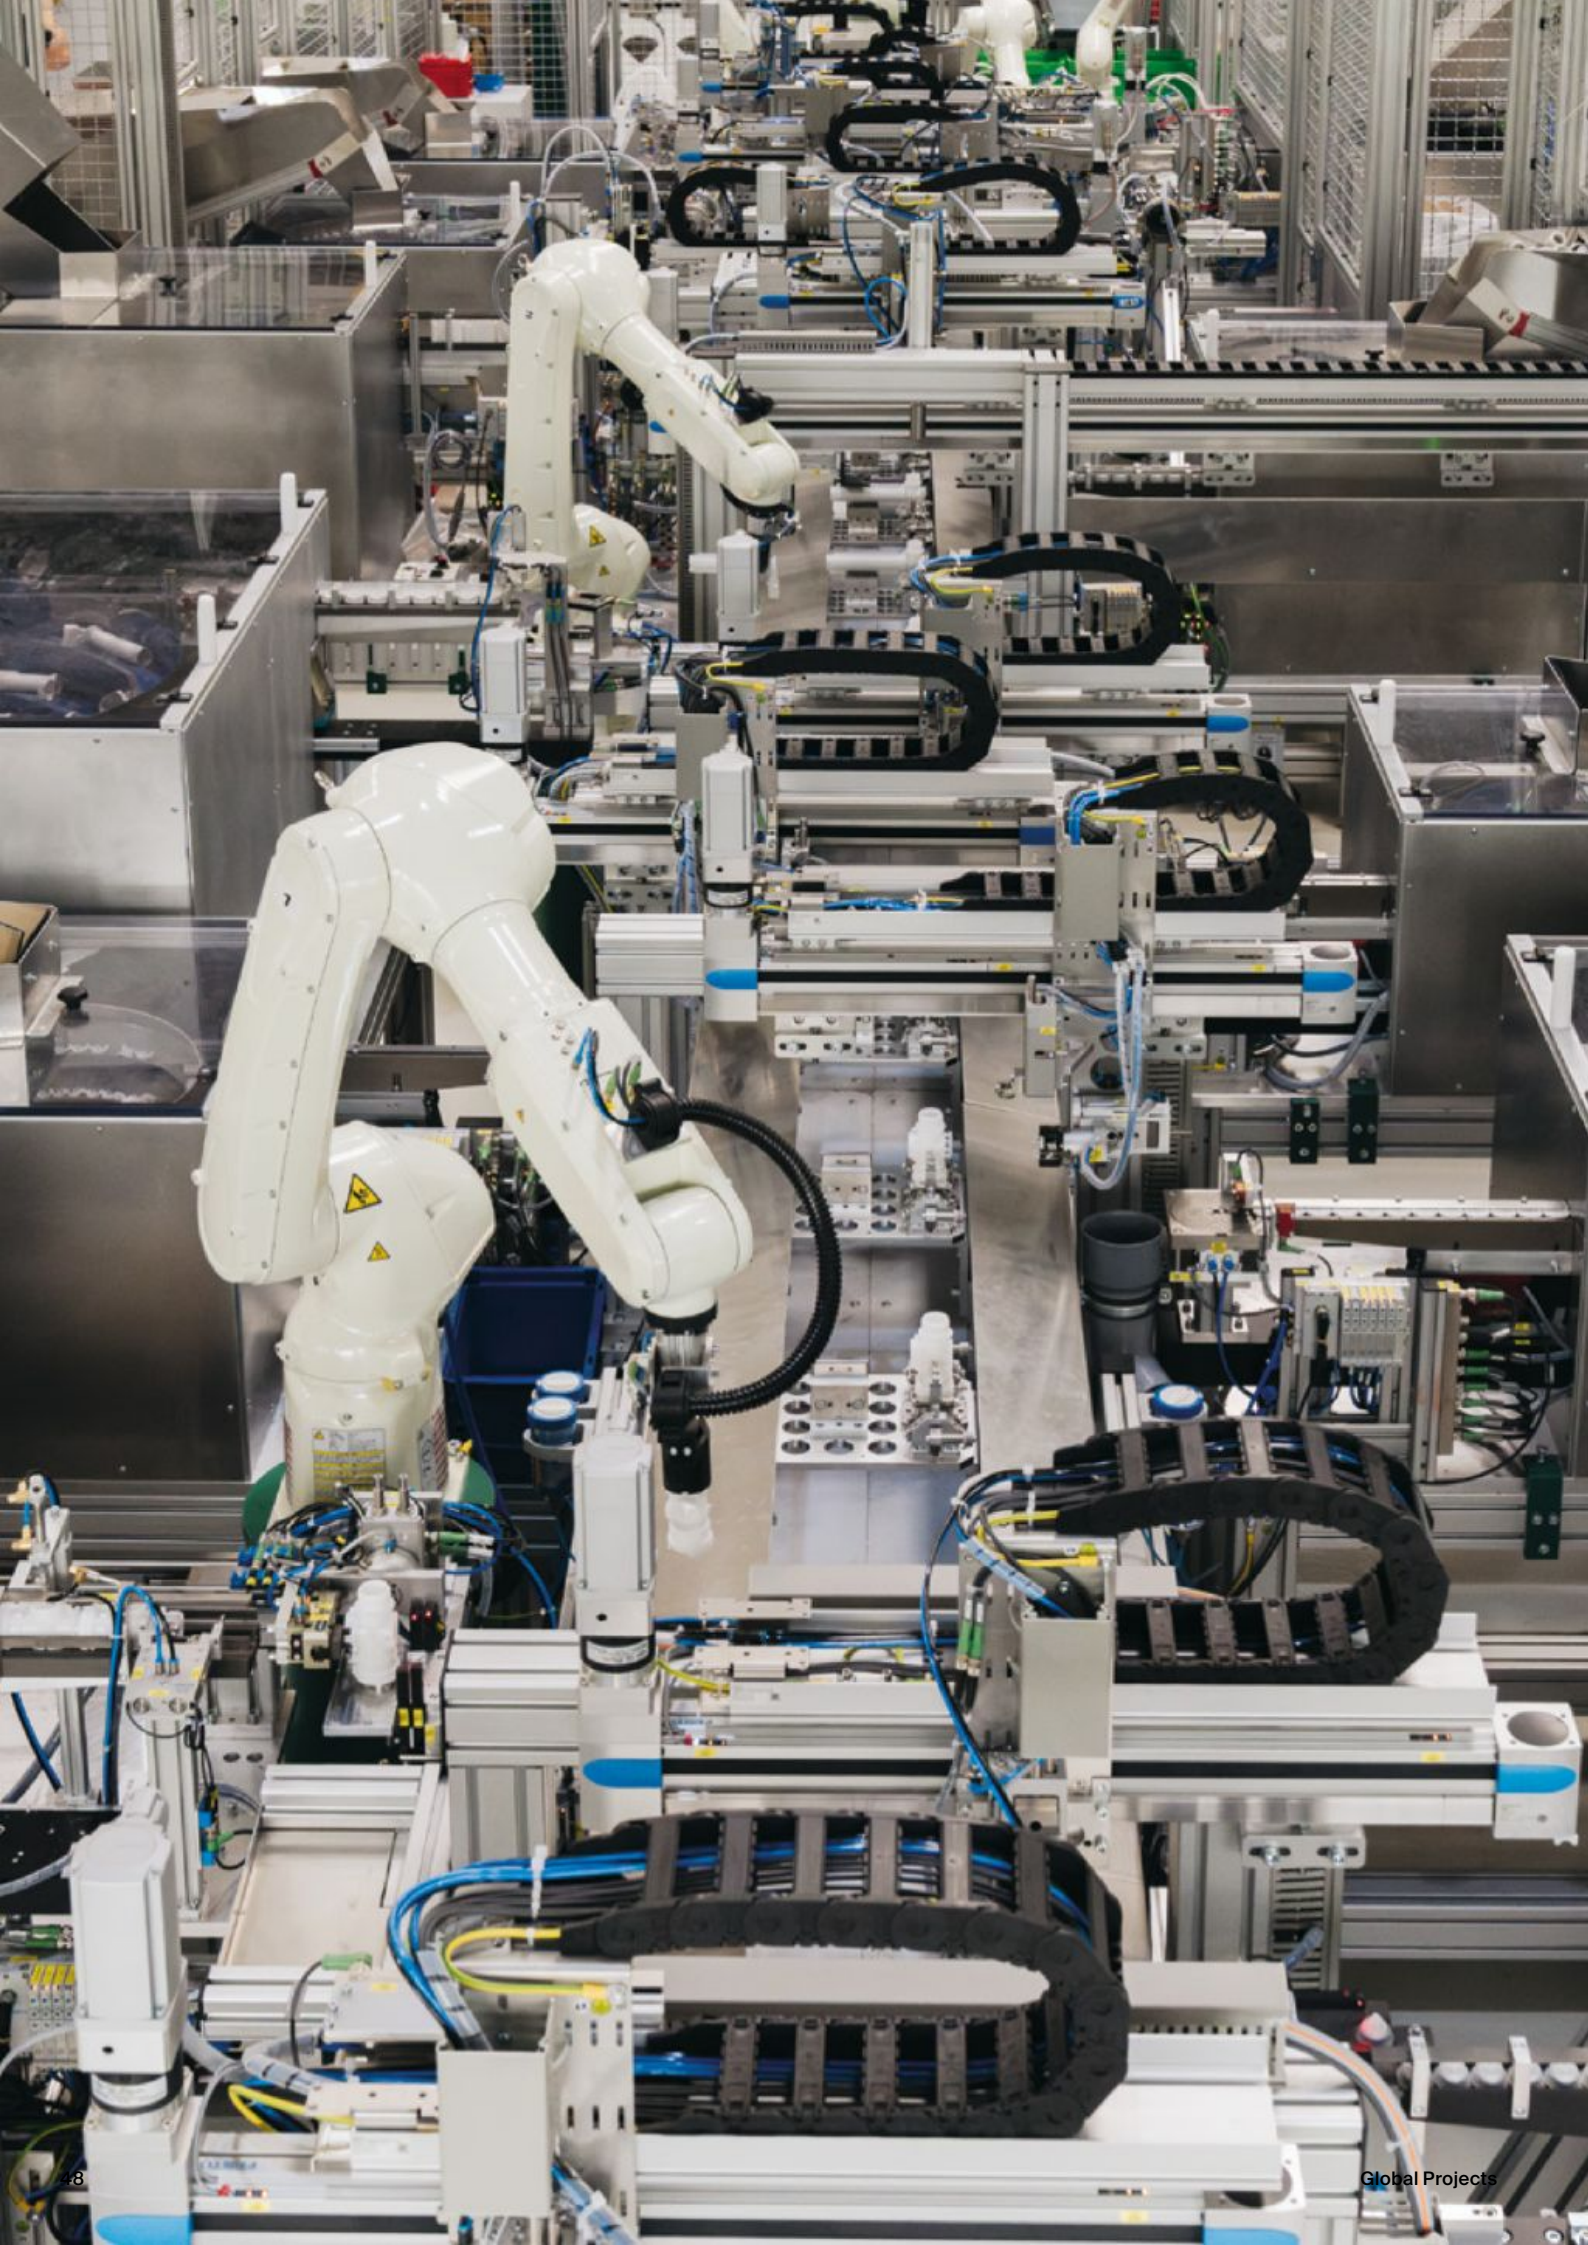

Wireless connectivity eliminates the need for complex wiring installations.

Intuitive installation

Simplified process reduces time and effort.

User-friendly interface

Easily check and adjust parameters for smooth operation.

Competence Centers

Our Competence Centers play a pivotal role in providing dedicated service for small-and large-scale custom projects. They ensure that we remain at the forefront of technological expertise, industrial excellence and comprehensive bathroom solutions. By connecting and coordinating different business areas, these centers enable us to anticipate market trends while focusing on sustainability, technology, automation and efficiency.

Our global competence centers specialise in a wide variety of products designed for any type of bathroom space. From shower enclosures and accessories, composites, seat and covers, faucets, furniture and installation systems to prefab walls and smart toilets our experts provide comprehensive and cohesive solutions. Using the latest manufacturing technologies and decades of hands-on experience, our competence centers provide confidence, trust and efficiency at every step of the process.

Bathroom PODS

PODS are transforming how large-scale projects are built. By offering faster delivery, consistent quality, and greater customization for the construction and development sector, PODS provide reliable, high-performance alternatives to traditional building methods. As one of the pioneers in this field, Roca has set global standards with innovative POD systems that merge advanced engineering with refined design.

