PICTOGRAMS

The following pictograms are used throughout this brochure to help you identify the key features of our products:

Bathroom collections

- 6/3 litre dual flush WC
- 4.5/3 litre dual flush WC
- 4/2 litre dual flush WC
- 6 litre flush
- Waterless
- Compact basin
- Compact WC
- Comfort height WC
- Soft close system
- Rimless WC
- Back-to-wall WC or bidet
- Comfort Height WC
- Products for Children
- Mains powered
- The Water Label
- WRAS approved product

Basins and Furniture

- Push to open
- Soft and self-close (drawers)
- Soft and self-close (doors)
- Soft-close (drawers)
- Soft-close (doors)
- Optional legs
- Compact furniture
- Reversible
- Adjustable shelves
- Opens to the left
- Opens to the right
- Compact basin
- Space-saving waste

Mirrors and lights

- Demister
- With light
- With LED light
- Low energy consumption
- IP44
- Remote Control

Installation Systems

- 400kg weight load
- Easy installation
- Insulated cisterns
- Compact
- Low height
- Easy maintenance
- Suitable for public spaces
- Dual flush
- Eco dual flush
- Quality assured
- 5 Year guarantee
- 10 year guarantee

Brassware

- SoftTurn
- Joystick-Turn
- Cold Start
- Progr-Turn
- E-Tap
- EverShine
- Security 38°
- SafeTouch
- 50% ECO
- QuickReaction
- ECO disc cartridge
- Flow restrictors
- Easy clean
- Spray function
- Rain function
- Pulse function
- AquAir function
- The Water Label
- Ceramic disc cartridge

Commercial

- Doc M
- Products for greater accessibility
- For Kids'
- Max weight load 171Kg
- Max weight load 160Kg
- Max weight load 150Kg
- 6 litre flush WC
- Easy Maintenance
- Complete range
- Reversible
- 6/3 litre dual flush WC
- Waterless
- E-Tap
- Self-closing (non-concussive) taps

Baths

- Grips
- Headrest
- Anti-slip

Shower Trays

- Anti-slip
- Extra slim
- Low level
- Anti-scratch surface

Accessories

- Dual installation
- EverShine®
- Extra strong
- Accessible
- Mounting kit included
- Anti-vandal system
- Easy clean finish
- Extremely tough
- Doc M
- Max weight load 171Kg
- Max weight load 160Kg
- Max weight load 150Kg

Tiles

- Floor tiles
- Wall tiles
- Rectified
- 40% recycled materials
- 80% recycled materials
- Class
- R (9, 10 or 11) International Anti-slip value, ABS: Added anti-slip

the Roca story

1917

Roca Radiadores S.A is established in Gavà, Spain to manufacture cast-iron radiators

Production of cast-iron baths commences

1929

1936

Roca starts to produce vitreous china bathroom products

Production of taps commences

1954

1963

Roca becomes one of the first Spanish firms to supply air conditioning

The Roca Design Centre launches; Roca subsidiaries open in Portugal and France

1970s

Roca: a global company

Roca is a world leader in bathroom spaces and a reference point for design, technology and sustainable development. With its products, the company creates lifestyles all over the world and in different societies. Roca was formed in 1917 as Compañía Roca Radiadores S.A. and was dedicated exclusively to the manufacture of cast-iron radiators for home heating at its factory in Gavà (Barcelona).

In 1925 the first cast-iron boilers were made, and in 1929 cast-iron baths, by 1936 Roca entered the vitreous china sanitaryware sector and in 1954 began to manufacture brassware.

It was in 1963, with the start-up of an air-conditioning factory in Sabadell (Barcelona), dedicated to the production of air-conditioning units, when Roca became one of the first Spanish companies to enter the new climatisation market.

Roca entered the ceramic tiles sector in the 1980s. The establishment of Cerámicas del Foix, which became a subsidiary, marked the start of the current tiling area of the business. In 1989 Roca purchased a vitreous china sanitaryware factory in Portugal.

During the 1980s and 1990s commercial subsidiaries were opened. In 2002 Roca began a process of corporate restructuring of the Group to organise the various areas of business into independent companies.

To carry out this project, the new parent company Roca Corporación Empresarial S.A. was set up. The restructuring process of the company culminated in 2005, with the sale of the heating and air-conditioning businesses in order to concentrate the efforts on the bathroom business, which reached world leadership position in the early months of 2006.

Nowadays Roca is a wholly Spanish family-owned company, present on five continents and is a benchmark for progress, strength and excellence. Its broad commercial network covers more than 135 countries, has 77 production plants and employs approximately 21,000 people worldwide.

1979 — The company begins production of ceramic tiles

1983 — Roca's first international design collaboration: the Aquaria collection is designed by R Oberson

1990 — Italian industrial design icon Giorgetto Giugiaro teams up with Roca to create the Columbia collection

1990s — Roca expands into Germany, the UK and Italy

1999 — Roca acquires Swiss firm Keramik Laufen, the world's fourth largest maker of porcelain bathroom products

2005 — The company sells its heating and air-conditioning business to concentrate solely on the bathroom sector

Today — Roca is present in more than 135 countries around the world and continues to grow its influence in all corners of the globe

Brands: around the globe

The Roca Group includes many prestigious brands around the globe.

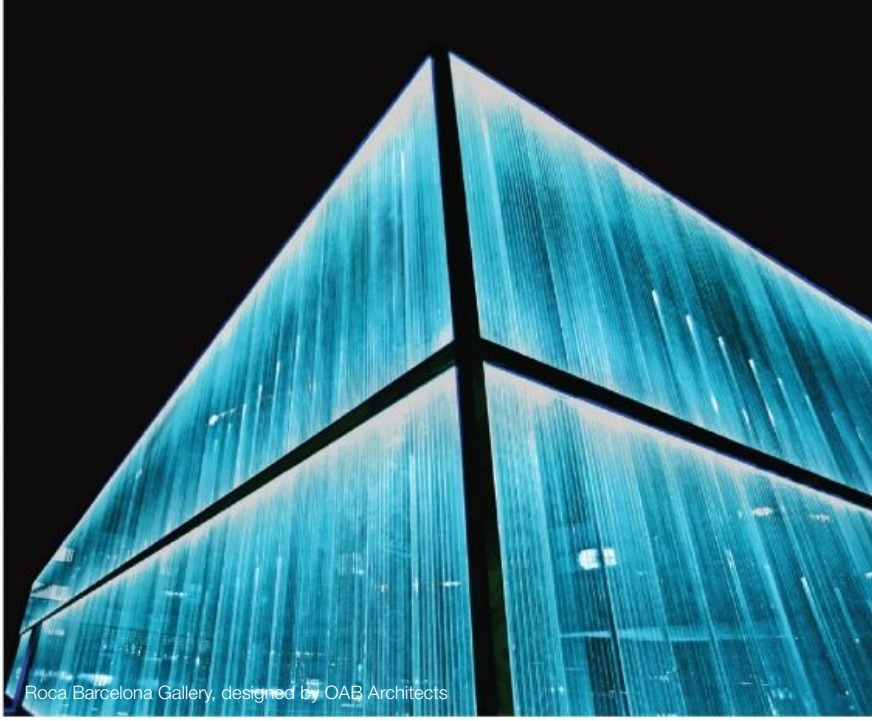
Roca Lisbon Gallery, interior design by Ferruz Decoradors

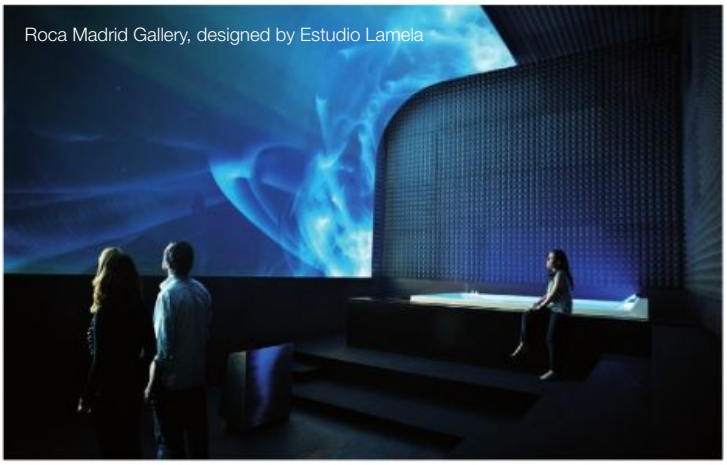


Roca Barcelona Gallery, designed by OAB Architects

Engaging with society

Designed by leading architects, the Roca Galleries are spaces that convey our ethos and spirit. As well as demonstrating our approach to bathroom design through product displays, the inspiring showrooms underscore our wider vision by hosting regular events and exhibitions to stimulate debate about design, architecture and sustainability.

The first Roca Gallery opened in Barcelona in 2009 and was designed by OAB, the studio of prestigious Spanish architect Carlos Ferrater. The award-winning building was the first in a series of flagship Roca showrooms around the world. Since then, we have commissioned other architects of global importance to create spaces in Madrid, Lisbon, London and Shanghai.



Roca Madrid Gallery, designed by Estudio Lamela

Roca London Gallery, designed by Zaha Hadid Architects

Roca Barcelona Gallery, designed by OAB Architects

Roca London Gallery

Design inspiration can be found at the Roca London Gallery, the award-winning space designed by Zaha Hadid, where the product showroom shares its space with exhibitions, professional meetings and events.

Considered a resource centre for the ultimate bathroom inspiration, services available include the support of an in-house interior designer, a mock-up room to envisage products in-situ, and expert product advice from the Gallery team.

As well as the Gallery team, a dedicated specification team is also on hand to help you with product specifications and supply to ensure everything runs smoothly.

Station Court, Townmead Road, London, SW6 2PY

How Roca supports designers and architects

The Roca London Gallery's dedicated team advises and inspires architects and interior designers about the possibilities of bathroom spaces. We have a wealth of resources to help you increase your knowledge of the bathroom and plan your next project, from in-house design support and the expert help of the Roca product team, to the variety of display areas and the use of a mock-up room, a versatile space which allows you to envisage a specific bathroom layout in advance.

cpd Continuing Professional Development

Roca's RIBA and BIID certified CPD programme, including a seminar on the future of the bathroom and an accredited guided tour of the gallery space, can be arranged at your convenience. The gallery is also host to a year-round schedule of cultural events and exhibitions that are open to all and admission free.

See page 9 for more information on the Roca London Gallery

Environmental awareness

We have been committed to preserving and improving our world through sustainable solutions for more than 50 years. In the 1960s Roca responded to the growing concern about climate change with pioneering solutions, such as the reduction in water capacity of WC cisterns.

Water reduction is at the core of our thinking when we are developing new products. The award-winning W+W washbasin and toilet, which saves up to 50% water, and the waterless urinal are just two of our latest innovations.

we are water Foundation wearewater.org Roca ROCA LOVES THE PLANET

EDUCACIÓN SIN FRONTERAS

Oxfam

unicef

We are Water Foundation

We established our not-for-profit foundation in 2010 for two reasons; firstly, to promote awareness and debate about the need for a new culture for water, to ensure the sustainable management of the planet's water resources and, secondly, to actively tackle the problems caused by poor water supply in some of the most deprived parts of the world. The foundation supports co-operative initiatives, such as improving infrastructure and sanitation in schools, undertaken by reputable NGOs and associations including Oxfam, Unicef and World Vision.

