

W+W

Roca

- USED WATER IS NOT WASTED
- SELECTIVE PARTICLE FILTRATION SYSTEM
- WATER TREATMENT SYSTEM
- TREATMENT TANK
- WC CISTERN

Now every drop counts twice

All water entering the basin of the W+W passes through an exclusive drainage system. Due to the special filtration system, particle debris is separated out from the waste water, allowing only the liquid to pass directly into a small treatment tank where it is purified. Each flush is made directly from this tank, which is connected to the WC cistern. In this way, the water supplied is clean and hygienic. Thanks to Roca's revolutionary 'water reuse technology' every last drop of this discarded water can now be saved and used again.

Sustainable Technology

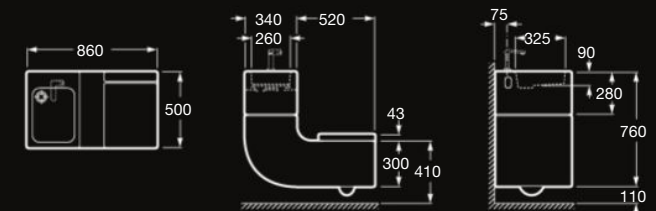

W+W comes complete with a tap from the exclusive Singles-Pro range, a range which was born out of the same need to find sustainable solutions that respect the environment. Singles-Pro with its compact design and smooth, minimalist lines, features a progressive cartridge where the control always starts the flow with cold water. As you continually turn the tap on, the flow changes to a mix of hot and cold, ending the turn with hot water. This means that heating systems are not fired up unnecessarily, thereby saving energy and reducing CO₂ emissions. Singles-Pro also includes a flow limiter which restricts the water flow to a maximum of 9 litres per minute. The overall result is a tap that saves space, water and energy – the perfect compliment to the W+W.

W+W brings together design and sustainability by combining the toilet and washbasin in one single piece. Complemented by the Singles-Pro tap this solution is the logical choice for situations where sustainability and design excellence are top priority.

DESIGN + SUSTAINABILITY =

W+W

Washbasin + **W**atercloset

W+W is a unique product which combines functionality, sustainability and aesthetic design and has arisen from Roca's ambition to incorporate new, unique and innovative solutions into the bathroom. This solution brings together design and sustainability by combining the toilet and washbasin in one single piece. An eye-catching design makes it ideal for compact spaces whilst it's most innovative feature is undoubtedly the technology which allows water from the washbasin to be reused to fill the toilet cistern, a unique concept that Roca has brought to reality.

W+W – bridging the gap between sophistication and a love for the planet.

Roca – World leader in bathroom spaces

For years we have anticipated future trends and market needs, thinking of solutions that best cater for consumers' tastes and requirements.

Design

We surround ourselves with the world's finest architects and designers, such as Ferrater, Chipperfield, Moneo, Schmidt & Lackner, Herzog & de Meuron... We strive to offer a design that will make your bathroom a unique space.

Innovation

We have our own Innovation Lab where we experiment every day with new ideas, designs and materials, with the sole aim of enhancing your bathroom experience and providing solutions that make your everyday life more comfortable.

Sustainability

We love our planet and we demonstrate this every day. For this reason, our products are designed to incorporate advanced water and energy-saving devices that help us to lead a more balanced and sustainable co-existence with our environment.

Roca Guarantee

All of our products comply with specific European and market specific regulations (e.g. BS and EN) where applicable. We offer you the finest product with the best guarantee. Our goal is your total satisfaction.
