

Installation Systems

Roca

A World of Design Options

Roca's installation systems category brings together innovation, versatility and aesthetic refinement to elevate the modern bathroom experience. Designed to support a wide range of styles and requirements, Roca offers both the Duplo S and Duplo One systems, compatible with an extensive selection of wall-hung and floorstanding toilets, including smart toilets. Whether for renovation or new-build projects, these solutions offer easy installation, compact formats and exceptional reliability.

At the heart of this offer are the PS and PL flush plate collections – distinct in design yet united in purpose. While PS plates highlight contemporary style and advanced cable actuation technology, PL plates feature mechanical operation and a more traditional look. Both ranges are available in a variety of finishes and formats to suit every aesthetic and project specification.

Together, Roca's installation systems, flush plates and special frames combine form and function, supporting architects, designers and installers in creating efficient, stylish and long-lasting bathrooms. With attention to detail in both performance and design, this category is engineered to meet the demands of today and tomorrow.

Innovation Meets Precision

With over 80 years of experience, our Pre-Wall Installations Competence Center is a hub of engineering excellence. Based in Germany, it combines technical precision, innovation and manufacturing expertise to deliver high-performance solutions that respond to today's building challenges.

Engineering Excellence Behind the Wall

True innovation starts with strong foundations. The Pre-Wall Installations Competence Center plays a key role in driving engineering leadership within Roca Group. Its impact goes far beyond product development – it defines technical standards, transfers expertise, and nurtures a shared culture of precision and performance. Within its state-of-the-art testing and production facilities, ideas are engineered, validated and transformed into reliable, scalable solutions. With every process certified “Made in Germany,” the Competence Center sets the benchmark for installation systems across the Group – ensuring quality and consistency where it matters most: behind the wall.

Built on Experience

Founded in 1945, our Installation System Competence Center has evolved from a local manufacturer into an internationally recognised leader in sanitary technology. With over eight decades of expertise, we have built on a tradition of excellence and have developed pioneering in-wall and installation systems.

Innovation with Purpose

From the first plastic cistern developed, to the launch of the 4-litre cistern and dual-flush technology, our legacy of innovation reflects a clear goal: greater efficiency and smarter use of water. Every product is developed in-house, allowing us to optimise each component – from fill valves to in-wall systems – for functionality, sustainability and smart design.

Reliability that Lasts

Our commitment goes beyond installation. With industry-recognised quality and a 25-year guarantee on the availability of spare parts for key components in our concealed cisterns, we offer long-term confidence and support – ensuring lasting value behind the wall.

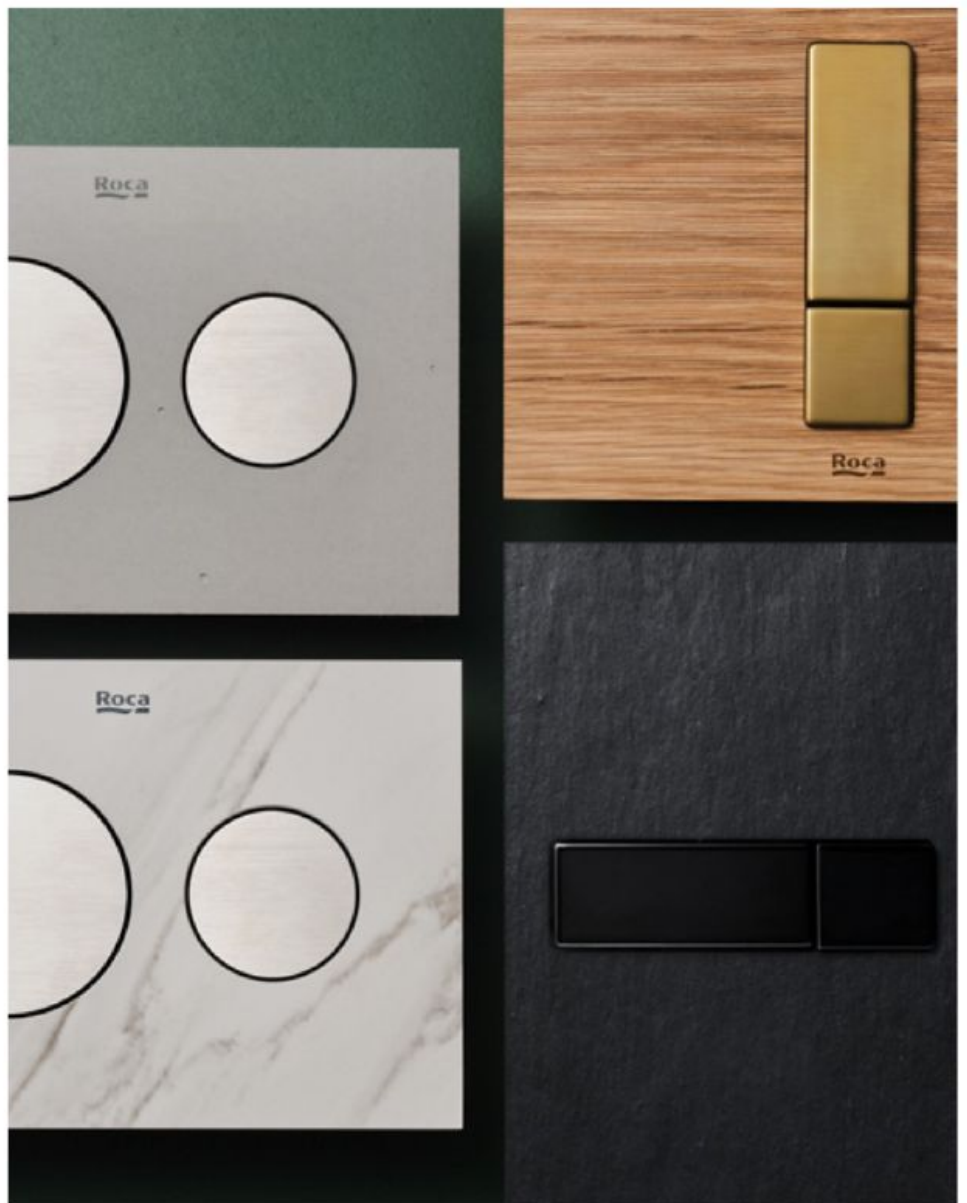

Performance by Design

As part of the Roca Group, SANIT contributes decades of engineering expertise and product development to our installation systems. Every detail – from flush plates to mounting structures – is precision-engineered and rigorously tested to meet international standards. Certified processes and the use of sustainable materials ensure long-lasting performance and responsible manufacturing.