To find out more visit **www.wearewater.org**

Certifications

Roca's product quality is availed by several certificates and guarantees, issued by worldwide prestigious organisations. The high sustainability standards, quality and innovation are the base of success of Roca bathroom spaces.

Water Label Many of our products are registered with the Water Label scheme, meaning they have been independently verified as being water efficient.	**Bathroom Manufacturers Association** The BMA provides an independent forum for bathroom manufacturers trading in the UK to properly discuss and debate matters of mutual interest. The BMA acts as an information highway between industry, the Government and the consumer on all issues that affect the bathroom business in the UK.	**CE** The key indicator of a product's conformance with EU law, which permits the free circulation of products within the European market.	**ISO 9001:2008** ISO 9001:2008 sets out the criteria for a quality management system and is awarded to business that have been assessed and met the required standads.	**WRAS** The Water Regulations Advisory Scheme (WRAS), specialises in certifying all products using drinking water.	**KIwa** Kiwa is a Dutch company specialising in the certification of all manner of products using drinking water. Also boasting an office in the United Kingdom, and recognised in many other European countries, it has, since 2001, been certifying compliance with all European standards, guaranteeing products' excellent quality and reliability.

Responding to a changing world

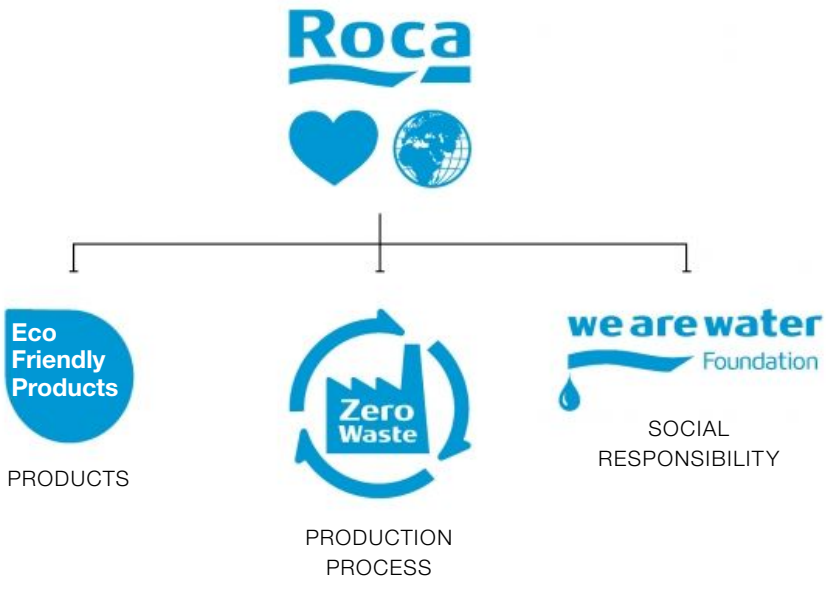
Our processes

The Eco-Roca project has two key goals: to achieve a 25% cut in CO_2 emissions and to work towards waste-free industrial processes via our Zero Waste Programme.

To date we have achieved a 14.9% reduction in gas consumption and 4.6% reduction in electricity consumption – this equates to a reduction of 52,750 tonnes in CO_2 emissions.

These figures are highly significant, as gas consumption represents approximately 90% of the greenhouse gas emissions arising from production processes.

We have also complied with 75% of our Zero Waste initiative to date.



Awards

For quality and Roca design.

2013 Roca In-Tank® Meridian was named a gold winner at the **Designer Kitchen & Bathroom Awards 2013** in the Innovation in Functionality category.

His philosophy is interdisciplinary, ignoring the rigid boundaries that divide the fields of fashion, beauty, culture, architecture and market research.

ARMANI / Roca

Armani/Roca

Collaboration with Armani to produce an exclusive bathroom collection

W+W is a joint project from the Innovation Lab and the Roca Design Centre. W+W combines two fundamental elements of the bathroom, and reuses the water from the basin to flush the WC.

Trend-setting

Almost 100 years old, Roca is devoted to innovation and sustainability in the bathroom.

Roca has grown and evolved since 1917 to become an international leader in the design and production of bathroom spaces, but the 100% Spanish owned company continues to think locally and act globally.

Quality, innovation, design and sustainability are at the heart of all Roca products and responding to society's needs, while understanding the importance of the bathroom as a relaxation space is paramount to Roca.

A HISTORY OF SUCCESS

Originally a cast iron radiator manufacturer, Roca expanded to produce cast iron baths before moving into vitreous china. Now a global leader in designing and producing the bathroom space, Roca has grown, through dedication and expertise, into an international organisation, present in more than 135 countries.

International expansion began when Roca opened subsidiaries in Portugal and France, before continuing to grow and expand in the UK, Germany, Italy, Russia and Brazil, to name a few. Focused on the design and quality of its products, early designs such as Dama-N, Laura and Meridian-N continue to be as relevant now as they were when they first launched. As the Roca brand grew, Roca's status as a brand focused on design and quality increased, and collaborations with prestigious designers began.

In-Tank Meridian WC, with integrated cistern and pure lines.

The We Are Water Foundation's aim is focused on the need of a sustainable management of hydric resources in the world.

Photo Gilles Martin-Raget / Barcelona World Race

Roca's approach to society was fuelled by the creation of the Roca Gallery spaces. Located in Barcelona, Madrid, Lisbon, London and Shanghai, the galleries encourage visitors to view products, and understand the innovations and values of a company committed to sustainability.

THE IMPORTANCE OF WATER

Proud of its trend-setting credentials, Roca also prides itself on understanding and anticipating market needs, from residential to public spaces, all of Roca's collections are created to consider design, functionality and sustainability.

ROCA ANTICIPATES THE NEEDS OF ALL

Designed by Zaha Hadid Architects, the award-winning Roca London Gallery hosts social and cultural events, exhibitions and installations while also providing a unique visual and interactive experience.

One example of a Roca product that focuses on environmental innovation is the award-winning W+W, a combined basin and WC, designed to deliver water and energy saving benefits without compromising on aesthetics.

Roca's commitment to water-saving is long standing, by setting up the non-profit organisation, the We Are Water Foundation in 2010. Roca is able to highlight the importance of water as a limited resource and encourage society to have a balanced existence with the environment. The foundation also works in the world's most deprived areas to help people and communities most affected by water shortages.

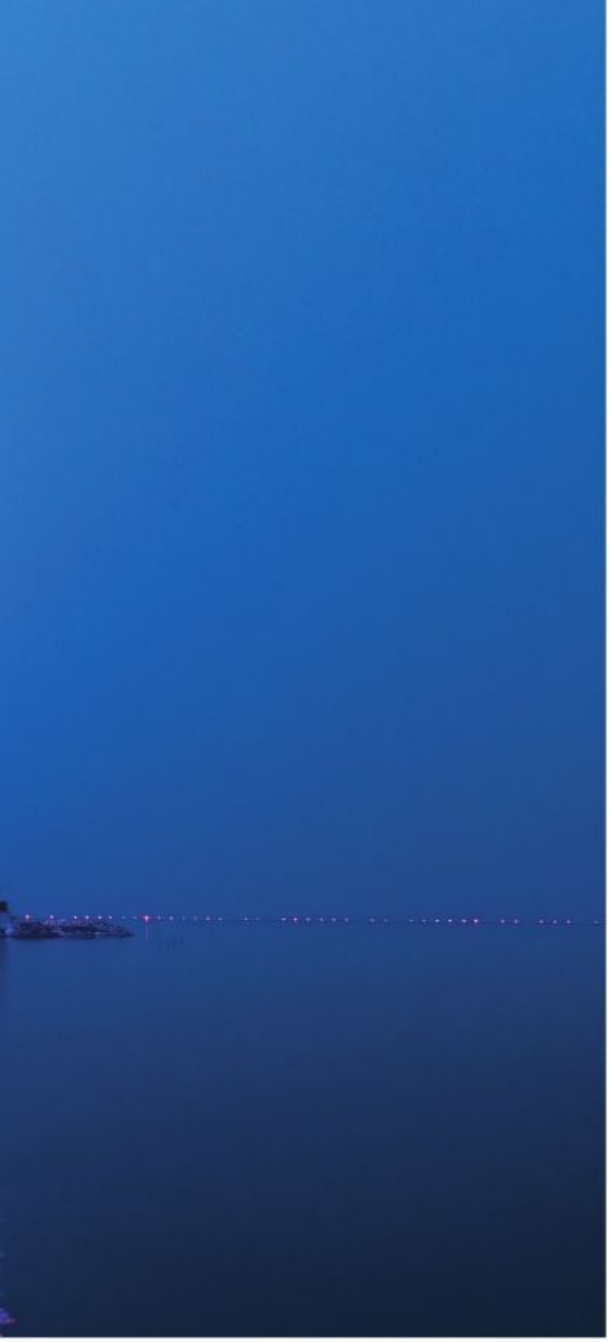
Sheraton Huzhou Hot Spring Resort Hotel,
Huzhou (China)

International prestige

Roca is renowned for its worldwide presence in emblematic buildings.

Luxurious hotels, business centres, theatres… all public buildings that have trusted Roca with their bathroom spaces.

Under the lead of prestigious architecture studio, MAD Architects, Roca has been involved in the recently opened Sheraton Huzhou Spring Resort Hotel in Huzhou (China).



MFC Capital City
Moscow (Russia)

Recognised for its extraordinary architectural structure on the Taihu Lake, the hotel presents luxurious interiors and hotel suites that feature special edition Khroma WCs from Roca.

Roca bathrooms can be found in buildings across the world, from the MFC City of Capitals in Russia, which include Bol and Meridian-N products, to the Bolshoi Theatre in Moscow, which is fitted with Hall, Meridian-N and Dama-N.

Bolshoi Theatre
Moscow (Russia)

Narada Kempinski Resort & Spa Sanya,
Hainan Island (China)

Claridge Hotel
Paris (France)

When it comes to hotels, international chains such as InterContinental trust Roca to create beautiful bathroom spaces for rooms and suites. The avant-garde InterContinental Shanghai installed Bol, Diverta and Continental models.

European cities such as Barcelona, Paris, Obriverca (Portugal) and Rhodes (Greece) are also using Roca products in emblematic buildings. Showing that Roca really is worldwide.

Roca and the Eiffel Tower

Special edition red Roca bathrooms have been fitted in the Eiffel Tower.

Diverta washbasin in Venetian red vitreous china, special edition for the Eiffel Tower.

One of the most recent and relevant international projects for Roca is the renovation of the bathroom spaces within the iconic Eiffel Tower.

Together with the prestigious architecture studio Moatti-Riviere, Roca contributed to the renovation of the most visited monument in the world.

Roca was chosen as the supplier of all bathroom products for the tower. Architect Alain Moatti believes Roca was selected for its values of "design, technology and quality", adding "the range has been chosen for a public space as it can cope with a high and frequent use".

Venetian Red

The first floor of the Eiffel Tower is made up of the Eiffel and Ferrier Pavillions both tiled and fitted with products in venetian red as homage to the original colour of the tower with a fresh, urban twist.