Since 1993, Roca has been a leader in designing and manufacturing prefabricated bathroom solutions or PODS. Always in tune with market demands and innovation, PODS provide ideal industrialized bathroom solutions for the construction sector. Backed by decades of experience, Roca's POD systems combine advanced engineering and premium materials with design-led style that can be tailored to fit any project. PODS offer efficient, high-quality and sustainable integrated solutions for large-scale residential, hospitality, and healthcare projects. With offices around the globe, Roca has delivered over 250,000 prefabricated bathrooms worldwide, reaffirming their commitment and certified expertise

Roca's PODS provide multiple advantages over traditional construction, including time savings, cost control, and consistent quality. Each unit is fully finished and tested in the factory before delivery, ensuring streamlined on-site installation and minimal disruption. Their modular nature allows for efficient planning and simplified project management, making them an ideal solution for large-scale developments with tight deadlines.

Roca offers two primary POD types—lightweight steel profile units and concrete-based PODS—each designed with structural integrity, fire resistance, and acoustic insulation. Fitted with Roca’s bathroom fixtures and products that adapt to the client’s needs, the POD designed bathroom ensures long-term durability in demanding environments.

With a proven track record, Roca's PODS support clients throughout the entire project lifecycle, from initial consultancy to after-sales service. Backed by a global commercial and technical team, Roca delivers top-tier modular bathrooms with several important approved constructions certifications including FSC certified wood, IQNET and SQS certified management systems and bureau veritas certification. Beyond functionality, design remains at the core of every Roca bathroom solution. PODS can be fully customized through elegant finishes, smart layouts and cutting-edge technology, offering a seamless, design-led solution to architecturally important, large-scale construction projects around the world.

The Best Of

From iconic landmarks to cutting-edge entertainment, some of Roca's finest bathroom solutions can be found in unique spaces around the world, ranging from business centers and luxury hotels to residential homes and acclaimed restaurants. These projects demonstrate how Roca products seamlessly adapt to a variety of environments and reflect our commitment to craftsmanship, sustainability and forward-thinking design, helping to shape the future of architecture and interiors.

St. Pancras Renaissance

City
London

Country
UK

Architect
Archer Humphries Architects,
Nora Witzigmann (interior design)

London's St. Pancras Renaissance Hotel has been updated to combine historic elegance with contemporary comfort. Originally designed by Sir George Gilbert Scott in 1873, this iconic building now boasts new bathrooms that seamlessly blend tradition and innovation.

Roca's Ona wall-hung toilet and Fineceramic® basin in matt white finish introduce a sleek, minimalist look. These elements not only optimise space and hygiene, but also enhance the guest experience with their refined design. Complementing the clean, modern aesthetic is the Pyros Superslim Stonex® shower tray, which offers both durability and a discreet and neat finish.

The collaboration between Roca and the St. Pancras Renaissance Hotel demonstrates how thoughtful design and modern technology can bridge the gap between the past and the present, transforming historic buildings into more luxurious and functional spaces.

Hotel Unique

City
São Paulo

Country
Brazil

Architect
Ruy Ohtake and João Armentano

Hotel Unique, originally designed by Ruy Ohtake in 2002, is celebrated for its bold curved façade and avant-garde style. Recently renovated by João Armentano, the hotel retains its essence while integrating Roca products in the new bathrooms, reflecting a commitment to elegance, functionality and sustainability.