Flush Plates

Designed
to be seen,
engineered
to perform

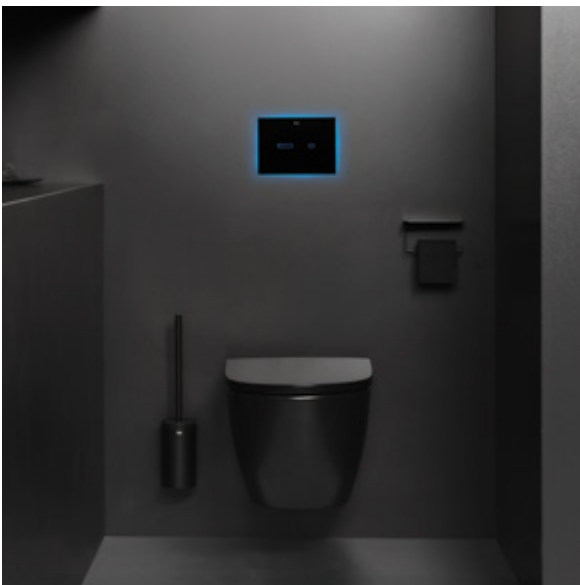

Flush plates are the visible interface of the installation systems – where design, function and user experience converge. More than just a finishing element, they reflect the precision behind the wall while adding a tactile and visual dimension to the bathroom space. Available in a curated selection of materials, textures and finishes, Roca's flush plates respond to evolving interior trends without compromising technical performance. From mechanical to touch-free electronic models, every detail is developed for intuitive use, hygiene and long-term reliability.

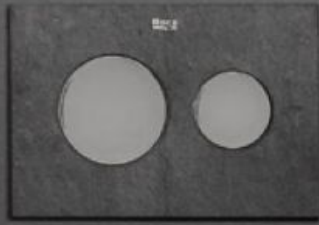

Roca's flush plates are designed to offer limitless design possibilities through a wide variety of finishes, enabling the creation of personalised and expressive bathroom spaces. Combining elegance with durability, they feature premium options, including PVD finishes in brushed brass, rose gold, titanium black and stainless steel. They also include bold colour options inspired by the Nu faucet range, or classic black and white for timeless appeal.

For those seeking material-led design, PS plates also come in distinctive finishes like glass, ceramics, wood, concrete, and slate. These tactile options bring warmth, texture, and character into the bathroom, offering a refined balance between natural inspiration and modern sophistication.

Beyond visual appeal, customisation plays a key role in creating a unique bathroom experience. With a variety of finishes, button styles and configurations, each flush plate can be tailored to suit individual preferences, offering a harmonious blend of personal expression and seamless integration.

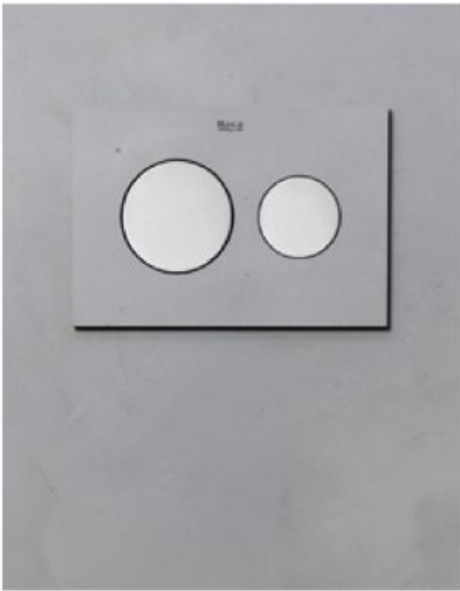

PS Plates

PS flush plates offer efficient performance via cable technology and enable a bespoke bathroom look with a range of versatile styles, premium finishes and touchless options. This range, the perfect match for Duplo WC S, is unique in offering a customisation option: mix and match designs, materials and button colours to create a truly personalised flush plate.

PS Features

Small Flush Plates

A new range of smaller flush plates available in a variety of textures, colours and materials.

Modern Choices

An extensive selection of design options.

Cable Technology

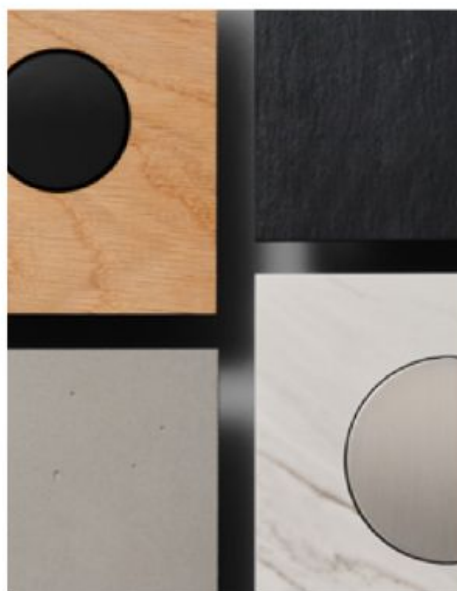

More and varied designs, easier installation and an actuating force below 25N.