In the first pavilion, Roca's Diverta collection was selected for its straight, elegant lines and sits perfectly with the Meridian-N wall-hung WC, Amberes basin and innovative basin mixer, all selected for the project.

The venetian red colour of the special edition Roca products is a key element in the overall appearance of the project. Architect Moatti states "The red tone is the driving thread of the project. Roca understood it immediately and achieved the exact colour, which until that point did not exist in its portfolio".

Specially conceived for public spaces, the unique red colour of the Diverta basins, Meridian-N wall-hung WCs and Site urinals, together with the electronic Loft-E taps, bring a timeless style to the space.

The success of the collaboration between Roca and Moatti-Rivere is thanks to "Roca's capacity to listen and understand. In terms of design and technology, our relationship with Roca has been based on its adaptability, which has lead to an excellent finish of its products" adds Alain Moatti.

Arcadia

Installation date	August, 2010
Location	Bratislava, Slovakia
Type	Hotel *****

The Arcadia hotel is the only 5-star hotel in Bratisalava, as well as member of Leading hotels of the World. It is a boutique hotel located in a historical building carefully refurbished constructed just by the walking area in the city center. It has luxury, executive rooms, junior suites, as well as Maisonette rooms and Maisonette deluxe rooms - apartments of two floors with a fireplace.

Rafayel on the Left Bank

Installation date	January, 2010
Location	London, United Kingdom
Type	Hotel *****

Rafayel on the left Bank is part of Battersea, the impressive and awarded Falcon Wharf development. The acclaimed by critics steel, glass and wood building, designed by the architect James Burland provides an appropriate spot for Rafayel on the left Bank. One of the first luxury hotels in the world with environmental conscience, Rafayel on the left Bank shows that hotels can adopt green technology and minimize the environmental impact without losing the luxury 5-star status, the quality or the comfort offered. The inclusion of the latest technological advances in lightning, air conditioning, efficiency and VDA rain water collection allows the hotel to reduce the carbon footprint by an amazing 20%.

W-Barcelona

Installation date	October, 2009
Location	Barcelona, Spain
Type	Hotel *****

The W hotel Barcelona, also commonly known as “Vela” (Sail) lies within the enlargement of the southern area of Barcelona port. Designed by Ricardo Bofill architect, and part of the Starwood Hotels and resorts chain it reaches a 99 m height, being a highlight in the Catalan coast horizon.

It offers a contemporary lifestyle experience, together with a wide range of services such as the first Spanish Spa Bliss® (the trendier New York spa), a restaurant in the second floor with unparalleled views of the Barcelona coast beach, an elegant bar in the rooftop from Ignite Group, a night life guru headquartered in London, and the W house salon.

Solutions for public spaces:

Multifunctional Complex Capital City

Installation date	May, 2011
Location	Moscow, Russia
Type	Office building

The Multifunctional Complex Capital City captures the innovative and modern style of Moscow city, with a contemporary combination of elegance and comfort. The project of the office complex and of the two 73 and 62-storey towers, named after Moscow and St Petersburg cities, has been designed by the American Architectural Agency NBBJ. The rectangular towers displace around their axis in the technical plants level, creating the visual effect of movement.

The geometry and technical precision provide structural resistance and allow creating wide apartments with panoramic windows.

Finochietto

Installation date	December, 2012
Location	Buenos Aires - Caba, Argentina
Type	Hospital

Constructed by AFS Architectos Architecture Studio.

Located in the heart of the medical district of Buenos Aires city, the new Finochietto Sanatory – owned by ASE – will have 12 floors and a total of 14,600 square meters in Cordoba and Ecuador Avenue. The construction area was widened with the acquisition by the ASE of boundary spaces and with the work advancing by phases. Its opening is expected by the third quarter of 2013.

It will have 130 individual rooms for general interns and some other 27 individual rooms in the adults' intensive care areas. It will have six surgeries, three of them "intelligent". The obstetrics sector will have two labor rooms, two obstetric surgeries and two pre-labor rooms. It will also have at its disposal 16 places destined to intensive neonatal intensive care.

The Project was developed by watching the functional needs of the assistance activity in advanced institutions. The most modern concepts of eco-sustainability have been taken into account, which will put the Finochietto Sanatory in the avant-garde of hospital engineering and architecture. The efficient use of energy and the decrease of the environmental impact are working axes, key in this new project.

Mineirão Stadium

Installation date	December, 2012
Location	Belo Horizonte/MG, Brasil
Type	Sport facility

Mineirão Stadium - Estádio Governador Magalhães Pinto
The stadium will host 6 matches during the World Cup of 2014 and has a capacity for 64.000 people. It has 2.569 parking places, a Brazilian football history museum and a commercial area of 7.000 m .

Indira Gandhi International Airport

Installation date	December, 2008
Location	New Delhi , India
Type	Airport

One of the most exclusive and technological airports in the world it has increased its capacity of 15 to 37 million passengers per year. The airport is being designed to have a capacity of 100 million passengers per year. The project of 450,000 m2 includes the existing international airport remodeling and the construction of the new T3 terminal. It is equipped with 740 bathrooms.

Beijing Olympic Village

Roca was the company chosen by the organisers of the Olympic Games, as our products meet stringent requirements relating to water conservation. Accommodation in the Olympic Village, which housed the 16,000 athletes participating in the 2008 Olympic Games, was characterised by its use of renewable energy such as solar power which supplied part of the lighting, and by other environmental features such as the collection and recycling of rainwater.

Products installed in the Beijing Olympic Village

Roca Benefits

- Product characteristic
- Product benefit
- Sustainability benefit

Roca is constantly innovating in design and new technologies so that its products keep being a worldwide reference in the bathroom experience.

Vitreous China

Dual flush cisterns

Watersaving double button to choose between a 6/3 l, 4.5/3 l. and 4/2 l. flushing volume of water.

Compact toilets and Comfort height toilets

WC with reduced measure for reduced spaces or small bathrooms and to help people with reduced mobility.

Back-to-wall

Back to wall WCs and bidets facilitate the cleaning and avoid dirt to build up at the WCs back.

Compact basin

Washbasins with reduced measures for reduced spaces or small bathrooms.

For children

Adapted to children's measurements to make them easier to use.

Accessible

Adapted products to aid mobility and to assist people with disabilities and reduced mobility.

Seat and Covers

Soft-close system

The WC lid with soft-close system avoids shocks and breakages.

Furniture

Push to open

Gently pressing the centre of the drawer or door facilitates the opening and closing process.

Soft-close (drawers)

Thanks to this slow closing system, drawers will close softly and slowly, for extended product durability.

Soft-close (doors)

Thanks to this slow closing system, doors will close softly and slowly, for extended product durability.

Right opening

Right opening door

Left opening

Left opening door

Reversible

Thanks to this system, the door can be opened to the right or left with just one turn.

Furniture unit that can be installed with legs

The set of optional legs is specially designed to install the unit on thin walls, so that it can be better secured.

Reduced depth unit

The solutions with reduced depth are ideal for making the most of small areas.

Height-adjustable shelves

The internal shelves may be placed at different heights, so that there are no space limitations.

Space saving syphon for compact units

It allows to maximise the available space for storage.

Mirrors

Demister foil

The mirror incorporates a demister foil as standard, an element which prevents the mirror from steaming up, reduces the need for cleaning and protects against corrosion.

Lighting

The product includes lighting as standard.

Lighting

With LED technology

The LED technology guarantees minimum consumption and thus great energy savings.

Low consumption

Lighting with low energy consumption.

Accessories

Dual fastening

The product allows to be installed with adhesive assembly or assembly using screws.

Mounting

Includes everything you need to install with either screws or adhesive.

High resistance

Resistance to a static load of up to 5 kg through adhesive fixation.

Durable chrome finish

Guarantees a long-lasting chrome plating which can be easily cleaned.

Easy Clean

Products feature an easy to clean finish.

Accessible products

A product specially designed for people with reduced mobility.

Anti-vandal system

Hidden fixations which require a special tool to remove provide an anti-theft protection

Extra strong

Bears a static load of up to 5kg when installed using adhesive

Roca Benefits

- Product characteristic
- Product benefit
- Sustainability benefit

Roca product innovations allow you to reduce water consumption, providing savings in to the overall consumption of the building, contributing to a more efficient and sustainable environment.

It is possible to obtain water consumption reductions up to 77% in faucets, through single-lever, electronic control and self-closing options. Other options include aerators and integrated water flow limiters and even energy saving through the 50% water flow limiter in thermostatic faucets.

Brassware

EverShine®

The beauty of the hard-wearing chrome-plated finish of Roca taps is thanks to the innovative EverShine® system which involves an electrolytic coating. This guarantees that each tap will continue to shine over the years and also makes cleaning easier.

SofTurn®

As the cartridge is the heart of all taps, Roca have equipped the cartridges with SofTurn® technology so that you can achieve the highest levels of control, precision and comfort when selecting your desired water flow and temperature. The development of this exclusive technology has been possible because Roca are one of the few faucet manufacturers to design, develop and make our own cartridges.

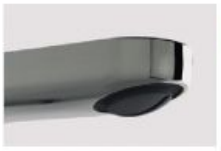
50% Water & Energy Saving "CLICK®"

An exclusive technology developed by Roca for its faucets to save water and energy. Our exclusive "Click ®" safety system helps to directly limit the flow of water, forcing the lever upwards only if a greater flow rate is required. It also features an internal disc that, when turned, sets the temperature field (energy saving). Water and energy savings.

Cold Start

Roca's innovative cold water start system. The lever cannot be raised to the right, and so must always be raised frontally, with cold water. If turned to the left, hot water is gradually obtained.

Brassware



6 - 7 - 8 - 9 l./min.

Roca faucets feature a latest-generation flow limiter that permits extra water savings.

Electronic basin mixer

Cutting-edge technology for electronic faucets, based on the automatic on/off, providing reliability, durability and water and energy saving. Specially recommended for public spaces.

ECO 50% water saving system

Roca's thermostatic faucets are equipped with a green flow limiter button that offers instantaneous water savings.

Accessible products

A product specially designed for people with reduced mobility.

Self-closing

Self-closing brassware is ideal for public spaces as it helps reduce water consumption.

Quick Reaction®

Just the right temperature, without nasty surprises or wasted time or water. Thanks to the Quick Reaction® technology developed by Roca, our thermostatic faucets allow you to enjoy the flow and temperature you desire in less than 3 seconds, as well as keeping it constant.

Brassware

Security 38º ®

Security 38º ® is a safety device (a red button) included in our thermostatic brassware that systematically prevents the water temperature from exceeding 38ºC. Security 38º® means wellness and comfort can be combined.

SafeTouch®

The latest development in materials have allowed Roca to develop its SafeTouch® technology. SafeTouch® stops the chromed bodies of Roca thermostatic taps from becoming hot, thereby preventing burns. SafeTouch® is even more important when there are children around, guaranteeing a pleasant, safe bathroom.

Easy Clean handshower

Anti-limescale system for handshowers for fuss-free elimination of limescale deposits, through the use of soft materials in the jets.

Shower heads

Spray

A powerful water spray, divided up into tiny droplets that stimulate the blood vessels and give the body a revitalising massage.

Rain

The fine water droplets are converted into tiny threads, giving the body a sensation of lightness and pleasure.

AquAir

Water and air are combined to give a soft, foamy sensation for a truly relaxing experience.