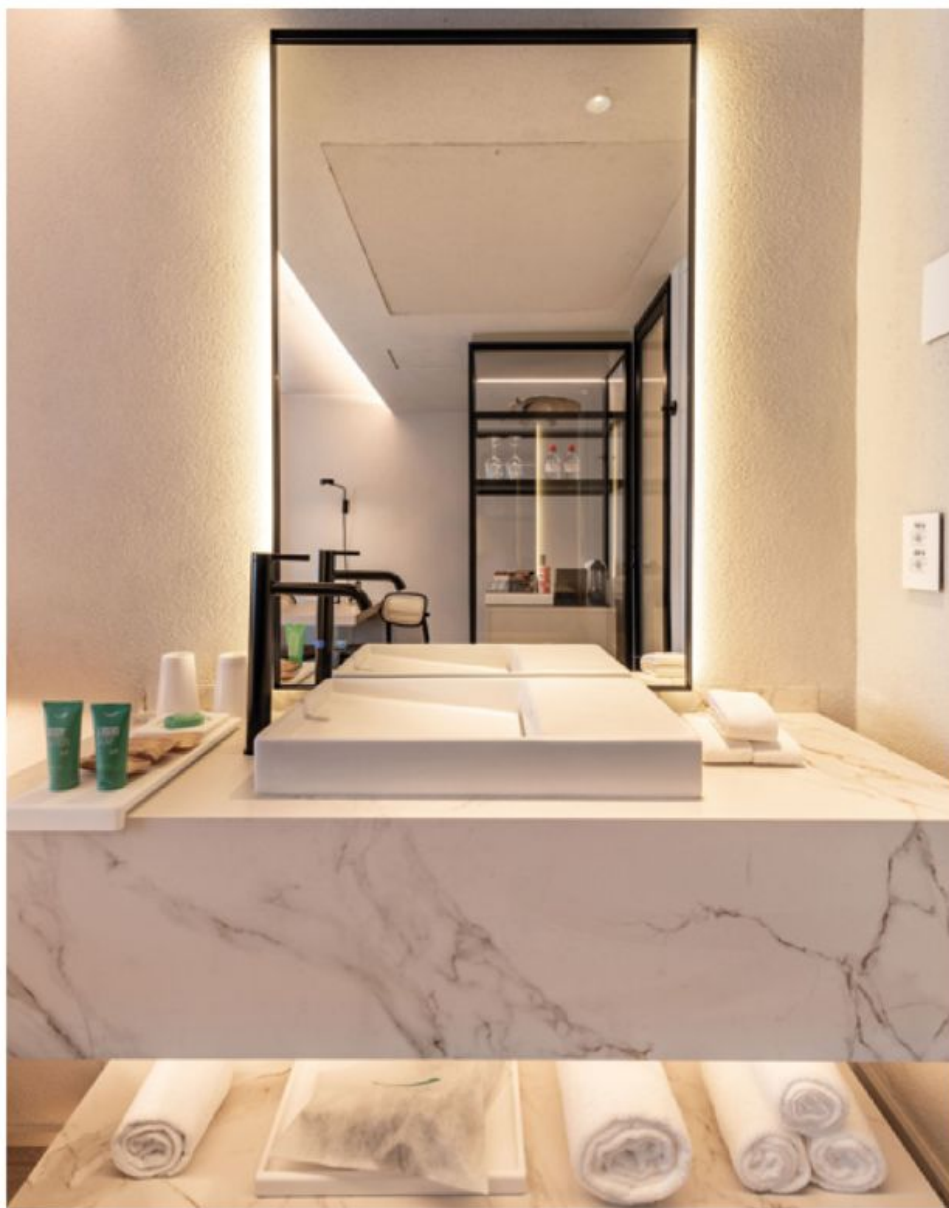

Armentano not only honoured Ohtake's vision in this project, but also acknowledged Roca's long-standing collaboration with both architects, which began with the creation of two award-winning basins. Prominently featured in Hotel Unique's bathrooms, the Ruy Ohtake basins reflect Ohtake's original concept of organic curves and minimalist design, while Armentano's Horizon basins introduce a sleek geometric design that contrasts with the hotel's curved architecture and introduces a modern aesthetic.

Complementing the hotel's sophisticated design, the bathrooms feature Roca's Ona faucets with Cold Start technology, Inspira Round Rimless toilets and Rainsense showerheads offering a luxurious, bathroom experience. Together, Roca and Hotel Unique set new standards for luxury and sustainability, ensuring that this iconic space remains a symbol of excellence in São Paulo.

Architect
Office of Architecture in Barcelona (OAB)

In 2018, Michelin-starred chefs Sergio and Javier Torres opened Cocina Hermanos Torres in Barcelona's Les Corts district with the vision of creating a 'kitchen with a restaurant'. To bring this concept to life, Carlos and Borja Ferrater transformed an 800m² former industrial shed into an experiential dining space, incorporating elements of nature and featuring a 'must-see' toilet.

Roca played an integral part in the design from the outset, working closely with the architects to ensure that the restaurant reflected the brothers' commitment to environmental awareness, particularly in the bathrooms where Roca's products enhance the natural ambience. The Fineceramic® basins and wall-hung rimless toilets, exemplify the elegant design and remarkable durability of the Beyond collection. This is complemented by the sophisticated Insignia faucets with ergonomic lines and cold start technology to ensure optimum water and energy efficiency.