Electronic Version

Features include touchless automatic flushing, seven light colours, hygiene flush and Roca Connect connectivity.

Expanded Finishes

A wide range of finishes, including luxurious PVD colours, vibrant hues from the Nu collection, and an array of attractive material finishes.

Urinal Solution

Available for both mechanical and electronic plates, the urinal plates version comes in mains-powered and battery-powered options. There is also the possibility to upgrade from a mechanical to an electronic plate.

Minimalist design, reliable flush control

With a discreet shape, the PS1 flush plate blends seamlessly into minimalist spaces. Its clean geometry reflects functional simplicity, bringing clarity to contemporary interiors. Perfect for understated designs where form meets subtle performance.

PL Plates

PL flush plates combine a streamlined design with practical functionality, providing the ideal complement to Duplo One installation systems. With a modern aesthetic and a wide range of finishes, PL plates can be used in a variety of bathroom styles.

PL Features

Variety of Designs

A wide range of well-designed flush plates is available to offer a style to suit every taste. These models have been present in the market for years, standing out for their reliability, performance, and consistent demand among installers and consumers.

Multiple Finishes

Elegant finishes – including standard, matt, glass and PVD – designed to enhance any bathroom setting with a touch of sophistication and versatility, adapting seamlessly to both classic and contemporary styles.

Electronic Plates

A comprehensive selection of electronic plates for all environments, whether public, semi-public or private, is available. From basic functionality to advanced features including touchless operation, automatic flushing, and Roca Connect connectivity.

Easy Plate Assembly

PL plates can be installed and dismantled easily and intuitively without the need for tools.

Soft Touch and Short Run

The plates have been designed to activate the flush when a force of under 25N is applied, which is well below the norm requirement, and with a run of under 10 mm.

Essential form, effortless function

Defined by geometric simplicity, the PL1 stands out for its clean lines and traditional finishes that suit minimalist, timeless interiors. As the first model in the range and a long-standing bestseller, the PL1 has proven its reliability and enduring appeal. A practical and discreet solution for efficient bathroom design.

Duplo Systems

Innovation
behind the
world

Duplo combines advanced engineering with everyday convenience. Compatible with all Roca toilets – including smart models – Duplo S and Duplo One offer water-saving dual flush options, tool-free plate installation, silent operation and compact design. With multiple frame types and customisable features, these systems ensure adaptability, comfort, and top performance across all wall types.

Designed to suit a wide range of bathroom configurations, the Duplo S installation system offers unparalleled versatility and innovation. Whether renovating or building from scratch, these systems ensure seamless installation and easy maintenance, providing the flexibility to create a bathroom that is both visually stunning and highly efficient. They are also designed to work seamlessly with PS flush plates, ensuring cohesive integration and design continuity.

The Duplo One installation systems are engineered for strength, simplicity and long-lasting performance. Providing a durable and discreet solution for wall-hung and back-to-wall toilets, they are easy to install, offer outstanding load resistance, and are fully compatible with Roca's wide range of flush plates. The compact cistern design allows for maximum space optimisation in bathrooms of any size.

Roca

Duplo WC S

Duplo WC S is a top-of-the-range installation system with small, slim plates. Available in a variety of new finishes and colours, it is fully compatible with all Roca toilets. This silent, water-saving solution uses cable technology to ensure a soft touch and quick and easy plate assembly without the need for additional tools.

Duplo WC S Features

Versatile Solution

A highly adaptable installation that guarantees seamless compatibility with all Roca toilets. The Duplo WC S can accommodate various installation configurations, including standard, compact, under window and smart models.

Quick and Easy Installation

Designed for convenience and maximum efficiency, the Duplo WC S offers a range of features that simplify the installation process:

- Cable technology for fast plate assembly without tools
- An easy height adjustment mechanism with a brake system for precise adaptability
- Easy adjustment of the position and angle of the outlet pipe
- Easy adjustment of the feet using a rotation system
- Quick wall fixations, design with micro-steps for perfect and easy adjustment

Efficient Water Management

Advanced water-saving technology provides precise control over flushing volumes, offering 6/3 l, 4.5/3 l and 4/2 l options to suit individual needs. It also includes a flow manager system to maximise control of water speed.

Maximum Comfort

Designed with user comfort in mind, the Duplo S features innovative cable technology for quiet and soft-touch operation. With a noise level of less than 20 dB(A), it meets EU standards for acoustic levels and is classified as Class I in EN 14124.

Adaptable and efficient installation system

With its improved frame and flexible connection options, it suits a wide range of installation needs and offers a practical solution for contemporary bathrooms. Designed for quick and easy installation, the Duplo WC S ensures efficient water management while providing users with maximum comfort. A smart choice that combines functionality with modern bathroom design.

Duplo WC S

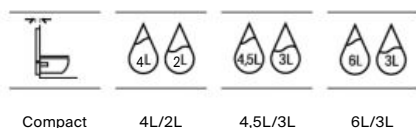

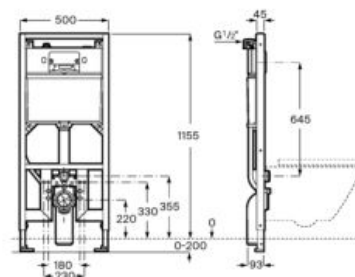

Duplo WC S Compact

Built-in structure with compact dual-flush cistern for wall-hung WC, minimum depth of 90 mm. Axial distance of 180 and 230 mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Top water inlet (accessible for top and lateral pipe connection). Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included).