Pulse

Intermittent fine jets of parallel flowing water that give the body a revitalising massage.

Baths and shower trays

Anti-slip trays

Treated product to avoid slipperies while in use.

Superslim

Reduced height to facilitate access to people with reduced mobility.

Easy Clean handshower

Anti-limescale system for handshowers for fuss-free elimination of limescale deposits, through the use of soft materials in the jets.

Accessibility

Handles and headrest to facilitate its use and to give comfort.

Anti-scratch surface

Surface has an anti-abrasive, anti-scratch feature

Low level

Tray has no frame and can be installed at floor level for better accessibility

ARMANI / Roca

“When it came to creating this exclusive space with Roca, I imagined a completely innovative concept which would combine practicality and pleasure in a completely effortless and natural way.

A beautiful and harmonious space which would elegantly and subtly combine all the functional aspects of a bathroom, whilst at the same time providing an area of comfort and well-being.

A warm and contemporary atmosphere perfectly combining technology with elegant and sophisticated luxury allowing you to relax and unwind.”

THE CONCEPT

The Armani/Roca bathroom concept is the expression of elegant simplicity and total harmony, both quintessential of Giorgio Armani's unmistakable style, captured in the bathroom space. An integral interior design concept which transforms the bathroom into a space dedicated to the pleasure of the senses.

The Armani/Roca space encompasses wall and floor coverings, sanitary products, accessories and all your bathroom necessities. All these elements combine to project Giorgio Armani's style and ethos for the home into the bathroom area.

As such, the bathroom is converted into a sole entity where fine materials and exclusive finishes, together with technologically advanced solutions, allow the integration of all the essential elements of the bathroom space in one style without compromising the harmony of this atmosphere of emotions and sophistication.

As if it were a work of art or an item of haute couture, the entire collection oozes perfection and expertise not only in the treatment and choice of materials and colours, but also right down to the very last detail.

Besides the traditional distribution of bathroom environments, for the first time, if so desired, the Armani/Roca bathroom collection can take the shape of an island, where all the elements can be arranged into four areas: the Beauty area, the Wellness Bath area, the Wellness Shower area and the Basic Needs area.

BEAUTY AREA

The contemporary, shallow, porcelain washbasins - both countertop and those under counter - integrate perfectly in the collection and have been perfectly designed to allow the water to flow smoothly without splashing, the Water-Flow effect. The waste and overflow are hidden (Hide-Flow technology), eliminating unnecessary visual elements.

The matching faucets, with their control on the edge of the washbasin, are in perfect harmony with the rest of the elements in this area. With an elegant metallic finish they are also fitted with a cartridge (Smart-Flow technology) which saves both energy and water.

The simple, straight lines of the furniture afford this space an elegant and practical ambiance. A wide range of furniture in various sizes with either upper or upper and lower drawer is available for the countertop and under counter washbasins. This furniture can be adapted to any bathroom environment whilst maintaining the philosophy of an Armani space.

Extensive storage space is amplified thanks to the space-saving siphon. The self and soft-close mechanism in the drawers ensures a completely smooth opening and a soft closing. The drawers can easily be personalised with the multi-functional trays.

The furniture for the under counter washbasin has a tinted glass countertop. This is available in the different finishes of the collection for complete harmony.

Every last detail has been taken care of and the mirror is no exception. With lateral illumination and atmospheric lighting at the top and base, the mirror also boasts an electric system which prevents steaming up caused by condensation in the bathroom.

An Armani/Roca bathroom is a space in which all elements have been carefully thought through to be in harmony with each other, including even the smallest accessories; from the wall towel rail, the covered tray and the soap dispenser, to the toothbrush holder, tissue box holder and the soap dish. In addition to this there is a built in vertical cabinet with an adjustable magnifying mirror, hidden electrical outlets, a shelf and courtesy lighting. For those bathrooms that require vertical wall storage with a larger capacity, a wall cabinet in the same finishes has been created. Its single door opens to 180º and it is equipped with elegant optical mirrors.

WELLNESS BATH AREA

This area is especially designed to invigorate. Here you can unwind and relax.

The largest of the comfortable and spacious built-in bathtubs, complete with the soft headrest, is filled through an innovative aperture on the inside perimeter cascading water in on one side. This ingenious Hide-Flow system also acts as an overflow.

As an optional extra, with both the built-in bathtubs and the under-mount bathtubs, choose to enjoy a bath with Champagne Bubbles, bubbles the size and texture of those in champagne, or Water Chromo (aquatic chromotherapy).

As perfect accessories for this area, there is a wall towel rail and a profile shelf, with optional accessories such as hooks and containers.

WELLNESS SHOWER AREA

In an Armani/Roca shower, the daily act of showering is transformed into a sensual experience. To that end, we can recreate gentle rainfall by means of the shower head in the ceiling, available in two sizes, or submerge ourselves under a waterfall thanks to a cascade spout positioned on the shower wall.

Maintaining the simple lines of the collection the fireclay shower tray, with a hidden water outlet, is integrated at floor level thanks to Zero-to-Surface technology.

On the other hand, the In-Drain water outlet and the Armani/Roca tiling can be personalized to the desired size and shape of the shower area whilst maintaining continuity of the floor tiling throughout the entire bathroom area.

The most versatile thermostatic shower mixer controls all 5 functions: the handshower with 2 adjustable jets for localized massages, the rain shower head and the wall mounted cascade. All jets and nozzles are fitted with the Easy-Clean system; anti-limescale silicone ensuring optimum functionality and easy maintenance.

A vertical built-in cabinet complements this area alongside a towel rail and a shelf with a versatile system of containers and hangers which can be completely personalized.

BASIC NEEDS AREA

The Basic Needs area has been created with an exquisite subtlety. Suspended from the wall by the Hide-Fix system, all fixtures are hidden and both the WC and bidet have soft-close covers.

The WC incorporates Touch-Flush technology which is built into the back wall and has dual flush with touch sensitive control. This sanitary ware element is a one piece design to make cleaning easier and guarantee optimum hygiene.

The bidet's single mixer faucet is fitted with Smart-Flow technology which simultaneously saves water and energy. The Hide-Tap design means the faucet is not visible when the cover is closed.

For a complete and hygienic cleaning of the WC bowl, the Armani/Roca bathroom has a hand held extendable mini shower, the Toilet-Jet, which is discreetly hidden in a built-in cabinet, Hide-Shower.

For intimate hygiene a small extendable hand held jet also hidden inside a built-in cabinet has been created. This intimate gentle shower jet is also available in a version attached to the wall which incorporates a built-in progressive mixer to regulate the temperature.

The essential accessories in this area have been created in the unmistakable style of Armani. Just like the discreetly covered toilet roll holder, the built-in cabinets with courtesy lighting make everything easily available without deviating from the overall aesthetics of the bathroom.

COMMON ELEMENTS

Porcelain tiling and flooring

Thanks to its porcelain wall and floor tiles, the Armani/Roca bathroom concept achieves an utterly flawless look. Roca's exclusive Rock & Rock technology ensures high performance from its incredibly textured tiles. Specially designed pieces complete this range allowing you to achieve perfect positioning for an impeccable finish.

Dividers

The tailor-made floor to ceiling dividers come with an optional feature which allows opacity control for increased privacy. The optional bi-coloured mesh encased in the double layer of tempered glass, finished with an extruded aluminum frame, lends an elegant yet innovative appearance.

Finishes

Excellent finishes and surprising combinations of texture and recommended colours are the key to providing this imaginative bathroom space with the impeccable elegance and discreet luxury inherent in the Armani style.

Frequently Asked Questions

What is Part M?
Part M of the building regulations addresses the access to and use of buildings.

What is WRAS?
Products approved by the UK's Water Regulations Advisory Scheme (WRAS) comply with high standards set out by the Water Fittings Regulations.

What is a TMV (thermostatic mixing valve)?
A TMV is a valve which combines hot and cold water to ensure a constant temperature to prevent scalding. Roca's TMV & thermostatic basin mixer are both suitable for domestic or commercial use.

What is BS 8300?
BS 8300 provides guidance on good practice in the design of domestic and non-domestic buildings, and their approaches meaning they are convenient for use by disabled people.

What is the difference between a regular WC and an accessible WC?
Both types of WC fully comply with BS EN 997:2012, however an accessible WC is larger so that a wheelchair user can easily transfer from a wheelchair to the pan, as the height of the pan with the seat is the same height as the wheelchair. Both Meridian Access and Laura Access pans project 750mm and are 480mm high (to the top of the seat).

What is the difference between exposed and concealed grab rails?
Screws and fixings will be visible when exposed grab rails are fitted; concealed grab rails include covers which hide the fittings, offering a deluxe finish which is ideal for hotel specifications.

What is LABC and what are the benefits?
LABC (formerly known as LANTAC) register products which comply with Part M building regulations enabling local authority building control teams to quickly accept and approve specifications. Registration reassures customers that the products being installed are fully compliant and safe to use.

What are the benefits of copper tails with the thermostatic basin mixer?
Copper tails included with the thermostatic basin mixer reduces the risk of contamination and discourages bacteria growth making them ideal for healthcare and hospital areas.

What does the term 'Ambulant Disabled' mean?
Ambulant disabled refers to people who suffer from a disability but are not necessarily reliant on using a wheelchair. Ambulant disabled people still require assistance within the bathroom space such as a raised pan or contrasting grab rails.

Where should wheelchair accessible toilets be located within a building?
There are several provisions of where a unisex wheelchair accessible washroom should be located within a building:

- As close as possible to the entrance/ waiting area of the building.
- Not in a way which would compromise the privacy of the user.
- Located in a similar position on each floor of a multi-storey building, and allow for right and left hand transfer on alternate floors.
- When it is the only toilet facility in the building, it must be a unisex wheelchair accessible washroom, and the width must be increased from 1.5m to 2m and should include a standard height washbasin in addition to the finger rinse basin.
- On an accessible route which is direct and obstruction free.
- Any wheelchair user should not have to travel more than 40m on the same floor or more than 40m on a combined horizontal distance where the unisex washroom is on another floor but is accessible via a passenger lift.

FACTS

- 1 in every 20 rooms must supply an accessible washroom for disabled use
- New houses must offer a WC facility on the entry level floor, suitable for wheelchair access
- If there is only one toilet facility available, it must be a large unisex wheelchair accessible washroom
- All washrooms must have one ambulant cubicle
- Where there are four cubicles, including an ambulant cubicle, an enlarged cubicle must also be provided

Bathroom Collections

As a global leader in sanitaryware manufacture, Roca continually pushes the boundaries of technology and design. On-going analysis of changing tastes, lifestyles and socio-cultural trends drives continuous refreshment of the range to take account of emerging needs. The collections offer genuine breadth of choice in terms of style and functionality across most design themes and price points. All are underpinned by the durability and reliable performance associated with a world leader.

The core elements of washbasin, WC and bidet form the spine of each range but encompass an extensive choice of options and additions such as furniture, allowing one range of products to provide a palette of solutions for a wide variety of applications, from homes to hotels.

Continuous research and development of intelligent flush mechanisms and meticulous WC pan design enable Roca WCs to be more water efficient and therefore increasingly environmentally friendly.

W+W

Innovation, technology, sustainability and design join forces to create W+W, a unique model in which a basin and WC form a single item.