Dedicated to raising awareness of water conservation, the Torres brothers have been collaborating with the We Are Water Foundation since 2016. In the bathrooms, giant immersive screens project stunning images of lush forests, providing guests with a sensory experience that reinforces the importance of environmental stewardship and the need to protect our planet.

Fundació Joan Miró

City
Barcelona

Country
Spain

Architect
Josep Lluís Sert, expansion and renovation
coordinated by Jaume Freixa

The Fundació Joan Miró, designed by Josep Lluís Sert, is an architectural masterpiece that captures the Mediterranean light and the creative essence of Joan Miró's art. With its harmonious blend of geometric volumes, skylights and open courtyards, the building was conceived as a space where art and architecture coexist.

This seamless dialogue between architecture and art extends to the Foundation's latest bathroom renovation, which features the Tura collection designed by Andreu Carulla. Tura's soft curves and refined simplicity echo Sert's architectural language, creating a natural synergy between the building and its interior elements. Just as the museum was designed to enhance the experience of art, Tura complements the space with forms that feel both contemporary and inextricably linked to its surroundings.

Inspired by the very building it now inhabits; Tura reinforces the link between function and artistic expression. The result is a perfect harmony where architectural vision, artistic heritage and design innovation converge to create an environment that is both timeless and forward-thinking - demonstrating how design can honour its surroundings while remaining innovative and contemporary.

Roca Products

The Cloudscape

City
Haikou

Country
China

Architect
MAD Architects

The Cloudscape library, designed by MAD Architects, reimagines the traditional library as a hub for social and cultural interaction. Its fluid, sculptural form invites visitors into a tranquil, almost otherworldly waterfront environment, reflecting the architects' commitment to creating functional spaces that enrich the city's cultural fabric.

With half of the building dedicated to public facilities, Roca collaborated with MAD Architects to design bathrooms that complement the library's innovative and sustainable design. Round basins from The Gap collection, Loft touchless faucets and Euret urinals were carefully selected for their sleek design, water-saving features and user-friendly functionality. These products not only align with the overall aesthetic, but also promote energy efficiency and water conservation, supporting the library's sustainability goals.

This collaboration between MAD Architects and Roca exemplifies how a shared commitment to culture, creativity and design can transform public spaces. Through thoughtful design and innovative craftsmanship, both brands create an immersive environment where architecture and user experience converge, resulting in a space that is both visually striking and functionally exceptional.

Poland

Architect
Q2 Studio, MVRDV

Overlooking Słodowa Island, Concordia Design merges the renovation of a 19th-century tenement building with a new extension, creating a contemporary creative hub that houses coworking spaces, an events centre and an upscale restaurant. It was awarded the prestigious ArchDaily Building of the Year 2021 Award.

Concordia Design's bathrooms were designed to offer universal comfort for a variety of users, with an emphasis on streamlined aesthetics and high standards of hygiene. Q2 Studio chose Roca to provide products that would excel in public spaces. Roca's Debba wall-hung basin, Nexo urinal, The Gap square wall-hung toilet, and L20-E electronic faucets were selected for their functionality and style, ensuring an exceptional user experience that aligned with the project's design ethos.

The partnership between Roca and the design team was crucial in achieving high architectural and design standards within tight deadlines. The successful integration of Roca's products into Concordia Design reinforced Roca's commitment to quality, service, and its ability to meet the rigorous demands of this ambitious project.

Architect
Alinghi Red Bull Racing

For the 37th America's World Cup, Roca partnered with Alinghi Red Bull Racing and equipped the Swiss team's base facilities in Port Vell with its latest smart bathroom solutions, combining performance and sustainability.

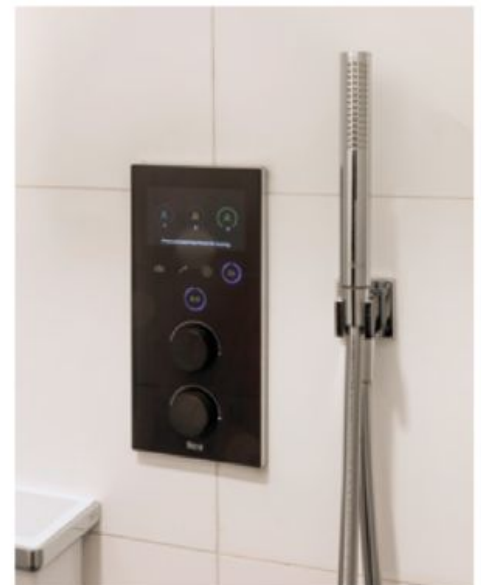

Roca installed advanced toilets, faucets and smart showers, all integrated with Roca Connect, Roca's cloud-based smart bathroom platform. These solutions enabled real-time monitoring and control, helping to optimise maintenance and improve sustainability. IoT sensors captured data on usage and performance, supporting the team's environmentally conscious practices and reducing water and energy waste.