Duplo WC S Smart Compact

Duplo WC S Smart Compact. Built-in structure with compact dual-flush cistern for Smart Toilets and installation accessories, inlet flexible hose and corrugated tube, installation minimum depth 90 of mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable height feet from 0-200 mm with braking system. Top water inlet (accessible for top and lateral pipe connection). Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included)

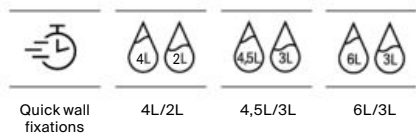

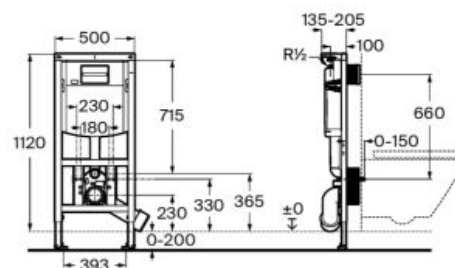

A8900A8020

Duplo WC S Standard

Built-in structure with dual-flush cistern for wall-hung WC, installation minimum depth of 135 mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable height feet from 0-200 mm with braking system. Top water inlet (accessible for top and lateral pipe connection). Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included).

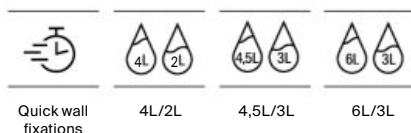

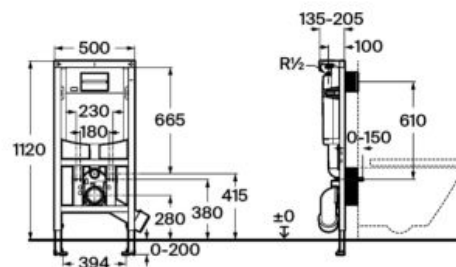

A8900A912E

Duplo WC S Accessible

Built-in structure with compact dual-flush cistern for wall-hung WC, installation minimum depth of 135 mm. Wall hung WC installation 50mm higher. Axial distance of 180 and 230 mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable height feet from 0-200 mm with braking system. Top water inlet (accessible for top and lateral pipe connection). Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included).

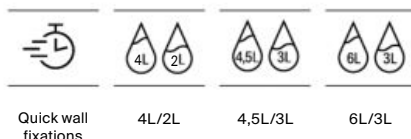

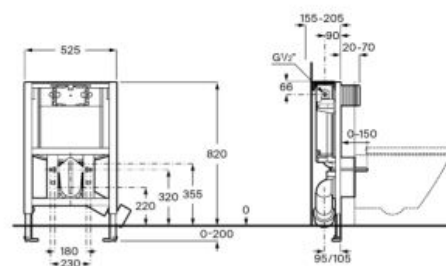

A8900A90DE

Duplo WC S Underwindow

Low height built-in structure for toilet with dual-flush cistern for wall-hung WC, installation minimum depth of 155 mm. Elbow Ø90/Ø110. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Lateral water inlet. Allows front or top activation. Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included).

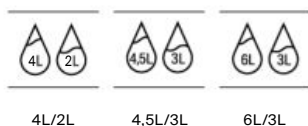

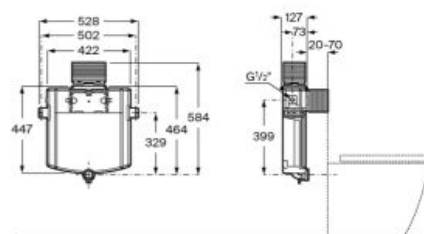

A8900A2020

Basic Tank Underwindow

Low height concealed cistern for single floorstanding toilets with dual-flush cistern, installation minimum depth of 155 mm. Lateral water inlet. Allows front or top activation. Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PS operating plate (not included).

A8900A2200

Duplo WC One

The Duplo WC One is a versatile and innovative installation system that can be adapted to suit a wide range of sites and toilet types. Offering ease of installation and smart functionality, it features height-adjustable frames, tool-free mounting of the flush plate and configurable dual-flush settings. The Duplo WC One meets the highest acoustic standards and offers enhanced noise reduction. It is compatible with PL flush plates and delivers performance, reliability and convenience in a single solution.

Duplo WC One Features

Space-Saving

With a space-saving design incorporating all internal components and the cistern and measuring just 80 mm in depth and 460 mm in width, the Duplo WC One provides reduced installation space and more room in the bathroom.

Wider Range

The Duplo WC One is suitable for any site requirement. It features a comprehensive range of toilet installation systems, including smart, compact, under window and freestanding versions, as well as solutions for both wall-hung and back-to-wall toilets.

It is compatible with both wet and dry installations.

Water-Saving

The Duplo WC One features a water inlet valve that opens in a controlled manner to ensure the cistern only refills once flushing is complete. It also has a double float system that guarantees an efficient and correct filling process.

It comes with low-consumption settings (4/2 l, 4.5/3 l, 6/3 l) and flow restrictors for enhanced flushing control.

Maximum Adjustability and Comfort

An insulated cistern reduces condensation and minimises noise levels when being refilled. The inlet valve components and polystyrene insulation have been optimised for noise reduction. Duplo One cisterns can achieve a noise level of less than 20dB in rooms close to the bathroom, earning a Class I classification – the best possible within the EN 14124 standard.

The outlet position can be adjusted precisely with an easy height adjustment mechanism with a brake system.

The Duplo One can withstand up to 400 kg, ensuring exceptional durability and reliability for your installation system.

It includes an easy height adjustment mechanism with brake system for precise adaptability and easy adjustment of the outlet position.

Maximum support, minimum depth

The Duplo WC One is an ideal space-saving solution for bathrooms where every centimetre counts, combining structural strength with a compact cistern. With a wide range of models, it adapts to different wall types and installation scenarios. Designed with safety and user comfort in mind, it is height adjustable and helps save water, making it a smart choice for residential and commercial projects alike.