In addition to creating a practical integrated solution for small spaces, the W+W filters and stores water from the washbasin and reuses this to supplement the water used for flushing the WC (any other water required to carry out the flush is pulled from the mains supply) resulting in significant water savings.

Designed by Gabriele and Oscar Buratti.

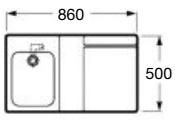
W+W

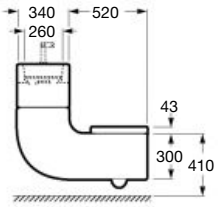
W+W

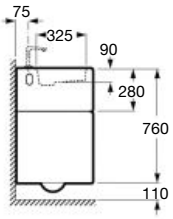
W+W

Designed by Gabriele and Oscar Buratti

Washbasin and WC







893020001 ● 860 x 500 Basin, Singles-Pro basin mixer, waste, WC with 6/3 litre dual-flush, soft-close seat, wall-hung frame and all fixings and flexible hoses. Features Roca's water reuse technology (water from the basin is filtered and reused to flush the WC). Installation videos and information (including pre-installation) are available at www.uk.roca.com

W+W is the fusion of basin and WC in one single piece. Complemented by the Singles-Pro basin mixer, it is the logical choice when sustainability and excellent design are key.

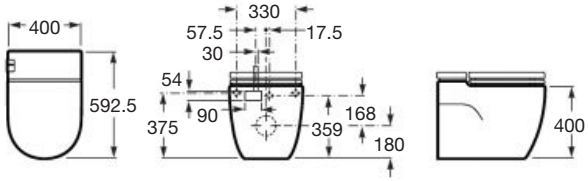
Dimensions in mm

Due to manufaturing processes, all dimensions of ceramic components are approximate.

● Pierced taphole

In-Tank

In-Tank Meridian back-to-wall WC

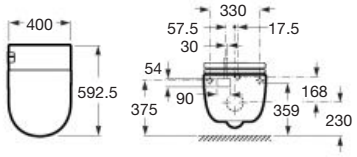


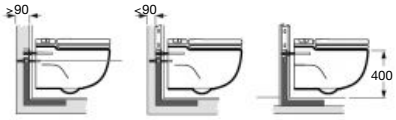
893303000	Back-to-wall WC with integrated cistern and 4.5/3 litre dual-flush. Soft-close seat and cover included. Requires electricity for the air pump used in the flushing process. Works on mains pressure only. Installation videos and information (including pre-installation) are available at www.uk.roca.com

WRAS APPROVED PRODUCT

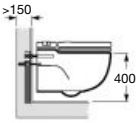
Rear plate allows access for maintenance and is reversible so flush button can be installed on the left or right-hand side

In-Tank Meridian wall-hung WC





L-shaped frame



I-shaped frame

Wall-hung WC with integrated cistern and 4.5/3 litre dual flush. Soft-close seat and cover included. Requires electricity for the air pump used in the flushing process. Works on mains pressure only. Installation videos and information (including pre-installation) are available at www.uk.roca.com

893301000	Wall-hung WC pan including L-shaped frame (for stud wall installations) with V0009200R fixing kit
893302000	Wall-hung WC pan including I -shaped frame (for solid wall installations) with V0009200R fixing kit

WRAS APPROVED PRODUCT

Rear plate allows access for maintenance and is reversible so flush button can be installed on the left or right-hand side

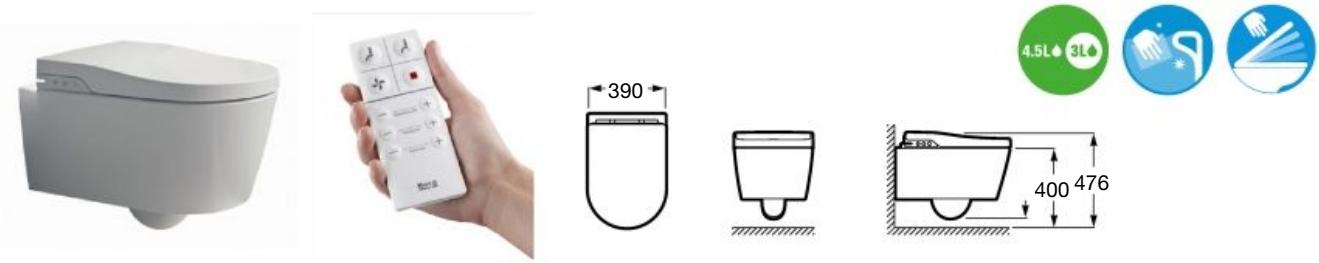
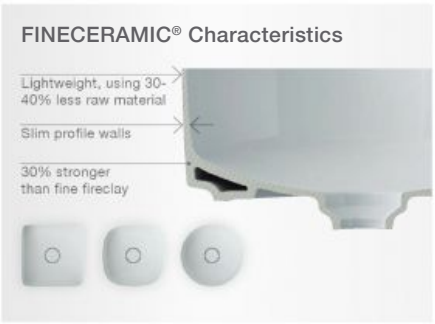
341520000	Cistern complete with 4.5/3 litre dual-flush fittings

Inspira In-Wash Wall-hung WC



803060002	Rimless WC pan with integrated shower toilet functionality, includes remote control and lateral keypad. Hidden fixations are included for a seamless look. Seat is included.

Features and benefits



FINECERAMIC®

FINECERAMIC® is a new revolutionary material, 100% ceramic using 30-40% less raw material than standard vitreous china, yet 30% stronger than fine fireclay

Achieving slim walls which are durable, with greater tensile strength, hygienic and resistant to abrasive cleaners, FINECERAMIC® is a new sophisticated approach to the bathroom.

RIMLESS TECHNOLOGY

RIMLESS technology is featured on the Inspira wall-hung WCs, which make them extremely hygienic and easy to clean.

The hidden distributor at the back of the pan offers a precise flush.

SUPRALIT®

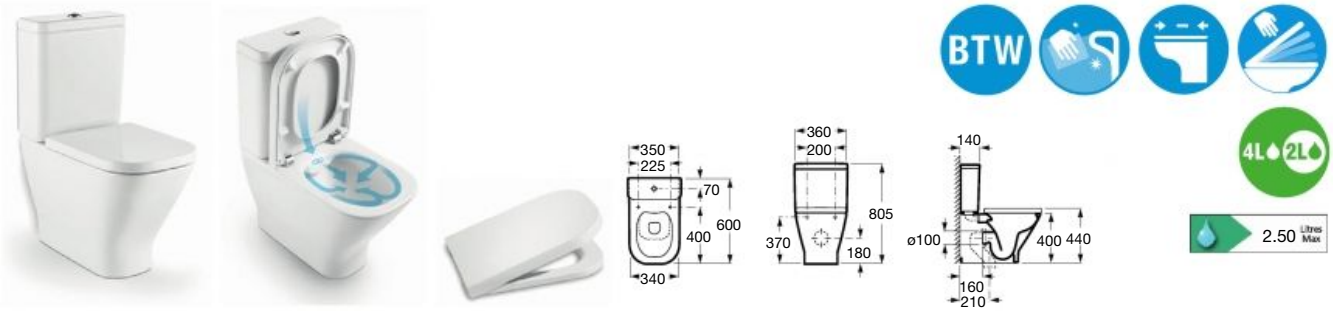
SUPRALIT® is a new resin which Inspira seats are manufactured from, making them 12% more durable than standard seats, more hygienic and offering better resistance against UV lighting.

See also: Inspira bathroom collection - page 158-169. Installation systems for wall-hung WCs - page 274-275.

Dimensions in mm — Due to manufaturing processes, all dimensions of ceramic components are approximate.

Rimless WCs

The Gap rimless close-coupled WC (CleanRim)



34273700H	Rimless WC pan dual outlet with V0007500R pan-to-wall fixing kit (moulded back-to-wall) and cutout at the side of the pan for isolation valve. Uses an efficient distributor at the back of the pan to allow for a flush volume of just 4 and 2 litres
342737000	Rimless WC pan dual outlet with V0007500R pan-to-wall floor fixing kit (moulded back-to-wall) and no cutout for isolation valve. Uses an efficient distributor at the back of the pan to allow for a flush volume of just 4 and 2 litres

Element

Element is both modern and functional, with compact, clean and simple pieces designed around the shape of a prism. Element is a true reflection of the creative spirit of its author, British architect David Chipperfield. The collection, with a clear geometric stamp, goes for a contained look, using decidedly chunky pieces to convey a distinctive, radical style with great authority and presence.

Designed by David Chipperfield

Khroma

Khroma incorporates a vibrant red colour, or a neutral white, with texture and design to create a happy, carefree bathroom space. Vincent Gregoire, creative director at the prestigious French trend agency Nelly Rodi, chose the distinctive colour to help make the Khroma range on trend and a real gift to your senses.

Happening

Happening is ideal for those looking for new trends in the bathroom. The classical structures of conventional bathroom elements are given a new perspective, with a simple design which also gives the bathroom character.

Designed by Ramón Benedito

Inspira

Inspira Collection | The Philosophy

Individual solutions for specific expectations.

Bathrooms in their most intimate state.

Bathrooms that reflect character. Under the claim “your style, your bathroom”

Roca presents Inspira, a new bathroom design concept.

A balance of aestetic design, with functional statements developed to support interior design without restricting, with the style appeal of a high demanding segment.

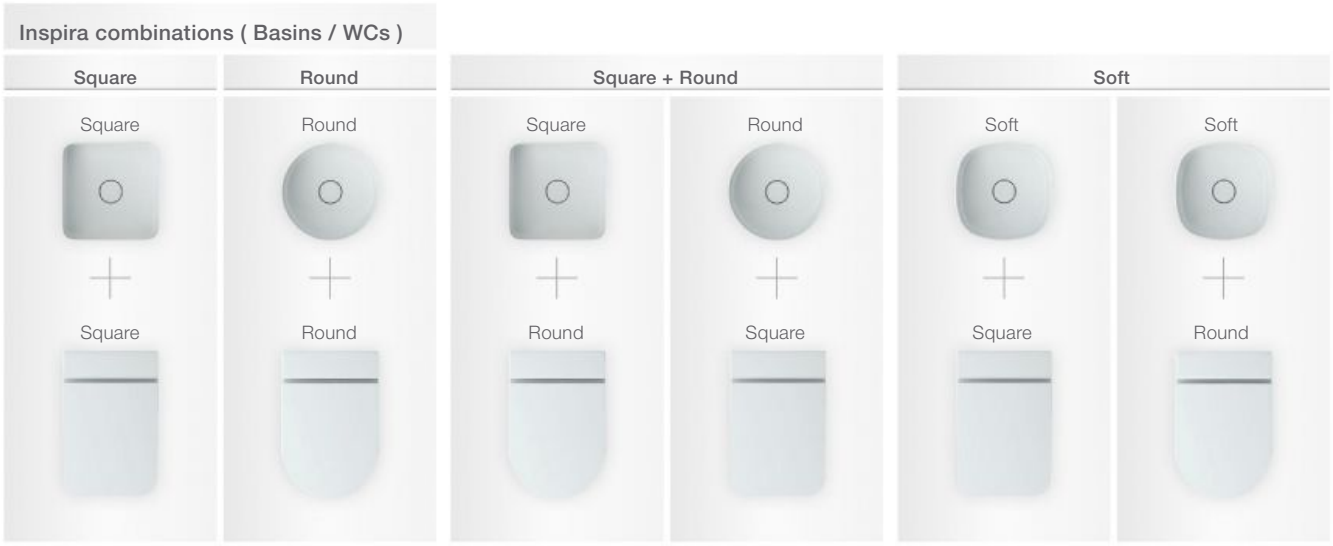
One single collection based on the 3 most essential geometrical shapes, providing solutions not only for the conventional consumer but also for those who want to see their own style reflected in their bathrooms.

