

TURIA

CERVEZA TOSTADA
VALÈNCIA 1935

Amber lager

Turia is a sparkling reddish, amber beer with a persistent head and extremely aromatic. In the mouth it stands out for its structure and balance, packed with toasted flavour, citrus notes and excellent freshness.

Why _____ **amber?**

Turia is made from toasted malt, roasted using a similar process to coffee. This ingredient brings Turia its distinctive amber colour with reddish sparkles and notes reminiscent of toasted bread.

Refreshing _____

Simply because it's an amber beer doesn't mean it's strong. Just like toasting a slice of bread, it tastes different but not stronger. The bitterness of the hops and the light citrus and spicy notes make Turia into a fresh beer.

Pairing

Turia is a fresh beer with a good presence in the mouth in which hints of toasted cereals predominate.

Its aromatic richness and lightness make it ideal for pairing with our cuisine along with any kind of tapas and appetisers, especially those with intense flavours.

Source

Valencia, spring 1935

A group of friends who shared a passion for beer got together to create "**Cervezas el Turia**". Halted by the Civil War, they released their first products years later in 1947.

For decades, many households and establishments have toasted with the brewer's brands including **Stark**, **Golden Bier** and today's **Turia Marzën**.

Out of the many varieties, **Turia Marzën** has succeeded in lasting until today because of its genuine character.