Duplo WC One

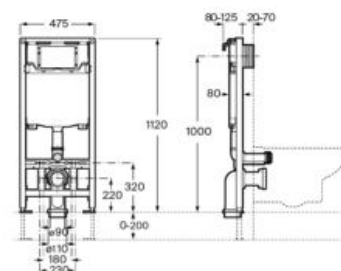

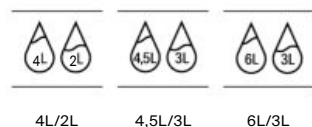

Duplo WC One

Built-in structure with compact dual flush cistern for wall-hung WC, minimum depth of 107 mm. Axial distance of 180 and 230 mm. $\varnothing 90$ / $\varnothing 110$ elbow. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Upper hydraulic connections. To be completed with a compatible Roca flush plate (not included).

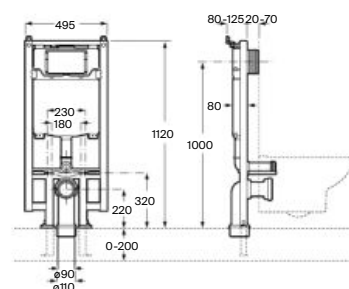

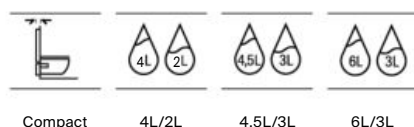

A890070020

Duplo WC One Compact

Built-in structure with compact dual flush cistern for wall-hung WC, minimum depth of 90 mm. Axial distance of 180 and 230 mm. $\varnothing 90$ / $\varnothing 110$ elbow. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Upper hydraulic connections. To be completed with a compatible Roca flush plate (not included).

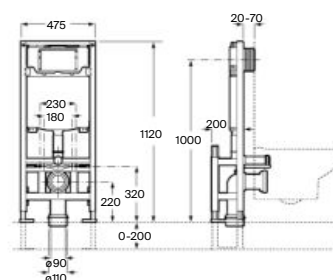

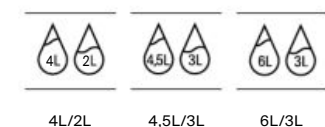

A890073020

Duplo WC One Freestanding

Built-in structure with compact dual flush cistern for wall-hung WC, minimum depth of 200 mm. Axial distance of 180 and 230 mm. No supporting wall is required. $\varnothing 90$ / $\varnothing 110$ elbow. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Upper hydraulic connections. To be completed with a compatible Roca flush plate (not included).

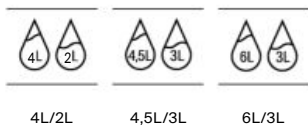

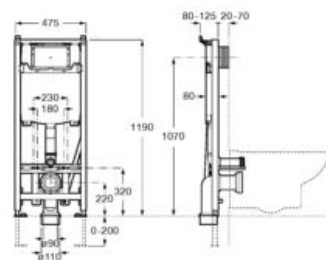

A890077020

Duplo WC One Smart

Built-in structure with compact dual flush cistern, flexible inlet pipe for smart toilets, corrugated pipe and installation accessories, minimum depth of 107 mm, height 1,190 mm and Ø90 / Ø110 elbow. Axial distance of 180 and 230 mm. Recommended for the installation of In-Wash® Inspira / Ona wall-hung WC. Metallic profile capable of withstanding 400 kg. Adjustable feet from 0-200 mm with braking system. Upper hydraulic connections. To be completed with a compatible Roca flush plate (not included).

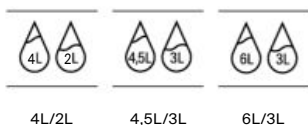

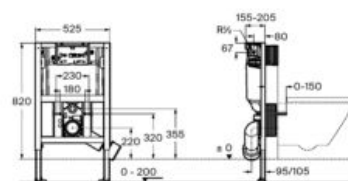

A890078020

Duplo WC One Underwindow

Built-in structure for toilet with dual flush system. Elbow Ø90/Ø110. Metallic profile with load capacity of 400 kg. Installation minimum depth of 160 mm. Adjustable feet from 0-200 mm with braking system. Side hydraulic connections. Flushing mechanism with Dual Cable Technology. To be completed with a compatible Roca PL flush plate (not included).

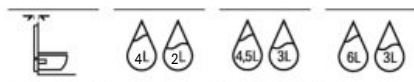

A890072020

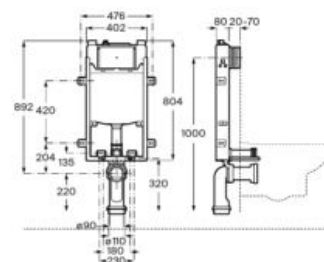

Basic WC One Compact

Frame with compact dual flush cistern for wall-hung WC. $\varnothing 90$ / $\varnothing 110$ elbow. Axial distance of 180 and 230 mm. Minimum depth of 90 mm. Built-in installation in sturdy wall. Top hydraulic connection. To be completed with a compatible Roca flush plate (not included).

A890070120

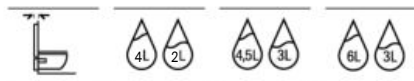

Compact 4L/2L 4,5L/3L 6L/3L

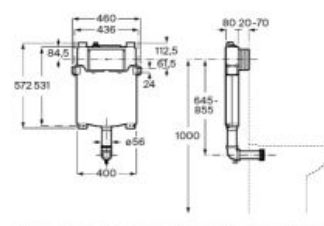

Basic Tank One Compact

Compact built-in cistern with dual flush for single floorstanding WC. Minimum depth of 80 mm. Installation in partition wall with uprights and/or in front of sturdy wall. Top hydraulic connection. To be completed with a compatible Roca flush plate (not included).