Inspira

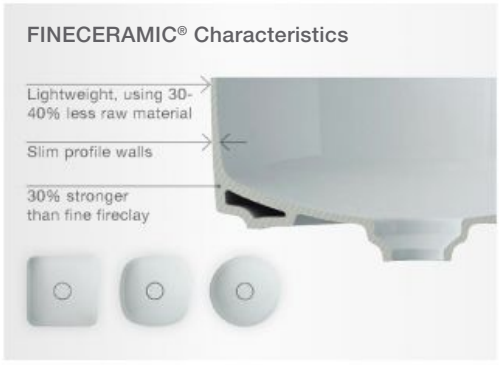
Perfect combinations

Inspira has been designed so that all pieces complement one another, providing the opportunity to mix and match depending on personal preferences.

Choose from Round, Soft or Square, all offering a unique look to any bathroom space.



Features and benefits



FINECERAMIC®

FINECERAMIC® is a new revolutionary material, 100% ceramic using 30-40% less raw material than standard vitreous china, yet 30% stronger than fine fireclay

Achieving slim walls which are durable, with greater tensile strength, hygienic and resistant to abrasive cleaners, FINECERAMIC® is a new sophisticated approach to the bathroom.

RIMLESS TECHNOLOGY

RIMLESS technology is featured on the Inspira wall-hung WCs, which make them extremely hygienic and easy to clean.

The hidden distributor at the back of the pan offers a precise flush.

SUPRALIT®

SUPRALIT® is a new resin which Inspira seats are manufactured from, making them 12% more durable than standard seats, more hygienic and offering better resistance against UV lighting.

Hall

This contemporary and highly practical design is the result of in-depth research into the needs of the bathrooms of today and those of the future.

Each piece is a study in combining minimalism with functionality; the design enables each item to optimise available space without compromising on the overall look or the experience of the user. A choice of standard 6/3 or eco 4.5/3 litre dual-flush WCs is available.

Designed by Benedito Design.

Meridian-N

With its truly comprehensive selection of washbasins, WCs and bidets, the Meridian-N collection can be configured to suit virtually any bathroom requirement or design theme. Meridian-N Compact pieces can be mixed and matched with the rest of the range to make the most of smaller bathroom spaces too.

An eco 4.5/3 litre dual-flush WC is standard in both Meridian-N and Meridian-N Compact. Thanks to the flexible and complimentary nature of the collection, its design language has now been extended to the innovative In-Tank Meridian WC, and two comfort height WCs.

Designed by Schmidt and Lackner.

Dama-N

Joan Gaspar has successfully designed the Dama-N collection with neutral lines which make it a versatile range of sanitaryware and furniture that succeeds not only due to its functionality but also to its great value-added design. Small details such as the small indentation in the WC and bidet covers to allow for easy opening, or the shell cistern which helps prevent unsightly condensation, ensure Dama-N is both aesthetically pleasing and functional.

The Gap

With subtle design details and smooth clean lines, The Gap offers a wide choice of basins, WCs, bidets, furniture and baths to appeal to each individual need, whilst allowing the desired bathroom space to be perfectly tailored to individual tastes and requirements.

With a strong emphasis on colour, The Gap furniture provides an option for every bathroom. With furniture available in Gloss White, Matt Grape or Dark Textured Wood (Mood Teka) along with integrated metal handles, The Gap is both functional and design conscious.

W+W

Innovation, technology, sustainability and design join forces to create W+W, a unique model in which a basin and WC form a single item.

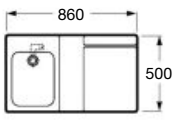
In addition to creating a practical integrated solution for small spaces, the W+W filters and stores water from the washbasin and reuses this to supplement the water used for flushing the WC (any other water required to carry out the flush is pulled from the mains supply) resulting in significant water savings.

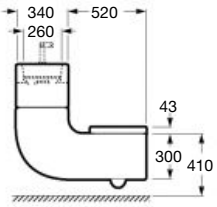
Designed by Gabriele and Oscar Buratti.

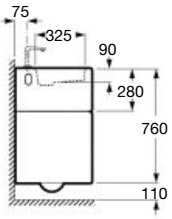
W+W

Designed by Gabriele and Oscar Buratti

Washbasin and WC







893020001 ● 860 x 500 Basin, Singles-Pro basin mixer, waste, WC with 6/3 litre dual-flush, soft-close seat, wall-hung frame and all fixings and flexible hoses. Features Roca's water reuse technology (water from the basin is filtered and reused to flush the WC). Installation videos and information (including pre-installation) are available at www.uk.roca.com

W+W is the fusion of basin and WC in one single piece. Complemented by the Singles-Pro basin mixer, it is the logical choice when sustainability and excellent design are key.

Dimensions in mm

Due to manufaturing processes, all dimensions of ceramic components are approximate.

Introduction to Roca Installation Systems

Installation Systems are a fundamental part of the bathroom. Roca Installation Systems offer an affordable solution when a practical, hygienic and modern bathroom design is called for. A wide range of different installation options are available, allowing easy install of wall-hung and back-to-wall WCs along with bidets and basins.

There are compact options available as well as low height variations to install under a window.

With a variety of operating panels, in an array of finishes, to choose from there is a style for any bathroom space.

With the choice of twenty wall-hung and fifteen back-to-wall WCs to complement our Installation Systems there is a wide variety of styles available to suit any bathroom style, from modern to traditional.

All Roca WCs have 180mm fixing points, fully compatible with our new Installation Systems, as well as other brands who have 230mm fixing points.

Included within the product portfolio are two wall-hung rimless WCs which are hygienic and easy to clean, and offer a unique bathroom solution.

There is also the option of two new comfort height back-to-wall WCs, offering an alternative solution for those who require a higher pan, available in The Gap and Meridian-N ranges.

Basic WC Compact installation system

Pictograms

400kg weight load
Applicable to frames which can hold up to 400kg due to the stainless steel frame.

Easy installation
Roca installation systems are quick and easy to install, and feature comprehensive instructions. Installation videos are also available to download online.

Insulated cisterns
Reduces condensation and noise levels when the cistern is refilling, ideal for both domestic and commercial settings.

Compact
Designed to meet the needs of space restricted areas.

Low height
Designed to be installed under a window.

Easy maintenance
The product is designed so that it can be easily accessed and maintained without the need for tools via the operating panel.

Suitable for public spaces
Products are suitable for high traffic areas.

Dual flush
Products can be flushed at 6 or 3 litres.

Eco dual flush
Products are capable of flushing at a water saving level of 4.5 or 3 litres.

Quality assured
Flush valve longevity of over 200,000 cycles - offering great performance

Guarantee
All Roca installation systems offer a 5 year guarantee on the cistern⁺ and a 10 year guarantee on the frame* offering peace of mind.

* 10 year guarantee is only applicable to the frames including: Duplo WC, Duplo WC Compact, Duplo WC L and Basic WC Compact.

⁺ The cistern guarantee includes internal fittings, excluding the diaphragm washer.

Basins and Furniture

In addition to the furniture and basin solutions that form part of our specific bathroom collections, Roca also offer a variety of individual basin and furniture concepts that integrate seamlessly into the range and allow greater flexibility in fulfilling the interior design theme and the required functionality of a particular space or client.

- Compact wash-basin
- Soft & self close (drawers)
- Optional legs
- Soft-close (doors)
- Compact furniture
- Soft-close (drawers)
- Reversible
- With lighting
- Space-saving waste
- Light
- LED Light
- Demister

Heima furniture, Diverta basin and Deimos mirrors

Versatility
From vanity basin and furniture solutions to on countertop basins, many of which can be combined with our flexible Heima furniture collection (page 301-304), there is a full palette of options to choose from. Striking wall-hung basins with an integrated ceramic shelf provide an elegant and minimal look and also an innovative alternative for hotel and public bathrooms, where durability and ease of cleaning are essential.

For a timeless look, an under-mounted basin forms a beautiful partnership with surfaces in a wide range of materials from the modern solid surface to a classic marble.

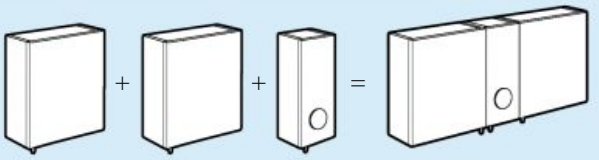
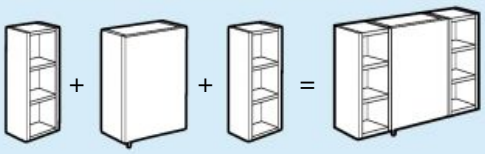
Tailor-made storage:

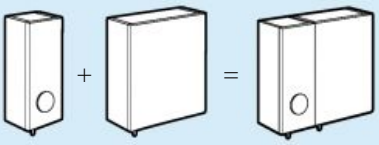
The Luna mirrored cabinets can be combined to form various storage configurations.
Here are some suggested combinations:



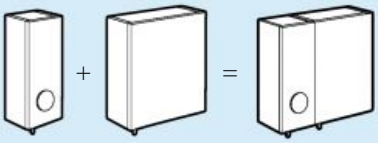
500 mm + 500 mm + 200 mm = 1200 x 600 x 150 mm



200 mm + 400 mm + 200 mm = 800 x 600 x 150 mm



200 mm + 500 mm = 700 x 600 x 150 mm



200 mm + 400 mm = 600 x 600 x 150 mm

Brassware

With a brassware pedigree dating back to 1954, Roca's extensive range of taps and showers includes some of the most avant-garde designs and incorporates the very latest technological developments, to deliver both functionality and style. These innovative and ultra-modern designs sit alongside more familiar, classic collections, enabling Roca's brassware to embrace most tastes and requirements.

Allowing for flexible and tailored specifications, the brassware collections cover a wide variety of formats from single lever to electronic sensor taps and deck-mounted to wall-mounted. For the showering and bathing areas of the bathroom, there is a similarly striking selection of showerheads, handsets and hoses, which work in harmony with our comprehensive range of thermostatic bath and shower mixers.

Kitchen taps, available in certain ranges, enable a design theme to be maintained throughout a project.

Bar Pressure
The unit of measurement for pressure is bars. 0.1 bar is equal to a 1 metre head of water; in plumbing terms, this means for a gravity fed system that if the base height of your water tank is 1 metre above a tap then there will be 0.1 bar of water pressure. Water pressure can be improved by installing a pump.

Water label

Spray
A powerful water spray, divided up into tiny droplets that stimulate the blood vessels and give the body a revitalising massage.

Aquair
Water and air are combined to give a soft, foamy sensation for a truly relaxing experience.

Rain
The fine water droplets are converted into tiny threads, giving the body a sensation of lightness and pleasure.

Pulse
Intermittent fine jets of parallel flowing water that give the body a revitalising massage.