Beyond functionality, the collaboration reflected shared values: innovation, precision and sustainability. Inspired by Barcelona, both Roca and Alinghi Red Bull Racing demonstrated how design and technology can shape a better future – on land and at sea.

The Best Bathroom Experience

Barcelona
Since 1917
79 Production
facilities
5 Continents
20,000 People
170 Markets

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings, we have grown into one of the largest producers of bathroom products in the world.

Our designs are intuitive and intentional, driven by a philosophy of continuous improvement. Our team of experts works with leading international designers to create products that push the boundaries of innovation, refining your bathroom while bringing comfort and simplicity to your daily routine.

Despite our presence in over 170 markets, we have remained close to our Barcelona roots, contributing to and drawing inspiration from its vibrant design culture. Our products are designed for efficiency and durability, and sustainability is ingrained in everything we do – from sourcing materials to production, logistics, packaging and shipping.

Beyond our products, we address critical challenges through We Are Water foundation, promoting sustainable water management and improving access to clean water in disadvantaged communities. We are also committed to fostering talent and creativity. Our design competitions provide opportunities for emerging designers, while our Roca Galleries and digital platform rocagallery.com host events, discussions, and feature articles on key global issues. As a leading multinational, we participate in key international events including Salone del Mobile, ISH, Expo Revestir, KBC and BDNY, sharing our values of innovation, sustainability, and teamwork.

We celebrate the small, everyday moments of domestic happiness. At the heart of our business is the desire to develop attractive and functional solutions that make people live the best bathroom experience.

Our Planet

Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That's why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home – whether our own or the planet we all share – should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

EcoDesign

Eco-designing for efficiency and circularity: fostering products that are built to last, repairable, and recyclable.

We create long-lasting products with easy-to-replace parts, ensuring extended usability and reducing waste.

Our Life Cycle Assessments (LCA) and Environmental Product Declarations (EPD) provide transparency on our products' environmental footprint.

We design products for easy disassembly and recyclability, such as 100% recyclable shower enclosures, fostering responsible waste management.

Our innovative technologies reduce water and energy consumption, supporting sustainable building certifications such as LEED and BREEAM.

Responsible Production

Preserving natural resources goes beyond using water efficiently. It begins with sustainable production.

We are moving towards emission-free factories with pioneering technologies, including the world's first electric tunnel kiln for sanitary ceramics, aiming for net-zero emissions by 2045.

We rely on renewable energy sources, including Power Purchase Agreements (PPAs) and on-site photovoltaic panels, to minimize our carbon footprint.

Our water neutrality roadmap focuses on reducing, reusing, and recycling water to minimize freshwater consumption.

We reintegrate manufacturing byproducts like chamotte and brass swarf into our production and promote waste reuse across industries to minimize landfill waste.

Commitment to society

Enhancing people's lives and building a healthier, more inclusive, and sustainable future.

We develop solutions for people with functional diversity, reduced mobility, and special needs to ensure comfort, independence and dignity.

Our products and services are designed to promote wellbeing, self-care, and a healthier lifestyle.

Through the We Are Water Foundation, we strive to improve access to clean water and sanitation for those in need.

Through Roca Galleries, we promote global dialog that inspires sustainable design, architecture, and urban planning.

Protecting our home means safeguarding our people and our planet

Our commitment is to create products that bring comfort, and balance to your home, while protecting the planet we all share.

Our EcoVadis Platinum Medal for outstanding sustainability performance places Roca Group among the top 1% of over 150,000 companies assessed globally.

We are committed to taking action for the Sustainable Development Goals as proud members of the United Nations Global Compact.

Every Drop Counts

Our commitment to supporting sustainability empowers users to save water and energy without sacrificing comfort or performance. This is evident in everything from clear labelling that guides responsible choices to advanced solutions that reduce daily consumption.