A890070200

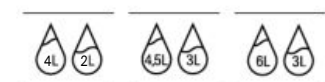

Compact 4L/2L 4,5L/3L 6L/3L

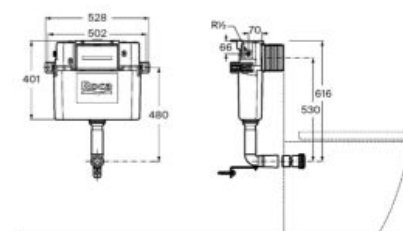

Basic Tank One Underwindow

Built-in cistern with dual flush for single floorstanding WC. Minimum depth of 140 mm. Installation in sturdy wall. Top hydraulic connection. To be completed with a compatible Roca flush plate (not included).

Duplo Special Frames

Robust and versatile support solutions are available for a wide variety of bathroom solutions, including urinals, bidets, basins, toilets with integrated tanks and self-closing flushing systems. Featuring easy height adjustments, durable steel frames and compatibility with accessible design standards, Duplo Special Frames offer stability, safety and a clean finish. They provide a solid foundation for modern, space-saving bathroom layouts, whether for public bathrooms or private spaces.

Reliable support, flexible configurations

The Duplo for urinals offers a sturdy performance and adjustable installation. It includes versions with integrated flushometers and flush plates are available in standard and premium finishes to complete the solution. Robust and long-lasting, it is the go-to choice for commercial and high-traffic applications.

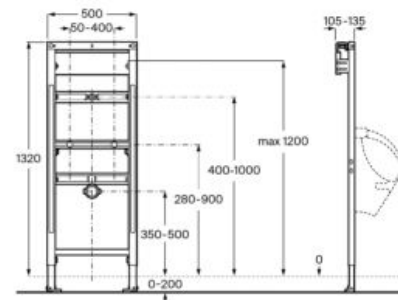

Duplo for Urinals

Duplo S Urinal

Built-in structure for urinal. Installation minimum depth of 105 mm. Metallic profile capable of withstanding 130 kg. Adjustable feet from 0-200 mm with braking system. Adjustable hydraulic connection.

A8900F4100

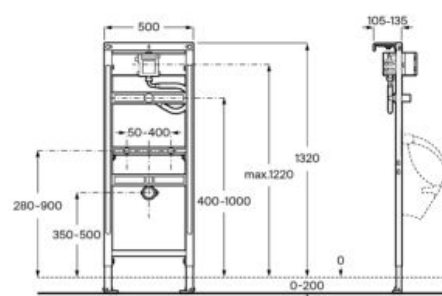

Duplo S Urinal Fluxor

Built-in structure urinal fluxor single flush valve and installation accessories, installation minimum depth of 105 mm. Metallic profile capable of withstanding 130 kg. Adjustable feet from 0-200 mm with braking system. Adjustable hydraulic connection.

To be complete with PS/ EPS urinal

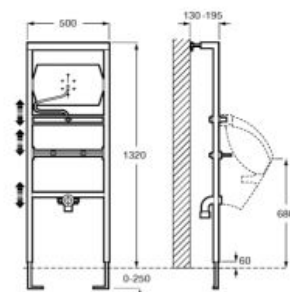

A8900F4200

Duplo Urinal Universal

Built-in structure for urinal. Metallic profile capable of withstanding 130 kg. Minimum installation depth of 140 mm. Installation with uprights and/or in front of sturdy wall. Adjustable feet from 0-200 mm. Heightadjustable hydraulic connection.

A890094100

Integrated design, dependable performance

The Duplo bidet system includes versatile frames for wall-hung bidets, designed to fit shallow walls and ensure full compatibility with any Duplo WC installation. The range includes basic options and more functional solutions, including under-window and compact installation versions. They have a load capacity of up to 400 kg and adjustable hydraulic connections.

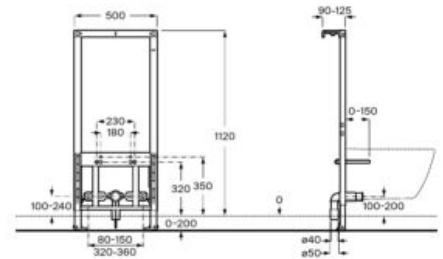

Duplo for Bidets

Duplo S Bidet

Built-in structure for wall-hung bidet. Installation minimum depth of 90 mm. Metallic profile capable of withstanding 400 kg. Installation minimum depth of 140 mm. Adjustable height feet from 0-200 mm with braking system. Adjustable hydraulic connection.

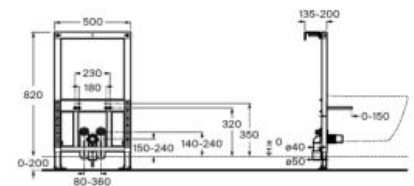

A8900F1200

Duplo S Bidet Underwindow

Low height built-in structure for wall-hung bidet. Installation minimum depth of 155 mm. Metallic profile capable of withstanding 400 kg. Installation minimum depth of 140 mm. Adjustable height feet from 0-200 mm with braking system. Adjustable hydraulic connection..

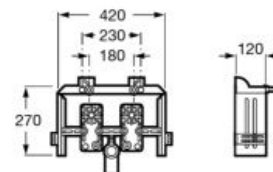

A8900F1201

Basic Bidet

Built-in structure for wall-hung bidet. Axial distance of 180 or 230 mm. Capable of withstanding 400 kg. Minimum installation depth of 120 mm. Built-in installation in sturdy wall. Adjustable hydraulic connection..

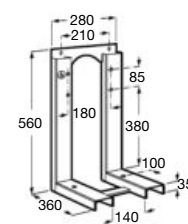

A890091100

Supporting Frame

Supporting L-Shape frame for wall-hung WC and wall-hung bidet with an axial distance of 180 mm. Steel profile capable of withstanding 400 kg. To be installed floorstanding and in solid wall.