Spray function
A powerful water spray divided up into tiny droplets that stimulate the blood vessels and give the body a revitalising massage.

Rain function
The fine water droplets are converted into tiny threads, giving the whole body a sensation of lightness and pleasure.

Pulse
Intermittent fine jets of parallel flowing water that give the body a revitalising massage.

AquAir
A function that combines unbeatable comfort with a rain effect, providing significant water savings of between 25% and 50%.

Easy Clean
Products feature Easy Clean nozzles to help prevent limescale build-up.

EverShine®

The beauty of the hard-wearing chrome-plated finish of Roca taps is thanks to the innovative EverShine® chrome-plating system which involves an electrolytic coating. This guarantees that each tap will continue to shine over the years and also makes cleaning easier.

SafeTouch®

The latest development in materials has allowed us to develop SafeTouch® technology which prevents the chrome-plating of our thermostatic taps from overheating. This eliminates the risk of scalding which is of great importance to all, particularly those with young children.

Security 38º ®

A security device (a red button) that stops the control knob from being turned past the 38°C point, Security 38° means wellness and comfort can be combined.

Quick Reaction®

Thanks to the development of the Quick Reaction® technology, our thermostatic taps allow you to enjoy the required water flow and temperature in less than 3 seconds. Furthermore, both remain constant irrespective of variations in the water pressure.

Spray

A powerful water spray, divided up into tiny droplets that stimulate the blood vessels and give the body a revitalising massage.

Rain

The fine water droplets are converted into tiny threads, giving the body a sensation of lightness and pleasure.

AquAir

Water and air are combined to give a soft, foamy sensation for a truly relaxing experience.

Pulse

Intermittent fine jets of parallel flowing water that give the body a revitalising massage.

Hydromassage columns

A convenient and dynamic way to equip the bathroom with a hydromassage system is to use a shower column. Hydromassage columns provide a spa experience for luxury relaxation and revitalisation with different jets, additional handsets and overhead shower roses.

Shower columns

Shower columns offer functional and aesthetic solutions without forgetting the pleasures and feelings of wellbeing that a rain effect shower can bring. Our columns are practical and easy to install in all types of environments. Many of our columns incorporate an overhead shower for exhilarating rain effect coupled with a handset for added functionality.

Roca hydromassage systems

Roca hydromassage systems are available on a selection of our acrylic baths.

Basic

Continuous water massage with pneumatic push button.

Easy, practical relaxation.

- The Basic system comprises water massage with a pneumatic button to operate.
- This system features adjustable and swivelling side jets to offer a continuous water massage.

Total

A toning water massage and a relaxing air massage with digital electronic control.

- The Total system offers an air and water hydromassage controlled by an LCD digital panel, with different massage programmes, such as continuous or pulsing, and an electronic Venturi.
- There are side, back and feet jets, as well as the air jets on the bottom of the bath. All of these are adjustable via the digital panel. The system also features temperature and level sensors to improve performance.

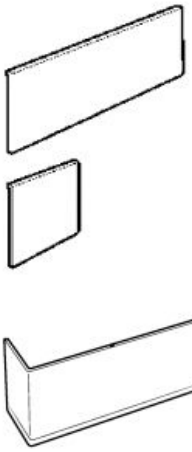
Acrylic bath panels

Luxury reinforced panels are reinforced with GRP to give them added strength and rigidity. A frame and clipping system are used for an easier, quicker and more accurate installation. Superthick panels are made from double thickness, high impact polystyrene.
Reinforced standard and tall panels go through a two stage reinforcement process to make them strong, rigid, smooth and glossy.



Luxury reinforced (540 high)

Steel

Hygienic, easy to maintain and resistant to many factors such as scratching, staining and chemicals, Roca's enamelled steel baths are tested for loads up to 300kg and offer strength and durability across a variety of thicknesses. While standard gauge (2mm) baths will suit the requirements of most specifications, super heavy gauge models (3.5mm) provide lasting solutions in even the most demanding environments, such as hotels. Other benefits of Roca steel baths include the fact they match perfectly with our vitreous china collections (RAL reference 9003) and carry a 25 year manufacturers guarantee (see page 607 for all guarantee information).

Shower trays

Roca offers a wide range of styles and shapes of shower trays including spacious and superslim options. Different materials provide a variety of benefits, the optimal solution can be found for every environment.

Resin
With a naturally slip resistant surface and offering an array of size options and colour finishes, our resin trays provide a durable and adaptable solution for contemporary bathrooms. These trays also incorporate a high capacity 90ø waste.

Steel
Robust but slim, our steel trays marry functionality and aesthetics in a solution for even the most demanding environments. Offering a perfect match for our steel baths, these trays come complete with a 90ø waste.

Acrylic
Acrylic trays are lightweight and easy to install. As well as being warm to the touch, trays can be moulded to diverse shapes for greater choice. Our acrylic trays also come complete with a 90ø waste.

Vitreous China
The durability and strength of vitreous china shower trays make them suitable for any bathroom space. Glazed to match perfectly with our other vitreous china pieces, they will retain their lustre for a lifetime.

Superslim
A selection of our trays are classed as superslim (up to 65mm on VC and 40mm on steel) meaning that they can be integrated into the bathoom easily

Anti-slip
The textured finish provides our shower trays with a high anti-slip feature (C class), providing a safe non-slip environment

Low level
Tray has no frame and can be installed at floor level for better accessibility

Anti-scratch surface
Surface has an anti-abrasive, anti-scratch feature

Accessories
Accessories help to finish the overall look of the bathroom and provide a harmonious feel. The chrome finishes are modern and provide a clean finish. Twin and Victoria ranges are also dual fixing, they can be fixed with either screws or adhesive pads (the latter withstanding loads of up to 5kg on tiles), which means they can be removed at a later date without leaving any unsightly holes.

Victoria

Benefits

Dual installation
Can be installed using screws or with adhesive pads (both supplied), with no need to drill the wall

Accessible products
A product specially designed for people with reduced mobility

Anti-vandal system
Hidden fixations which require a special tool to remove, providing anti-theft protection

EverShine®
The beauty of the hard-wearing chrome-plated finish of Roca taps is thanks to the innovative EverShine® chrome-plating system which involves an electrolytic coating. This guarantees that each tap will continue to shine over the years and also makes cleaning easier

Extra strong
Bears a static load of up to 5kg when installed using adhesive pads

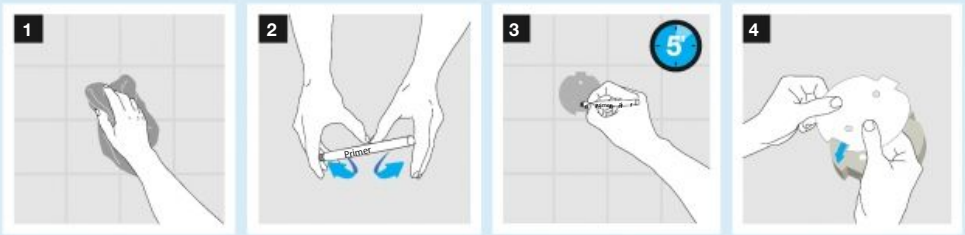
Easy clean finish
An easy-to-clean chrome finish

Mounting kit included
Includes everything you need to install with either adhesive or screws

Extremely tough
Accessories are plated against anti-corrosion

Dual installation: adhesive and with screws

Adhesive

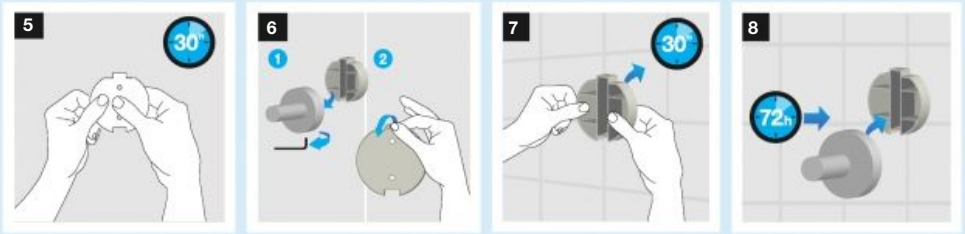


Clean the mounting surface with a 50/50 water/alcohol solution. Mark the fixing area.

Press the Primer tube to break the internal capsule and wait until the liquid soaks the cap.

Apply a thin layer of Primer on the surface of the support and on the wall to increase adherence and leave it for 5 minutes.

Affix the adhesive onto the wall support.



Press the adhesive vigorously for 30 seconds.

Mount the support onto the accessory and remove the protection from the adhesive. Do not touch with your fingers.

Place the accessory on the wall from the bottom, remove the article and press for 30 seconds.

After 72 hours, assemble the piece to the wall support once again.

Downtown
With Downtown large surfaces are transformed into a community, a place of gathering, exchange and interaction. Cements that create spaces with a clean and rigorous look, that enrich environments with aesthetic austerity and provide a kaleidoscope of technical functions. A wide range of sizes, surfaces and mosaics help to make Downtown even richer.

Dream

The new Dream series, functional and versatile, is the evolution of concrete material in matt versions, available in four colours: Blanco, Graphit, Vison and Beige along with a large variety of decors.

Dream is a modern wall tile series that includes a range of finishes from a reassuring tone-on-tone effect to an iridescent metallic look, to a lace decoration and the ramage speckled with gold, bronze and platinum of the Alhambra decoration. It is available in 25 x 70cm size.

Yellowstone
The wood effect that decorates interiors and exteriors. Available in 24.6 x 101 size, in four colours and two surfaces (natural and non-slip). Yellowstone is perfect for both residential and commercial spaces. The rustic look and vintage feel of wood, completed with a three dimensional mosaic add character and warmth.

Boulevard
Inspired by the authentic hydraulic pavements, Boulevard series takes us back in time to the compositive richness and suggestion. This universal decoration is found in conditions where recreating the ambience of old times is required, in a re-interpretation with materials of excellent technical features, giving life to an excellent product. Porcelain stoneware available in format 44.5 x 44.5 and 22 x 22 R cm (rectified) and in tonalities Multicolor and Beige.

Fusion

Fusion is a full body architectural porcelain stoneware that features different refined graphic evolutions, available in four colours.

It blends various designs within one space, all tone-on-tone; it is inspired by cement and seduces the public due to its rich variety of decorations. The silk surface stands out for its soft and wavy feel.

Pure
Soft colors in an advant-garde interior design are the inspiration for Pure: a series with great character that never goes unnoticed. Designed especially for admirers of neutral colours, Pure is a series that surprises with a wide chromatic range and satiated finish, providing freshness, character and modernity to its surroundings.

* All subject to our Conditions of Sale (page 607)
For further information or any aftersales issues, please contact Roca customer services (contact details page 01530 830 080)

1. Definitions

1.1 In these terms and conditions: "the Buyer" means the customer with whom the Company Contracts and shall include anybody holding themselves out as acting on the Company's behalf in respect of placing Orders, inspecting or accepting delivery of the Goods; "the Company" means Roca Limited; "the Contract" means the contract for the sale and purchase of bathroom fixtures its installation and the supply of replacement parts where necessary on the terms contained herein; "the Goods" means any goods supplied by the Company including any material supplied with such goods as packaging.

1.2 The headings used in these terms and conditions are used solely for convenience and do not form part of the Contract.