Water label

Sustainable architecture and design play a fundamental role in shaping the future of our built environment. Water conservation is a top priority and many of our products are registered with the Unified Water Label. This European scheme identifies water-saving solutions that, when installed and used correctly, can help save water, energy and money. Identifying products with the Unified Water Label makes it easier for consumers to choose high-performance, water-conscious options.

Water-saving innovations

Advanced water-saving and energy-efficient technologies are integrated across our product range. From dual-flush cisterns and Cold Start faucets to thermostatic showers, flow limiters and sensor-activated faucets, each innovation is designed to reduce consumption without compromising on comfort. Technologies like Roca Rimless® Vortex and smart showers further ensure optimal performance while minimising water use.

Green Building Certification Standards

Green building certifications provide reliable frameworks for evaluating sustainability in architecture. These standards help to reduce the environmental impact and improve building performance throughout a building's life cycle, while supporting ESG goals.

Global construction is thriving, and environmental certifications are helping to create an essential framework for better building. Certified sustainable buildings have proven their success across environmental parameters including energy use, CO₂ emissions, water consumption and solid waste, as well as creating economic and social improvements for communities.

Environmental certifications for buildings provide reliable frameworks for evaluating sustainability in architecture. These standards help to reduce the environmental impact and improve building performance throughout a building's life cycle, while supporting ESG goals.

The worldwide demand of raw materials and energy has not stopped to increase for several centuries. The building and construction sector has a considerable contribution to the global environmental impact of human activities. More than 40% of total energy consumption in Europe corresponds to this sector, as well as 30% of the use of raw materials. It is also the responsible sector of more than a third of greenhouse gas emissions, in the developed and emerging countries.

The household water consumption can oscillate between 125 and 225 liters per person and day, from which around 65% is destined in the bathroom space. With appropriate saving devices, a home of 4 people can save between 20% and 50% of water consumption, equivalent to more than 150,000 l annually.

With eco-efficient measures in production and in use phase of constructive elements, significant improvements in environmental, health and comfort issues can be obtained.

Green building certifications such as LEED or BREEAM have become one of the main players in the transformation of the construction sector in recent years, encouraging designers, owners, constructors and product manufacturers to incorporate increasingly environmentally sustainable solutions and materials.

We work proactively with international environmental certifications for construction to provide objective and verifiable assessment on the environmental benefits of our products.

Roca can provide all stakeholders with the bathroom products to comply with the necessary environmental requirements for their project. From ceramics to faucets, showers and flushing systems, Roca products can have a major impact in improving interior water efficiency and other environmental factors.

In the following QR code you can find summary sheets per product category that organize and verify the information related to water savings, embodied carbon and other environmental impacts, making it easily accessible and traceable.

Scan the QR code for more information.

Recognition for Excellence

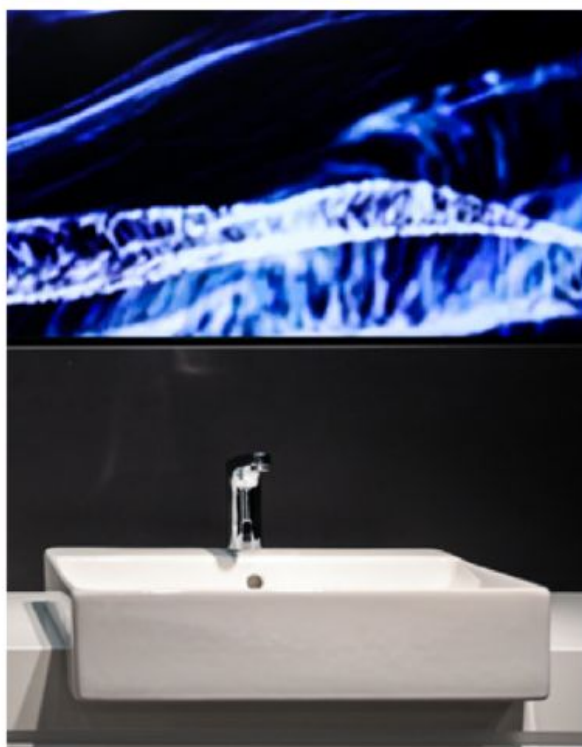

Our designs have been honoured with numerous awards over the years, recognising our commitment to innovation and excellence. From local recognitions to international accolades, our products, innovations and exhibition designs have consistently garnered praise. These awards reflect our ongoing efforts to shaping the future of bathroom design with passion, creativity and purpose.