A822091001

Slim frame, strong foundation

Duplo basin frames are engineered to support up to 150 kg and are available in slim installation versions. A wide range of user needs are accommodated including reduced mobility requirements by the accessible model with an integrated concealed siphon. An ideal solution for all wall-hung basin configurations.

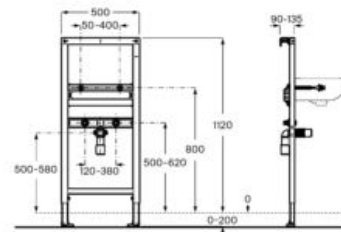

Duplo for Basins

Duplo S Basin

Built-in structure for basin. Metallic profile capable of withstanding 150 kg. Installation minimum depth of 90 mm. Adjustable height feet from 0-200 mm with braking system. Adjustable hydraulic connection.

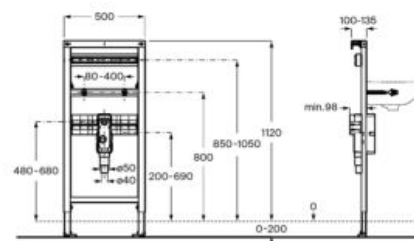

A8900F3000

Duplo S Basin Accessible

Built-in structure for basin, for barrier-free construction with siphon in the wall. Metallic profile capable of withstanding 150 kg. Installation minimum depth of 100 mm. Adjustable height feet from 0-200 mm with braking system. Adjustable hydraulic connection. Includes compact siphon for free-barrier installation.

A8900F3001

All-in-one solution, clean integration

Designed specifically for In-Tank® technology, solution features a cistern integrated into the toilet itself. It enables streamlined installation with reduced depth and fewer components, as no external cistern is required. A space-saving solution tailored to Roca's In-Tank® toilet range.

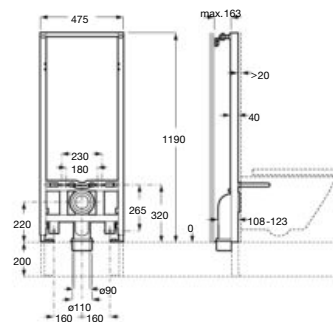

Duplo for In-Tank®

Duplo In-Tank®

Built-in structure with integrated dual flush cistern, minimum depth of 107 mm height 1,190 mm, and elbow $\varnothing 90$ / $\varnothing 110$. Recommended for the installation of In Tank® WCs. Installation in partition wall uprights and/or in front of sturdy wall.

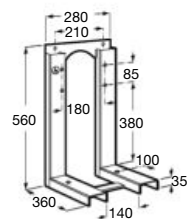

A890078100

Supporting Frame L

Supporting L-Shape frame for wall-hung WC and wall-hung bidet with an axial distance of 180 mm. Steel profile capable of withstanding 400 kg. To be installed floorstanding and in solid wall.

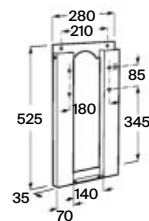

A822091001

Supporting Frame I

Supporting I-Shape frame for wall-hung WC and wall-hung bidet with an axial distance of 180 mm. Steel profile capable of withstanding 400 kg. To be installed in solid wall.

A822091021

Valve-based flushing, wall integration

These frames integrates self-closing WC flush valve systems and offers a sturdy, water-saving solution for high-traffic installations. With both manual and electronic options.

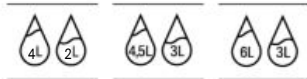

Duplo for Self-closing WC Flush Systems

Duplo WC Fluxor-E (Electronic)

Built-in structure for wall-hung WC with dual flush valve and installation accessories, $\varnothing 90$ / $\varnothing 110$ elbow. Electronic and manual operation. Minimum depth of 140 mm. Installation in partition wall with uprights and/or in front of sturdy wall.

Prefab Systems

**Precision, performance and efficiency for
comprehensive projects**

Prefab systems are ideal for large-scale construction projects that demand high quality results and efficient solutions. Whether for new developments or renovation projects, Prefab systems are especially advantageous in buildings with repetitive layouts and projects that feature multiple units.