2. Formation of the Contract

2.1 These terms and conditions shall apply in respect of all orders for Goods. All orders for Goods are invitations to treat and a contract shall only be formed between the Company and the Buyer once any such order has been confirmed by the Company and otherwise subject to the terms of clause 3.2 herein.

2.2 Any contract for the supply of Goods by the Company is deemed to be subject to the Conditions herein and no waiver, cancellation or variation shall have any effect unless expressly agreed in writing by a Director of the Company. In case of dispute between the Company's Conditions and those of the Buyer, the former shall prevail.

2.3 Unless otherwise confirmed by the Company in writing the quality quantity and description of the Goods shall be as set out in the Company's order confirmation. The Buyer shall be responsible for ensuring that the terms of the order are accurate and complete.

2.4 In the event that the Buyer wishes to make amendments to an Order after work has commenced or it requires the Company to undertake work which has not been specifically quoted for the Buyer will be liable for the cost of the additional work undertaken.

2.5 The Buyer agrees that in entering into the Contract it has not relied on any representation, understanding or statement contained in any brochure, price list or sales literature or any other representation, (whether oral or in writing,) which is not included or referred to in either these terms and conditions or the Order Confirmation Letter.

2.6 The Company shall not be liable for any advice given by the Company or its employees or agents to the Buyer or its employees or agents as to the storage, application or use of the Goods unless such advise is confirmed in writing by a Director of the Company.

2.7 If any provision or part of a provision of these Conditions shall be, or found by any court of competent jurisdiction to be invalid or unenforceable, such invalidity or unenforceability shall not affect the other provisions or parts of such provisions of these Conditions, all of which shall remain in full force and effect.

2.8 Where the goods or services are provided by the Company to the Buyer in instalments, while each instalment will constitute a separate Contract, the Company's failure to provide one or more of the instalments shall not entitle the Buyer to terminate the Contract as a whole.

3. Orders

3.1 Unless otherwise confirmed by us in writing, all prices given are exclusive of Value Added Tax, duties, insurance, carriage, set off or abatement.

3.2 Orders will only be accepted from a Buyer who has received confirmation in writing from the Company that it has been granted an account facility. The Company shall grant such facilities at its absolute discretion and shall not be held responsible in any way for any liability whatsoever arising from any delay or refusal to grant such account facility. The Company reserves the right to withdraw such facility for whatever reason.

3.3 Telephone and verbal orders will only be accepted if the Buyer's official order number is quoted. Written or faxed orders which are not clearly marked "Confirmation" will be treated as new orders.

3.4 All orders received which would result in an invoice value of less than £500.00 (excl. VAT) will be charged carriage costs as incurred by the Company (or £50.00+VAT, whichever is the greater).

3.5 No cancellation of orders will be accepted if: (a) in the case of a listed stock item, the product has already been despatched, or (b) in the case of a special order, the manufacture of the item has already commenced. For the avoidance of doubt, all orders for baths with hydro-massage systems are to be special orders.

4. Warranty, Liability & Quality

4.1. Goods are warranted to be of normal industrial quality and subject to specifications, weights and measurements (whether contained or set out in the Company's brochures or otherwise) which are subject to variation (without any prior notice being given to the Buyer) and normal manufacturing tolerances.

4.2. In the usual course the Goods are not sold by sample. Where a sample has been provided by the Company to the Buyer this shall not imply any warranty or obligation or conformity with that or any other sample.

4.3. Coloured materials are subject to colour variation and this by itself shall not be considered a manufacturing defect.

4.4 The Company warrants that all Goods purchased after 1st September 2008 will be free from defects for the following periods:

Ceramics	25 years
Acrylic Baths	25 years
Steel and Cast Iron Baths	25 years
Enclosures and Screens	10 years
Installation System Frame	10 years
Concealed Cistern (including concealed cistern internals, excluding diaphragm washer)	5 years
Brassware and Showers	5 years (lifetime guarantee on ceramic cartridge)
Furniture, mirrors and accessories	2 years
Whirlpool spas	2 years
Bath panels	2 years
Seats and covers	2 years
Cistern internals	1 year

4.5 In the event that the Goods are not free from defects aforesaid by way of remedy the Company shall at its option either (1) repair or (2) replace or (3) offer a full or partial refund or (4) any combination of (1), (2) or (3) PROVIDED THAT

a. the defect was not capable of being apparent on inspection

b. the Goods have been properly maintained and fitted in accordance with the Company's recommendations

c. the Company is notified within 5 days of discovery of the defect

d. any Goods alleged to be defective have been stored in a secure place and made available to the Company for inspection at the Company's request

e. no attempt by any third party or you has been made to remedy the defect

f. the Company have confirmed the defect

g. proof of purchase is presented to the Company.

4.6 No warranty, guarantee or other term relating to quality or fitness for purpose is given in respect of the goods supplied by the Company. The Company will supply no substitute goods or reimburse the Buyer for any goods hired for the time that the Goods are in the Company's possession.

4.7 Except in respect of death or personal injury caused by the Company's negligence the Company shall not be liable to the Buyer by reason of any representation (unless fraudulent) or any implied warranty, condition or other term or any duty at common law or under the express terms of this agreement for any loss of profit or any indirect or consequential loss, loss of goodwill, any destruction of data, damage, costs or expenses whether or not such losses were in the contemplation of the parties and at the date of this contract, which arise out of or in connection with the provision of the Goods by the Company to the Buyer.

4.8 The Company's entire liability under these terms and conditions shall be limited to the warranty set out above and shall not in any event exceed the price paid by the Buyer.

4.9. Lay-outs and designs depicted in any of the Company's brochures or set out in show-rooms or any exhibitions of the Company's Goods are purely for the purposes of illustration and demonstration and shall not imply any warranties by the Company as to the suitability or adaptability of such lay-outs and designs at any premises at which the Buyer intends to install the Company's Goods in respect of which the Buyer shall take independent advice.

4.10. The warranty shall not apply if the buyer carries out any modifications or additions to the product.

5. Delivery

5.1. Delivery dates quoted are estimates only and time shall not be of the essence.

The Company shall be under no liability for not supplying Goods ordered and will not be liable for any cost that might be incurred through non-availability, whether due to circumstances within the Company's control or not.

5.2. The Buyer shall indemnify the Company against all claims for damages and any liability whatsoever arising out of compliance by the Company with the Buyer's delivery instructions.

5.3. The Buyer shall provide all necessary assistance to the Company in unloading Goods at the point of delivery and in the event of the Buyer failing to do so, the Company shall be entitled to charge the Buyer with the amount of any expense incurred by the Company resultant there from.

5.4. All Goods must be checked by the Buyer at the time of delivery for any apparent defects and the Company shall not be liable for the loss or non-delivery of any part of a consignment which has been signed for by the Buyer or his agent. If any defects are discovered during this inspection, the Buyer must notify the Company's representative immediately. The Buyers' acceptance will be made to the Company by virtue of the Buyer or its representative signing a delivery receipt. Anybody presenting themselves to the Company's representative as acting on behalf of the Buyer in order to inspect or accept delivery of the Goods shall be deemed to be the Buyer's representative and as such has all relevant authorities to sign the delivery receipt confirming the Buyer's acceptance of the Goods.

6. Payment & Title

6.1. Unless otherwise agreed in writing by a Director of the Company, all invoices are due and payable on or before the last day of the month following the month in which the invoice is dated. If the Buyer does not pay the price set out in the Company's invoice in full and in cleared funds by the time payment falls due then, in addition to any other rights the Company may have, the Company shall be entitled to bring an action against the Buyer for the outstanding invoice sum (even if possession of the Goods has not passed to the Buyer) and/or cancel the agreement between the parties and/or suspend any further deliveries to the Buyer and/or charge the Buyer interest (both before and after any judgement) on the amount unpaid, at the rate of 8% above Lloyds Bank base rate until payment is received. Further, the Buyer shall indemnify the Company in relation to all losses (including but not limited to consequential losses), costs and expenses (including but not limited to any legal costs) caused to or incurred by the Company due to the Buyer failing to meet payment for the Goods in accordance with this clause.

6.2 The Buyer shall not be entitled to deduct any amount from the sum owed to the Company by way of set off or counterclaim or for any other reason unless agreement to any such deduction has been given by a Director of the Company in writing.

6.3. The legal and beneficial title in the Goods shall not pass to the Buyer until payment of the full contract price inclusive of VAT and interest but the risk shall pass upon delivery. Until payment has been made, the Buyer shall hold the Goods as bailee for the Company and shall store the Goods separately in such a manner as to keep the Goods identifiable as the property of the Company. Such property and wherever practicable each individual item thereof shall be plainly marked or otherwise adequately identified by the Buyer as "Property of Roca" and shall be stored separately and apart from the Buyer's property wherever possible. Further, the Buyer shall keep such property insured against such risk of loss or damage for its value at the Buyer's expense during such time as it remains in the Buyer's possession. If notwithstanding that the legal and beneficial title in the Goods has not passed to the Buyer the Buyer shall sell the goods to a third party, irrespective of whether a valid title shall have passed to the third party the Buyer shall hold the proceeds of such sale in trust for the Company. The Buyer shall not be the agent of the Company in any dealings with third parties. The Buyer hereby authorises the Company at any time when the Buyer's account with the Company is overdue or the Buyer has become insolvent but not otherwise to enter upon the Buyer's land or premises or buildings with workmen and transport as may be deemed necessary by the Company to examine and recover Goods supplied by the Company.

7. Returns

7.1. No Goods once despatched by the Company shall be returned to the Company unless permission has been given by the Company in writing and any Goods so returned by agreement must be in good order and resaleable condition and contained in the Company's current pricelist. Such Goods must have been delivered by the Company within the previous six months and correspond exactly to the original invoice, a copy of which must accompany the return. Any credit allowed by the Company for such returned Goods shall be subject to a handling charge of 25% of the net value of the Goods or £25 plus VAT whichever shall be the greater.

8. General

8.1 The Company shall not be liable to the Buyer or deemed to be in breach of the contract for any delay in performing, or failure to perform any of its obligations in respect of the supply of the Goods, if the delay or failure is due to any cause beyond the Company's reasonable control.

8.2 Any notice required to be given by either party to the other shall be in writing addressed and posted first class to the relevant party's registered office or principal place of business and shall be effective on the third day of posting.

8.3 No waiver by the Company of a breach of any provision in these terms and conditions by the Buyer shall be considered as a waiver of any subsequent breach of the same or any other provisions.

8.4 The Company may terminate the contract without penalty or compensation to the Buyer immediately if the Buyer becomes unable to pay its debts or enters into compulsory or voluntary liquidation (other than for the purpose of affecting a reconstruction or amalgamation in such manner that the company resulting from such reconstruction or amalgamation if a different entity shall agree be bound by and assume the Buyer's obligations under these terms and conditions) or if the Buyer compounds with or convenes a meeting of its creditors or has a receiver or manager or an administrator appointed of its assets or ceases for any reason to carry on business or take or suffer similar action which in the Company's opinion means that the Buyer may be unable to pay its debts.

8.5 The Contracts (Rights of Third Parties) Act 1999 shall not apply to these terms and conditions.

9. Jurisdiction

9.1. The Contract shall be governed in all respects by the laws of England and the Company and the Buyer hereby irrevocably submit to the exclusive jurisdiction of the English Courts.