**Residential
complexes and
hotels**

**Retirement
residences
and healthcare
facilities**

**Office
buildings**

**Public
institutions**

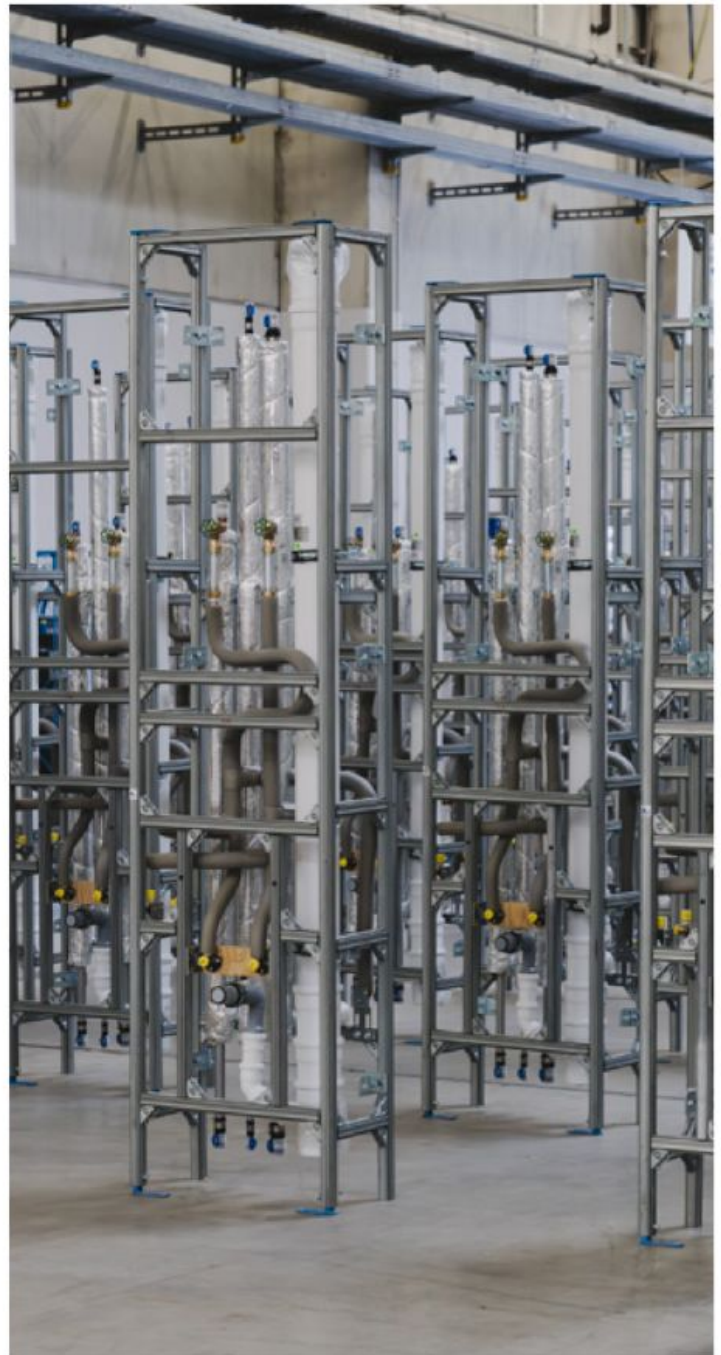

For projects with unique or complex requirements

Thanks to high-standard industrial prefabrication, Prefab systems ensure full compliance with regulations and delivers outstanding performance in critical areas such as fire safety, acoustics, and hygiene.

Fire protection is a fundamental aspect of the Prefab systems. Roca incorporates only premium, certified materials to ensure the highest level of fire safety. For projects with unique or complex requirements, our specialists are available to develop customized fire protection solutions tailored specifically to meet the needs of the entire construction project.

Each construction site has distinct acoustic challenges. Through careful planning and precise coordination of all system components, Prefab systems optimal sound insulation that complies with the strict standards of DIN 4109 and VDI 4100, ensuring a comfortable and quiet indoor environment.

All components within the Prefab systems fully comply with the latest drinking water hygiene standards, providing consistently safe and clean water supply. Additionally, Roca offers comprehensive technical planning support to address any advanced hygiene requirements that may arise during project development.

Project-Focused Benefits

Key advantages at a glance

Assured quality:

- High-quality, regulation compliant components.

Customized

- Individually preassembled components tailored to each project.

Cost-Efficient

- Transparent cost estimates with no hidden fees.
- Reduced labor requirements.
- Potential savings on rental loss thanks to off-site fabrication.

Easy Installation

- All systems delivered ready-to-install in a self-supporting frame.
- Delivered complete with all necessary installation accessories included.
- Accurate budgeting and cost control.

On Time

- Fixed delivery schedule aligned with project timelines.
- Streamlined integration into construction workflows.
- Faster project completion and commissioning.

Reliable Support Team

- Our experts are available to guide you throughout every step of the planning process.
- Comprehensive support and consulting from materials to products and installation.
- A support team that you can trust and depend on.

Our Planet

Our Home

We are committed to putting people and the planet at the center of every decision we make. Because creating a sustainable future starts with the spaces we live in, and how we produce these spaces is key. That's why we craft products that bring comfort, beauty, and balance to your home, while protecting the planet every step of the way.

Every detail matters: from eco-designing products that last a lifetime to minimizing emissions, using clean energy, and reducing water and resource consumption. We believe that a home – whether our own or the planet we all share – should be a place of wellbeing, harmony, and care. This belief guides our comprehensive approach to sustainability, which involves taking a wide range of actions, such as reusing and recycling more, improving our processes, and ensuring access to water and sanitation for those who need it most, among many other initiatives.

EcoDesign

Eco-designing for efficiency and circularity: fostering products that are built to last, repairable, and recyclable.

We create long-lasting products with easy-to-replace parts, ensuring extended usability and reducing waste.

Our Life Cycle Assessments (LCA) and Environmental Product Declarations (EPD) provide transparency on our products' environmental footprint.

We design products for easy disassembly and recyclability, such as 100% recyclable shower enclosures, fostering responsible waste management.

Our innovative technologies reduce water and energy consumption, supporting sustainable building certifications such as LEED and BREEAM.

Responsible Production

Preserving natural resources goes beyond using water efficiently. It begins with sustainable production.

We are moving towards emission-free factories with pioneering technologies, including the world's first electric tunnel kiln for sanitary ceramics, aiming for net-zero emissions by 2045.

We rely on renewable energy sources, including Power Purchase Agreements (PPAs) and on-site photovoltaic panels, to minimize our carbon footprint.

Our water neutrality roadmap focuses on reducing, reusing, and recycling water to minimize freshwater consumption.

We reintegrate manufacturing byproducts like chamotte and brass swarf into our production and promote waste reuse across industries to minimize landfill waste.

Commitment to society

Enhancing people's lives and building a healthier, more inclusive, and sustainable future.

We develop solutions for people with functional diversity, reduced mobility, and special needs to ensure comfort, independence and dignity.

Our products and services are designed to promote wellbeing, self-care, and a healthier lifestyle.

Through the We Are Water Foundation, we strive to improve access to clean water and sanitation for those in need.

Through Roca Galleries, we promote global dialog that inspires sustainable design, architecture, and urban planning.

Protecting our home means safeguarding our people and our planet

Our commitment is to create products that bring comfort, and balance to your home, while protecting the planet we all share.
